Apple® PowerBook™

145B 4/80

The Apple® PowerBook™ 145B computer is designed for those who want solid Macintosh® performance and flexibility in a convenient, take-it-wherever-you-work notebook computer. Although it fits easily in your briefcase, this innovative notebook computer offers the full power and ease of Macintosh computing. The PowerBook 145B makes it easy to work on the road or on your desk. The sleek, ergonomic design includes standard-size keyboard, integrated trackball and palm rest, and a bright, full-page-width display. 4MB RAM • 80MB Hard Drive

Apple® Macintosh® PowerBook™

165 4/80

The Apple® PowerBook™ 165 sets a new standard for high-performance and affordable notebook computing. It gives you the convenience of all-in-one package and the powerful performance you need to take advantage of your applications. Featuring a 68030 microprocessor that runs at 33 megahertz, the PowerBook 165 is more powerful than many desktop computers. The PowerBook 165 supports up to 14 megabytes of RAM, so you can work with multiple applications simultaneously.

\$1699*

Apple® Macintosh® Powerbook™

180 4/120

The Apple® Macintosh® PowerBook™ 180 computer is the most powerful member of the PowerBook family of notebook computers. It combines incredible speed with high performance and the best screen quality available today, to give you a notebook that's flexible, functional, portable, and powerful. The PowerBook 180 has everything you need for impressive client presentations. Video-out capabilities let you work on a variety of external displays, both monochrome and color. It comes standard with 4 megabytes of RAM and a built-in modem, and runs applications up to 50 percent faster than the PowerBook 140.

Apple® Macintosh® Color Powerbook™

180C 4/80 W/Modem

The sharpness and clarity of an active-matrix color display makes the Apple® PowerBook™ 180C computer the most powerful and colorful member of the PowerBook family of notebook computers. The PowerBook 180C is perfect for dramatic one-on-one client presentations. The PowerBook 180C comes standard with 4 megabytes of RAM, expandable to 14 megabytes, so you can work on multiple applications simultaneously. A 68030 microprocessor running at 33 megahertz and a powerful math coprocessor let you handle the most demanding applications.

Apple® Macintosh® PowerBook™

Duo™ 270c 4/240

For users looking for light weight and small size in a powerful notebook computer, the Apple® PowerBook Duo™ System is an excellent choice. The PowerBook Duo offers high-speed processors, active matrix screens, large RAM expansion, and desktop expansion—features normally found only on much larger, heavier systems—all in a package that weighs less than 5 pounds. The PowerBook Duo 270c is Apple's top-of-the-line color PowerBook Duo computer and is the industry's first 16-bit color notebook. Its 8.4-inch, backlit, active-matrix display lets you work with your files in thousands of colors, providing the best screen image, performance, and color available in a notebook computer. Yet the PowerBook Duo 270c weighs just 4.3 pounds and fits easily into a briefcase. #1849068

DISK DRIVE DEPOT

CHRISTMAS GIVE-AWAY SPECIAL!!!

WIN THIS NEC CD-ROM

You could find this CD-ROM drive under your own Christmas tree and it won't cost you a cent! The Disk Drive Depot will be holding a drawing every Saturday for the next six weeks to present one of our customers with one of these beauties. It's so simple! Just fill out the entry below, drop it off at The Depot, and hope that you've been good this year. Good Luck!!

OFFICIAL CD-ROM GIVEAWAY DRAWING FORM

NAME _____
COMPANY _____
ADDRESS _____
CITY _____
STATE _____ ZIP _____
TELEPHONE (____) _____

Please drop this form off at The Disk Drive Depot. No duplications will be accepted. Must enter in person, need not be present to win. One NEC CDR-25 will be awarded for each drawing. DDD employees, their families and friends are ineligible. One winner per household.

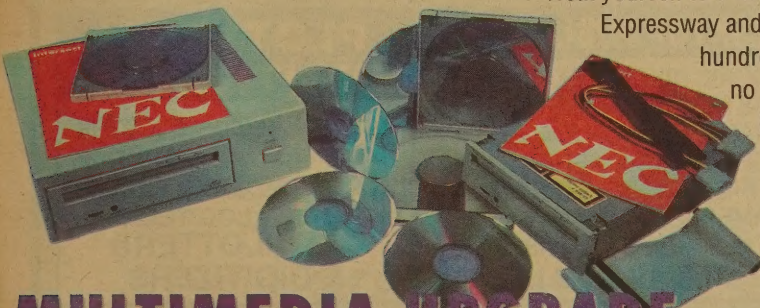

DRAWING HELD EVERY SATURDAY UNTIL CHRISTMAS

Enter as often as you like. Each entry must be dropped off in person, on a separate entry form. Stop by The Depot today to enter and check out our great values on every sort of drive.

HUNDREDS OF CD-ROM DRIVES

We have hundreds of CD-ROM drives for you to choose from. With our huge selection, you're sure to find the right CD-ROM for your specific application and budget. Whether it's multi-media, photo CD, multi-spin, internal or external, we have a drive for you at a price you can afford. We stock hundreds of SCSI CD-ROM drives with prices starting at only \$149! Isn't it time you had all the advantages of a CD-ROM drive on your system?

Treat yourself to a visit to our showroom at 500 Lawrence Expressway and check out the variety of drives and hundreds of CD titles we have. There is no better time than right now to save big with our bargain prices.

MULTIMEDIA UPGRADE

Add a brand new CD-ROM, Ad-Lib compatible sound card, and a pair of amplified speakers to your system for only \$295! Our complete upgrade kit includes everything you need for multimedia! Two CD-ROM titles are included for FREE! This plug and play assembly will open up the wide world of CDs for you tonight! Open the door to hundreds of interactive games, reference works, entertainment programs, and many more applications. Don't wait any longer! The future is here and it's on CD! Stop by the Disk Drive Depot today, pickup this great value of a kit, and be the master of your CD universe before the New Year!

TABLE OF CONTENTS**A NOTE FROM THE EDITORS**

It's that time again—here's our annual list of dealers and resellers who are eagerly awaiting the opportunity to help you with your computer-related needs. Whether it's the products themselves, or service, training, and support, a business near you has what you need.

Our city-by-city listings, beginning on page 12, provide a year-round reference for dealers in your area and the specialized services they offer. Starting on page 97, we also provide an index of vendor-authorized dealers, trainers, and VARs.

In keeping with our time-honored tradition, we bring you our annual rants and raves from our faithful contributors—the Writers' Soapbox Awards for 1993 begin on page 126.

And, from all of us at *MicroTimes*, best wishes for happy holidays and a fine and prosperous 1994!

—ME

1993 Writers' Soapbox Awards.....126

Once again, our writers have found much to love and much to hate about the industry in 1993, and say so in unabashed, opinionated, and often contradictory fashion. We hope you'll find their experiences illuminating, if only of the principle that mileage varies.

DUAL-TRACK TECHNICAL SESSIONS

MON.-WED., JAN. 17-19, 9 AM-5:30 PM

- Keynote: John Perry Barlow, co-founder of the Electronic Frontier Foundation
- Refereed paper presentations
- Invited Talks: overviews and tutorial-style commentary on topics of immediate relevance

FAST-PACED, PRACTICAL TUTORIALS

THURS. & FRI., JAN. 20 & 21, 9 AM-5 PM

**CHOOSE AMONG THE 19,
EXPERT-LED TUTORIALS EMPHASIZING
IMMEDIATELY USEFUL INFORMATION.**

- UNIX & UNIX Network Programming
- Windows NT Architecture; Developing Client-Server Applications with NT
- State-of-the-Art System Administration
- Sendmail Inside and Out
- UNIX Power Tools
- Threads, POSIX PThreads, OSF/DCE Threads
- CHORUS and SVR4 UNIX
- Porting to Solaris 2.x
- OSF's DCE
- Client-Server Development with DCE/RPC
- How Networks Work - A Detailed Look
- Tcl and Tk for GUI Programming
- Distributed Object Computing with CORBA
- Security in an Internet Environment
- Kerberos Network Security
- The Law and the Internet

PC REPAIRS & UPGRADES WELCOME!!!

CHRISTMAS SPECIAL GIFT! 486-66 MULTIMEDIA BUNDLE

Package Includes:

- 486-66 MHz IBM Motherboard
- 4 MB RAM-70ns
- Sony CD-ROM
- 245 MB Hard Drive
- 16-Bit Sound Card
- 1.2 or 1.44 MB Floppy Drive
- Mini-Tower Case
- 14" SVGA 1024x768 .28 Color Monitor Non-Interlaced
- SVGA Card w/1 MB
- IDE Controller (2S/1P/1G)
- 101 Keyboard
- Microphone/Software Bundle
- Pair of Speakers

It's a FAX. 
 It's a MODEM.
It's VOICE MAIL. 
 It's a RECORDER.
It's a DEAL.

NEVER BEFORE has a single board communicated in so many different ways. Yet, despite all its sophistication, the TyIN 2000 board is easy to install. And with its Windows user interface, it's even easier to use. With just one phone line, it automatically switches calls between fax, modem and voice mail. Plus, it's the first board to offer a built-in recorder, so now you can attach recorded messages to your documents—including the ones you plan to fax. And it even guarantees true background operation, without tying up your PC.

**Guide To
Northern California
Computer Dealers &
Service Providers**

Whether you're buying your company's first computer, pondering your upgrade path, or planning for a massive enterprise-wide network, finding a local source to fill your needs is often a challenge.

To help you meet this challenge, here's our annual guide, and whether it's multimedia in Milpitas, OS/2 in Oakland, Windows in Walnut Creek, or clones in Campbell, the merchants in these listings will offer the products and services you're looking for.

In addition to city-by-city listings, we also included a special section of vendor-authorized service providers, so that if you're looking for support, training, or general expertise with a particular product, you can choose a source with confidence.

ALAMEDA

EON Technologies

VESA SCSI-II Data Duster

AK47

ONLY
\$149!

READY TO SHIP

Dynamite DAT Drives

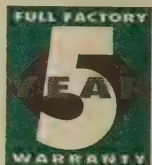

Store over 2000 megabytes on a DAT tape the size of a matchbook! DAT drives offer unbeatable performance and reliability. DAT tapes are super inexpensive and extremely rugged. For serious backup and data interchange, DAT is the only solution. Till now, the only problem has been the price! SCSI DAT drives typically cost \$1500 or more! CSC has purchased a quantity of Wangtec factory refurbished DATs at unheard of prices. These drives are guaranteed to meet or beat new drive specifications and are available at a fraction of the cost of a new drive. Use our 15-day money back satisfaction guarantee to try this drive on your system. You'll be amazed at the performance and convenience DAT has to offer.

Internal
\$495
Complete External
Unit \$550

Mainframe disk performance at PC prices! Until now, the performance bottleneck in most high end PC's has been the SCSI controller. Not now - CSC's fast VESA SCSI-II non-caching controller literally outruns almost any SCSI drive, blasting data onto the VESA bus. An on-board FLASH BIOS makes it easy to upgrade your controller as new features become available. Just call our BBS and download the latest SCSI codes - lifetime updates are free. Take advantage of the latest improvements in SCSI without switching to a new controller or changing chips!

Run up to seven SCSI devices including hard drives, CD-ROM, WORM, erasable optical, DAT and tape drives from a single board! Call today for more information!

SCSI POWER TOWER

CSC is now manufacturing the ultimate SCSI enclosure. Up to 8 half height SCSI hard, CD-ROM, optical, and tape drives can be configured to your specifications.

Whether you need a network storage subsystem, just an external SCSI drive case, or a full-blown disk array, CSC has it! We'll custom build it with the drives of your choice!

CALL (408) 734-DISK TODAY

Faster Than a Speeding Hard Drive! Up to ONE GIG, 35ms Tahiti-1 Optical Drive, Only \$1295!

These MaxOptix drives use erasable, removable media and perform just like a fast hard drive! Take advantage of this opportunity and order a fully-refurbished drive with a full CSC warranty. Kits are available which include a Megatower enclosure, FastCache controller with 1MB cache, 1GB disk and all the cables, ready to plug and play for \$1595!

Micropolis Monster

Files just keep getting bigger and bigger! How much space is free on your drive? Don't worry! Our prices on really big drives are getting lower and lower! CSC's special purchase offers you this **NEW, 1040MB SCSI-II Micropolis 1598-15 drive for only \$795!** With a 14.5ms access time and 1040MB formatted storage space this internal drive is perfect for those huge graphic files or networks. Call and order your drive today!

External enclosures are available. Quantity discounts. The supply is limited.

The Printer Works Introduces the SP-29000

This PostScript Laser Printer is Absolutely an Incredible Value!

Our price for this 6 ppm PostScript printer is about the same as the lowest priced 4 ppm printer without PostScript!

Only \$595
With Toner

The Printer Works has been bringing you the best deals on PostScript printers for years. (Remember our "PostScript for Peanuts" campaign that offered the JetScript-CX for only \$995 when most other 8ppm PostScript printers were priced at over \$2,000?) The new SP-29000 printer is our best deal ever! It costs less and offers even more—just look at all the important features you get for only \$595:

- ◆ PC and Macintosh compatible—the SP-29000 can connect to both simultaneously!
- ◆ High-speed, 32-bit AMD RISC processor for fast formatting of complex PostScript jobs
- ◆ Reliable 6 page per minute engine—the same model used in more expensive printers!
- ◆ MicroSoft TrueImage PostScript-compatible interpreter
- ◆ Great for all Windows and Macintosh applications
- ◆ 35 Scalable TrueType fonts
- ◆ AppleTalk, Centronics Parallel, and RS-232 Serial Interfaces

PostScript is essential for compatibility with professional desktop publishing and graphics applications. It's also easier to use for general business applications. If you've been shopping for a laser printer, you know that PostScript printers generally cost twice as much as non-PostScript printers. Our price for this PostScript printer is about the same as the lowest priced 4 ppm printers without PostScript. So don't risk being stuck without

Economy Toner Dial

Now it's easy to make your toner cartridge last longer, and still get good printouts! Simply turn down the print intensity dial while printing drafts, and turn it up again for the deep rich blacks you want on your final output!

High-Capacity Universal Paper Tray

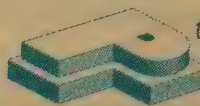

The SP-29000 lets you print letterhead and envelopes without having to stop and switch cumbersome paper trays! One tray does it all! The high-capacity universal paper tray is fully adjustable for up to 250 sheets of letter, legal, or executive size paper. It can also be used for up to 25 envelopes.

All-In-One Toner Cartridge

This high-capacity toner cartridge contains a long-life super drum and enough toner to print 8000 pages before refilling! (That's 2-3 times more than other printers!) The toner is the latest micro-fine variety which produces super rich black areas and very sharp fine lines. These cartridges are readily available in the market (and from us!)

PostScript when you can now get it for the same price! Like every product we sell, this printer is backed by our 1 Year Parts and Labor Warranty. Unlimited free technical support is available from the friendly experts in The Printer Works' technical support department. If you're not completely satisfied for any reason, you can return it for a full refund within 30 days. No hassle, no questions asked! Quantities are limited—order yours today!

PCI-What It Is...
(Peripheral Component Interconnect)

....And Three Good Reasons to Use It.

- PCI has the ability to maximize data transfer rates of 132MB/sec, which means that the system speed is 26 times faster than an ISA at 5MB/sec.
- PCI provides an elegant Hands-Off auto-configuration system. PCI peripherals configure themselves at boot up.
- PCI's Architecture features a buffer design allowing you to run multiple high-speed add-on cards (up to 5PCI) without overloading the CPU

MULTIMEDIA SYSTEMS

Expand your capabilities and extend the possibilities with the *EXCLUSIVE* line of multimedia systems from Bold Data.

Dressed in chic and elegant cases, they liven up your everyday computing with sound and video, in addition to text and graphics. And yet, they represent an unmatched value in the stretched budgets of the 90's.

Open up your PC gates to capture your favorite photographs and neatly organize them in an electronic album. Utilize this custom-built library to create your own new applications or simply dazzle your audience with a dynamic presentation. You may even step up to the thrills of the full-motion PC video editing or simply compute, scan, write, illustrate, work, play, learn or teach... on a whim!

So, come alive in the era of multimedia and enjoy the excitement of multidimensional computing with the *EXCLUSIVE* systems from Bold Data.

Boardless Scanner With Battery

New easy-to-install Desktop and Notebook PC Scanner

.....**ARTEC WalkScan/256S**

ARTEC[®]

Introducing the first two-in-one handheld scanner...

Use Artec WalkScan with your notebook and desktop PC. WalkScan... it's like two scanners for the price of one. WalkScan lets you scan text, graphs, artwork or business reports into your computer. Even the amateurs can enjoy the "Missing Line Compensation" feature to make up any distortion during the scanning process. Then print out a hard copy or use a fax/modem to transmit data anywhere.

It only takes five seconds to connect the adapter to the parallel port of your PC or notebook. And that's all you need to do, no cards, no effort and no hassles. Best of all, the WalkScan is fully self-sufficient to operate in any rigid environment without any external power supplies. Available from these fine resellers:

WE WON'T MATCH ANYBODY. WE'LL BEAT IT.

WITH THE BEST 486 PRICE/ PERFORMANCE—GUARANTEED.

When it comes to value in powerhouse PCs, nobody beats Shasta. Because for pure price/performance, we won't be undersold. Ever. Our line of 486 systems for corporate and home-office use covers the entire performance spectrum—from starters to screamers. They're loaded with features, and engineered to the highest standards, using only quality Elitetgroup motherboards. And they're available now at unbeatable price points. Only from Shasta.

READY TO SHIP—NOW.

The standard Shasta systems shown here are preconfigured and ready to ship. While our supplies last and if we have your system in stock, we'll ship it to you within one working day. We must receive your order by 1 p.m. Pacific time, with your valid check or credit card. If we promise you a shipping date and for some reason we can't meet it, we'll ship your order at our expense.

COVERED BY THE SHASTA PROTECTION PLAN.

Even at these rock-bottom prices, we still back each and every system we sell with the best package of no-risk guarantees on service and support:

- *Customer satisfaction:* 30-day money-back guarantee on all purchases.

- *Warranty:* 1-year on-site limited warranty.
- *Express replacement service:* For the first 30 days, we'll repair your computer within 48 hours of receiving it.
- *Free technical support:* We offer lifetime toll-free technical support for as long as you own your Shasta system.

FOR REAL VALUE, CALL TODAY.

No one beats Shasta for PC quality, delivery, service and price/performance. No one. We guarantee it. For a free consultation or to order, talk to one of our knowledgeable sales consultants today. They'll see that your standard system is shipped immediately, or help you design a custom PC to your exact specifications.

AFFORDABLE NETWORKING.

(AND YOU THOUGHT PARTING THE RED SEA WAS A MIRACLE)

MOSESDOCK!® THE UNIVERSAL DOCKING SOLUTION FOR IBM-COMPATIBLE NOTEBOOKS.

LESS THAN \$200

Just plug it in and a portable can share all the resources and peripherals of a desktop. And both computers remain fully operational. Share hard drives. Quickly and easily transfer files and applications without changing cables or copying floppies. Print share with one mouse click or keystroke. And more.

MOSES SWIFTLAN®
THE FIRST TRUE, HIGH-PERFORMANCE,
HIGH-SPEED, PORTABLE LINKING-NETWORK.

LESS THAN \$250

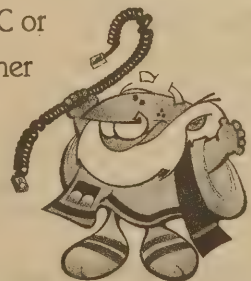

Until now there was a way to link a notebook to a IBM PC or compatible. But all it did was transfer files.

Now with just two parallel port connections, your notebook can share all the applications, capabilities and peripherals of a PC or

compatible. Share data files with another user. Back up your notebook with your desk-top's hard drive. Work on files simultaneously. Print share with one mouse click or keystroke.

And more.

Anytime. Anywhere.

Jemini Electronics

Store manager: Jay Kim

3448 De La Cruz Blvd.

Santa Clara, CA 95054

(408) 727-9986 Fax: (408) 727-7687

Areas of Specialty (and In-House Specialist): CAD workstations (Jay Kim); image processing (24-bit color) (Don); desktop publishing (Don)

Operating Systems Supported: MS-DOS, Windows, Windows NT, UNIX, OS/2

Top-Selling Brands in 1993: Exp 486 CAD workstation, Hewlett-Packard plotters, Matrox

Special Value-Added Services: Custom-built CAD workstation with customer-provided CAD software. Large selection of CAD hardware, graphics equipment. Customer actually can compare each CAD/Graphics equipment performance.

Media Value

Store manager: Bob McMahon

4251 Burton Dr.

Santa Clara, CA 95054

(800) 845-3472 Fax: (408) 727-3155

Areas of Specialty (and In-House Specialist): diskettes; ribbons; tape cartridges

Operating Systems Supported: MS-DOS, Windows, Windows NT, Macintosh, OS/2

Special Value-Added Services: Media Value specializes in the sale of bulk diskettes, tape cartridges, printer ribbons, diskette holders and other media supplies. Orders received via phone, fax and mail only.

Microlink Research Inc.

Store manager: Anthony Chan

3472 El Camino Real

Santa Clara, CA 95051

(408) 261-0628 Fax: (408) 261-0639

Areas of Specialty (and In-House Specialist): servicing any notebooks/computers (Richard Wang); networking (Anthony Chan)

Operating Systems Supported: MS-DOS, Windows, Windows NT, SCO, OS/2

Top-Selling Brands in 1993: NTC, Microlink, Cypress

Special Value-Added Services: We service all notebooks and computers, any brand, any speed, any problem.

MP Computer Micro Systems, Inc.

Store manager: Doug Werner

3004 Lawrence Expwy.

Santa Clara, CA 95051

(408) 481-9600 Fax: (408) 481-9604

Areas of Specialty (and In-House Specialist): Macintosh (Art Fallon); CPU (Art Fallon); Lapis/Rasterops/video (Doug Werner)

Operating Systems Supported: Macintosh

Top-Selling Brands in 1993: Lapis, Raster Ops, Apple

New River

Store manager: Christine Maliga

3070 Scott Blvd.

Santa Clara, CA 95054

(408) 980-0602 Fax: (408) 990-0604

Areas of Specialty (and In-House Specialist): dBase (Richard Tse); networks (Richard Tse)

Operating Systems Supported: MS-DOS, Windows, Windows NT, Novell

Top-Selling Brands in 1993: AMI, Micronics, Quickpath

Special Value-Added Services: Custom integration and networking. Government, corporate, and University POs welcome. One-year parts and labor warranty.

Sonic Computer

Store manager: Mo

3056-C Scott Blvd.

Santa Clara, CA 95054

(408) 727-4362 Fax: (408) 727-5528

Operating Systems Supported: MS-DOS, Windows

Top-Selling Brands in 1993: Maxtor HDD, Nice motherboard, Genoa motherboard

Special Value-Added Services: One-year parts and labor warranty, unlimited technical support phone calls.

Storage System Engineering Service

Store manager: Kenny Wong

3350 Scott Blvd., Bldg. 19, Ste. 1902

Santa Clara, CA 95054

(408) 727-6040 Fax: (408) 727-6042

Areas of Specialty (and In-House Specialist): DOS, UNIX, OS/2, Novell, Windows (James Chang); business application (Dede); Windows workgroup (Dede)

Operating Systems Supported: MS-DOS, Windows, Windows NT, UNIX, OS/2

Top-Selling Brands in 1993: Desktop 486DX systems, VGA Gas Plasma LCD, SVGA CRT color portables

Special Value-Added Services: We offer one-year parts and labor warranty, unlimited tech support.

We offer free software installation with purchase of select systems.

Symphony Computers

Store manager: Jeff Tran

3460 Edward Ave.

Santa Clara, CA 95054

(408) 980-8325 Fax: (408) 980-8327

Areas of Specialty (and In-House Specialist): DOS (Don); Windows (Pat)

Operating Systems Supported: MS-DOS

Top-Selling Brands in 1993: Infinity 2000 systems, Genoa, Panasonic

Special Value-Added Services: High-quality brand-name products, at the lowest prices.

Tanstaaf Manufacturing

Store manager: John Schwartz

2064 Walsh Ave., Ste. B

Santa Clara, CA 95050

(800) 776-5676 Fax: (408) 748-9431

The #1 Source For Network Solutions!

The Ultimate in Server Performance and Reliability !

A CPU is not a file server ! Too many people fall into the trap of buying the most CPU for the least amount of dollars when it comes to evaluating a file server. Is that extra few hundred dollars really going mean much when the server fails. When you think of servers, think of HP. HP servers are designed from the ground up as a file server with features you will find in no other computer.

The HP NetServer LM Series serves you like no other with superior performance and convenient single-view management capabilities. Backed with HP's renowned reliability and support, the HP NetServer LM Series is the safe bet for your high-performance network needs. The HP NetServer includes:

- Improved manageability with built-in features and HP NetServer Assistant software.
- Support for dual Pentium symmetric multiprocessing w/ optional ECC memory card to avoid memory errors.
- Eliminate down time due to drive failures through fault tolerant data storage with internal hot pluggable RAID disk array option w/ embedded RISC based twin channel FAST SCSI-2 adapter (Raid 0,1,5,6).
- High performance 32-bit EISA with Enhanced Master Burst doubling the speed of the 32-bit EISA bus.
- Up to 384 Mbytes RAM w/ high performance secondary cache.
- Easy expandability w/ 8 available mass storage shelves and I/O slots.
- World-class HP support services and 3-year on-site warranty with next business day response, 4 hours maximum response time on-site service upgrade available on business days, or 24 hours, 7 days a week.
- Tested and certified on Novell NetWare and other major networking operating system.

NetServer LE starting from \$2,646
 NetServer LM starting from ... \$4,320
 HP Ethertwist Hubs from \$390
 HP JetStore Tape Drives fr \$1,589
 HP LJ 4SI MX \$4,219

Hard to believe but true! Limited time only: HP LJ4SI.....\$2,900

The Best Value in Sub-Systems !

Network Innovations offer solutions ranging from RAID 0 to RAID 5. RAID 5 offers the highest reliability through distributed disk parity, improved performance as network complexity increases, and simultaneous connections of up to 4 host adapters and 28 devices. If a drive fails, data can be automatically rebuilt using parity information stored on the other drives.

We offer a variety of capacities w/ optional 4mm DAT tape drive & networkable CD-ROMs. Each drive is mounted in it's own external chassis. Simply add the a SCSI adapter to complete the configuration.

2GB, 3 1GB drives, 10ms	3,763
3GB, 4 1GB drives, 10ms	4,831
4GB, 3 2GB drives, 12ms	6,725
5GB, 6 1GB (2 host adapters req'd)	5,900
6GB, 4 2GB drives, 12ms	8,781
8GB, 5 2GB (2 host adapters req'd)	10,838
1GB Hot Spare Drive	1,069
2GB Hot Spare Drive	2,058
Exabyte 4-8GB DAT w/ NLM	1,456
MDI Networkable CDROM w/ NLM	237

NetWare 3.12 installed free when purchased w/ above configurations

SERVER BASED BACKUP

EXABYTE®

The Capacity to Succeed

Cheyenne ArcServe Windows v5.0 for NetWare is the next generation of the industry's leading server based backup software. Easy to use Windows interface combined with high performance using parallel streaming technology, Arcserve can backup you entire enterprise network with just 3 mouse clicks. Bundled with Exabytes' high performance 4mm DAT drive, we offer an entire backup solution for up to 8 GB starting at just over \$1,500. Bundles include Arcserve NLM, internal Exabyte DAT tape drive, SCSI host adapter, & cable. By using multiple tape drives, you can reach backup speeds of over 120 megabytes per minute by running several jobs at the same time.

NetWare 3.x or 4.x
 5/10/25 users \$1,571/1,813/2,230
 50/100/250 users \$2,426/2,507/2,888

SERVICES

- Complete Turn Key Solutions
- Complete System Integration
- Software & Hardware Training
- Consulting & Project Management
- On-site installation & Support
- Telephone / Remote support
- Professional Service Contracts

When you think of networking, think of Network Innovations !

Whether you are building a new network or expanding an existing network, call on us to provide you with the best in professional and technical services. We specialize in a wide range of networking services including:

- NETWORKABLE CDROMS
- RAID DISK ARRAYS
- DIAL-IN/DIAL-OUT COMM. SERVERS
- FAX SERVERS/GATEWAYS
- ENTERPRISE WIDE TAPE BACKUPS
- NETWORK PERFORMANCE EVALUATION
- PROBLEM ISOLATION/REPAIR
- EXPANSION DESIGN & PLANNING
- UPGRADES & CONVERSIONS

When designing your network, accept no compromise.

- **Don't compromise on service.** The foundation of our company is built on superior customer service. You should expect excellent service, it's a standard for us.
- **Don't compromise on technical expertise.** We are primarily a networking company. We provide a full range of services for all your networking needs. Our approach shows in our exceptional expertise of networks and networking solutions. And of course, we are Novell, Hewlett Packard, & SCO Authorized.
- **Don't compromise on value.** We only recommend solutions which will meet your needs. You can be assured that our networks will be the best value for your money.

NETWORKABLE CD-ROM

Micro Design International's SCSI Express offers seamless integration of multiple CD-ROMs to your Novell NetWare file servers. Disc appears as standard NetWare volumes resulting in superior performance through the use of NetWare's built-in features including caching, elevator seeking, and directory hashing. Compatible w/ ISO 9660 & High Sierra.

Internal CD-ROM w/ SCSI Express
 DOS & NOVELL.....\$237

External chassis w/ two 325ms seek time
 CDROM drives, SCSI cables, terminator,
 SCSI Express DOS & Novell\$715

Controller sold separately for above units

WHY WE DON'T LIST NETWARE

Anyone can advertise Novell Netware, not everyone can support it properly. As an authorized Novell Dealer, Network Innovations will not be undersold. We will match NetWare prices with any other legitimate Novell Authorized Dealer.

BAR CODE IS OUR SPECIALTY

INPUT AUTOMATION, INC.

The single source for all your bar code system needs: hardware, software, consulting and system design. Our philosophy is based on two principles: high-quality industrial products, and the best technical support available.

DESIGN AND CONSULTING

To create your optimal solution, an Input Automation consultant will design a complete system, and then recommend equipment that fills your exact needs.

We will not be satisfied until our bar code system meets your demanding standards.

EDITORS & BUSINESS BUYERS AGREE!

HD IS YOUR SOLUTIONS SUPERSTORE! BYTE'S JUNE 1993
BEST LOW COST CAD, WINDOWS, UNIX SYSTEM...THE HD VLB66

HD'S 486DX2/66 system won hands down for Best Low Cost CAD, WINDOWS and UNIX system. It beat out, Easterntech, Acma..... That's no surprise, considering it's solid performance, flexible expansion options and low price. Our high resolution 14" non interlaced display and Genoa Windows VGA card featuring the Cirrus Logic chip set means faster screen redraws and more efficient work for you. All this plus one year parts & lifetime labor, lifetime tech support and optional on-site service are just a few reasons why HD's 486DX2/66 is the system for the '90s and beyond!

The observant reader will

have noticed over the years that MicroTimes is far from monolithic in its viewpoint. One writer's garbage is another writer's gold—just like our readers, our contributors seem to have a wide range of experience with various products and services. We think it's important to reflect that range of opinion, taste, and hard-won lessons at Murphy's Law School.

Every year we invite our estimable authors to sound off about their past twelve months' experience. Every year we get a chaotic collection of responses, ranging from enthusiastic product endorsements to impassioned screeds on the indignities meted out by a misguided industry.

We hope you find this year's Soapbox entertaining and enlightening. You'll find distinct differences of opinion about specific products here, just as you will down at the user group. If, as is not unlikely, your experience of a particular product or service differs from one of our writers', please let us hear from you.

—Eds.

1993

Kathleen Creighton

I recently spent two days and multiple toll calls trying to log on to system ABC. See, ABC changed host machines, and some people got back online just fine, but not me. It took a little bit of fiddling with my (uncomplicated) account and I was finally able to get through.

Except that I couldn't read my email. I couldn't use "send," nor could I read Usenet. To add insult to injury, my telnet session froze every time I tried to enter a response. But that happened at 1:30 am, and there hadn't been any support staff in the ABC office since 5 pm. Why should there be? It's only a 7-day-week, 24-hour-day operation. Surely we can all conform and have our problems during business hours.

This complaint is with system ABC, but on any day of the week it can be any other service. There is no other industry I know of with such universally dreadful customer service. In fact, because customer service online is so bad, I don't even include my assessment of a service's customer service in my reviews. It wouldn't be fair. They are all equally terrible, and if I get good assistance one day, I can be assured of a horrible response the next, even from the same online service.

Now, I'm not without sympathy—customer service of any kind has to be a lousy job. I think about all the demands placed on customer service personnel, and I think sometimes their attitudes,

which range from lackadaisical to downright hostile, are justified. But like everyone else, I think customer service people should be nice to *me*. I don't usually start right off by yelling, even when the simple question I've asked is answered with a completely inappropriate response, such as the day I called XYZ service and asked for the person in charge of media accounts.

"Ma'am, this is XYZ service."

"I know that. I'd like to speak to the person in charge of media accounts."

"Ma'am, this is XYZ service."

"Please get me a supervisor."

Fortunately for me, the supervisor was able to speak without a script in front of her, and she immediately gave me the information I wanted.

I tried the online customer assistance on DEF service. It seems that a posting I had made had been deleted, along with some others that I had noticed. When I took it up with customer assistance, I was told that wasn't supposed to happen. There was no offer to check into the circumstances of the missing postings, or to pass the information along to someone else who would look into it. The response was simply, "That's not supposed to happen." I had already figured out the obvious. Later that day, the postings were restored with no explanation, and to this day I have no idea what happened.

Do I get any better assistance because I write about online services? Usually people don't know that I'm a writer, but even when they do, it doesn't make any difference. I had contacted an executive

Edition

MicroTimes Writers' Soapbox Awards

of JKL service for an interview and he asked me to set up an appointment with their PR person. She subsequently asked me for a list of times and dates I could call for a phone interview, which I provided. I never heard back from her. The sales department of another service dragged its feet for almost two months before getting information to me so I could log on, despite my persistent email to them. I finally had to enlist the aid of someone well known to them who also started an email campaign on my behalf.

There's one service that's famous for its inappropriate responses via email. Their email is regularly posted in public for the entertainment of all. One could write to them complaining about problems with a local access telephone number and receive a reply about hours of operation. In fact, when I had problems with their local node—the modem was not connecting—instead of someone offering to look into the problem, they asked me for a long list of information about the equipment I was using.

And now there's a whole new class of bad service—from Internet providers (IPs). It's amazing what people will put up with, simply because the technology seems so beyond what most users understand. IPs are also living on the good graces of a hobbyist mentality that doesn't demand good service, but that won't last long. Users are paying money for service—it's not free—and should demand it. If the IPs can't provide good customer service for what they're charging every month, they should raise their prices. Some of the

relatively inexpensive IPs, mostly one-person organizations, are quickly getting a reputation for not being reliable. The advantages of paying \$10/month for Internet access pale when the IP is offline for a week.

Many of us have at least as much money invested every month online as we have in our monthly cable bills. Yet while we typically view cable companies with scorn and demand far better service from our cable companies than we get, we let the online services off the hook when it comes to customer service. It's ironic when we can point to the cable industry as an example of service for which the online industry should strive. Perhaps that underscores just how bad the situation is.

There are individuals at all of the services who are pleasant and capable of providing the necessary support, and who might even go out of their way occasionally to help out. These individuals deserve praise and I salute them. But their employers need to understand the value of good customer service, and perhaps we as users ought to start demanding it.

Mary Eisenhart

Once again, I have kind words for the software staples of my existence, **MacWrite** (now out in the long-deferred Pro version) and **FileMaker Pro 2.0**, both from Claris, and **MicroPhone** from Software Ventures. They keep getting better (and, alas, bigger, but nothing's perfect and disk prices do keep falling). **MacInTax**, while not a part of my daily life, does make the inevitable day of reckoning with the IRS a lot less painful. And

Aladdin's StuffIt Deluxe 3.0 has become indispensable for compressing and decompressing large files in a variety of Mac, PC, and other formats.

On the slightly sillier side, I retain a great fondness for Brøderbund's **Kid Pix** and **Kid Pix Companion**, which set an impressive standard for making it easy to have good creative fun with your computer, whether you're a kid or an adult.

In a similar vein, Berkeley Systems keeps adding to its collection of cool screen savers. This year, the **Disney** version of **After Dark** proved a worthy successor to last year's **Star Trek** version, though it will probably be a matter of personal preference whether you want your computer taken over by Spock or Uncle Scrooge.

Another benefit of **After Dark** is the enthusiasm with which third-party designers create plug-in modules for it. My favorite this year is **Patchwork** (\$20 from MetaTheory, (510)540-0822, MetaTheory@aol.com), which has various configuration options and draws patchwork-quilt patterns on your screen (and prints screen dumps of the ones you like for future reference).

And now for the **1993 This Is Progress? Award**.

Longtime readers will recall that I used to be quite fond of **KanjiTalk 6.0.4** from Apple. Ever since the **PowerBook 170** came into my life a couple of years ago, I haven't been able to run **KanjiTalk**—which was, indeed, overkill for someone in the process of constantly forgetting the most basic kana, but which did in fact let me put Japanese text in **MacWrite** pretty easily. (It

MicroTimes Writers' Soapbox Awards

should be duly noted that my ability to do this was a bit serendipitous—MacWrite II happened to support this feature, but the text created this way would revert to garbage in, say, US PageMaker.)

KanjiTalk is, of course, now out in a System 7 version, though you'll probably have to find a VAR or distributor specializing in such products to actually buy a copy. What Apple's touting as a better solution for those of us using English-language Macs is the **Japanese Language Kit**, available for \$249 from the Apple Catalog (1-800-795-1000).

The Language Kit, which arrives on over a dozen HD floppies, contains a whole lot of Japanese fonts and System enhancements to make them work. It requires around 20MB of disk space, but is undoubtedly more elegant and user-friendly than Old KT—the bilingual documentation alone is a godsend.

Unfortunately, for what I want, the Language Kit doesn't exactly work. The Apple catalog gushes: "Marvelous tools for the rapidly evolving global economy, Apple Language Kits come with the software, fonts, and instructions you need to easily add foreign languages and characters to your documents. Language Kits let you create everything from bilingual promotional materials to presentations and reports containing non-English characters. You can easily insert Japanese or Chinese text—either alone or blended with English—in letters, presentations, spreadsheets, or other documents."

This sounds real keen. This sounds, in fact, like a rather more elegant and system-wide implementation of what I could do with KanjiTalk 6.0.4—i.e. open my English MacWrite II, change to Japanese input, and enter Japanese text into my English MacWrite document.

Would that this were so. What all the promotional hooah fails to mention—this is the subject of a recent very cranky letter to *Mangajin*, the Japanese language-learning magazine—is that in order for this wonderful capability to kick in, you essentially have to be running the Japanese-language versions of your apps. (The Apple ads promoting JLK are more explicit on this point.) The exception seems to be that if your application supports Apple's WorldScript, you can do what I want to do, but otherwise, what you get in your English-language app (including MacWrite Pro, to the best of my ability to figure this out) is gobbledegook, even if your Japanese-input screen is behaving properly.

The Kit does include Japanese TeachText, which lets you type Japanese and actually get it on-screen. But, being TeachText, it doesn't support such niceties as boldface....

While this is undoubtedly a boon to smart

Japanese shoppers who buy their Macs in the US and then need to run the Japanese apps back home in Tokyo, it's not doing a thing for me (or, apparently, for the deeply annoyed *Mangajin* reader whose expectations had corresponded to mine and who had blithely spent his hard-earned bucks for the product).

Initial reports suggest that with rare exceptions, application developers are more interested in selling localized versions than in incorporating WorldScript so you can use all languages in your local product. (Nisus appears to be one of the relatively few word processors that do this, for instance.) Not, of course, that you can walk into your local software emporium (or even the Apple Catalog) and get non-English versions of the software.

I look forward to a barrage of mail telling me the error of my ways. I particularly look forward to the one that goes, "You bozo, if you'd only check this box in the Preferences you can MacWrite all the Kanji your heart desires." I hope it's coming, but so far everything I've read suggests I can't get there from here.

Meanwhile, Power Japanese, the best language-learning software I've seen yet, still hasn't been ported to Mac. While it's arguably worth buying a Windows system for, I'm not prepared to take such a step for one application. Maybe I'll be able to run it with a Houdini board. Maybe I'll have to wait for PowerPC.

Ed Kahn

This year has produced a number of memorable products on the hardware side. Amazingly, three of the products I rate as significant introductions come from Hewlett-Packard. They seem to be in touch with what users want.

1. **Hewlett-Packard's OmniBook 300** sub-notebook computer, designed to run under Windows. This machine is as small as you can get and yet preserve a keyboard that is useful for serious word processing. In addition, you get a bunch of other applications, all from Microsoft, with whom HP developed this machine. The one drawback is that if you intend to do serious work with Excel, the built-in spreadsheet, you will need to increase RAM to 4MB. This machine is a real jewel, but carries a price tag of nearly \$2000.

2. **Hewlett-Packard's 100LX**. For the last two years, I have included the predecessors of this palmtop on my list. This new incarnation looks just like the older model, but offers more power, speed, and a conventional display that lets you run applications out of the box. The one serious fault I find is the address book module that will not conveniently let you import your old lists.

3. **Hewlett-Packard** scores again with its first

laser printer aimed squarely at the home and small office market. The **LaserJet4L**, priced at not much more than a DeskJet would have cost last year, is the printer for those who want a laser printer and don't need volume output.

4. **Canon** scores big with the introduction of its **NoteJet**, the first laptop computer with a built-in bubble jet printer. This unit costs no more than what a comparable computer and printer would cost and offers a good deal more convenience. It beats any other combination I have seen.

5. **Cyrix** has come to the aid of 386 users who want to upgrade to a 486 without replacing their motherboard. Their **Cx486DRx²** is a simple chip replacement. You take out your 386 chip with the tool provided and plug in the Cyrix chip, install simple software, and you're in business. This all took me less than fifteen minutes. The upgrade is only available for 386s running at 16, 20, and 25MHz. The bonus is that not only does it convert your system to a 486, but it also doubles its speed. List prices range from \$249 to \$399 depending upon the speed of your system. Phone 1-800-462-9749 for dealers, or to order.

Software milestones were a lot harder for me to find this year than any year in the past. While there were a zillion new products, none seemed to be of great significance to a large market. Perhaps we have reached a plateau. In any case, I found two products worthy of mention, beyond the numerous upgrades I routinely use to replace older releases of favorite software.

1. The first product that needs mention is a warning rather than a recommendation. **Microsoft DOS 6.0**, while containing a few nice features, has a couple of potentially troubling options. Both **Doublespace**, the option that lets you double the capacity of your hard drive, and **MemMaker**, the option that lets you fine tune your system to maximize your memory, present many problems that Microsoft fails to mention. If you upgrade, it is advisable to use these features with great caution and a full backup. It is nearly impossible to back out of **Doublespace** once it is installed.

2. It is a pleasure to bring **YourWay** to your attention. While it's billed as a scheduler for people using Windows, I find its greatest asset as a phone manager that keeps your address book in order and dials your calls for you. It also lets you insert addresses from your address file into documents like letters you are writing. I have grown to love the product and several of the complaints I found in the older version seem to have been corrected in v4.0, just released. **Prisma Software** 1-800-437-2685. \$69.

MicroTimes Writers' Soapbox Awards

Woody Liswood

There's been lots of great stuff this year, but I've had it with upgrades that aren't and programs that just don't work. So, let me let off some steam about some turkeys, both software and hardware, and then I'll get to what I like, and why.

Turkeys of 1993

The turkeys start with the **Crosstalk for Windows upgrade**. DCA managed to take what I thought was one of the best communications programs and ruin it. They made a simple, intuitive, friendly interface into one with absurd complications. Besides, after the upgrade, it wouldn't even work properly with my modems.

Also in the disaster upgrade category was **PackRat**. I've used this program for a number of years and considered it to be the best of the PIMs (Personal Information Managers). The upgrade trashed the old PackRat files, so I lost everything. I reloaded from my backup tapes. It did not trash them this time, but crashed almost every ten or so mouse clicks. Off the disk, says I. They never even sent a bug fix, so I finally dumped it completely and switched to Lotus Organizer.

Another turkey was **Doubletools** from Addstor. Now Addstor makes SuperStor, which is a very capable disk compression software. When Doublespace came out with DOS 6, Addstor published Doubletools, an interesting replacement. The only problem, at least on my two computers, was that it did not want to work with QEMM 7, which is my memory manager of choice. They told me they liked Memory Commander better, so I tried Doubletools with Memory Commander, after which it could not use my CD-ROM. So, back to QEMM, and I got Doubletools to work with QEMM, but it still disabled MSCDEX, the Microsoft CD-ROM extensions. After three or four *long* long-distance calls, at my expense, to their tech support folks, they said that "their engineers are looking into the problem." I still haven't heard.

Last on my turkey list was an **80MHz 486 motherboard from Destiny computers**—its claim to fame was that it was "Manufactured by IBM." Now this motherboard shows up, with an SX chip. Eighty megahertz and no math coprocessor—and it is designed for Windows and graphic intensive applications? Well, it has all the ports on board, so I thought I'd give it a whirl. It had a PS/2 mouse port, but did not come with a mouseport cable, and they use a special pinout of only five pins of a ten-pin connector, so nothing worked. They want additional money to get the cable for the mouseport.

I also added a 33MHz math coprocessor, just to

give it a chance. When run, it tested out at the same speed as a 50MHz DX chip. What a waste. Now, this clock-doubled CPU chip also has a heat sink glued onto it and a fan glued on top of that. It will probably keep my office heated all winter.

So I complained to them about the speed. I was going to send the board back, but one of their technoids went over the jumpers with me (the documentation had no picture of the motherboard, just pin out lists) and told me that they had sent me a board which was set to 50MHz—just like I tested. So I jumpered it to 80, stuck it in the computer—and Windows locked up unexpectedly at any time.

Took it out. Sent it back.

Last year I said that **WordPerfect** (the word processor) was so broken it couldn't be fixed. Last week I got their new version. I've tried it for about thirty minutes so far, and I still really can't stand it, but it does work better than their earlier versions. As both WordPerfect and Word for Windows copy the really great features from AmiPro, maybe they will both have a chance of surviving.

Good Stuff

I still think that **AmiPro** is the best word processor on the market. At v3.1, it runs rings around any of the competition. **Lotus 1-2-3 for Windows**, release 4, has won my first-place vote as the best of the spreadsheets around.

Lotus now bundles Freelance Graphics, AmiPro, Lotus 1-2-3, Approach, and Lotus Organizer into a single Smart Suite bundle. I think this is one of the best deals around, although Approach still hasn't matched the excellence of the rest of the SmartSuite.

If I had to recommend a single product as the best of 1993, it would be **Lotus SmartSuite**.

One product I can't live without, and neither should you, is called **Clickbook**. This is a Windows printer driver which will turn your laser printer into a booklet printer. It takes your documents and does front and back printing, puts two or more pages on the printed page, and generally lets you do amazing things with your printer. I've used it with AmiPro to produce a 70-page employee handbook on just a few pages, ready to take to the printer to print and bind. I saved all the labor costs of printing each page separately, having the printer photograph and reduce them so that I was getting two pages per letter-size paper, then print them front to back. Clickbook did all the page arranging and printing for me so that the printer only had to make plates and print. In PerFormPro, I had designed a 4-page performance appraisal form. Clickbook printed the entire form on a single letter-size paper. I folded it, and handed it out for use.

CD-ROMs have exploded into my life. Some of

the best, in my opinion, are the Microsoft CDs—I particularly like their **Dinosaurs** and **Encarta CD-ROMs**. I'm fascinated by the **Cinemania'94 CD-ROM**, which has movie clips and information from all my favorite movies. Lastly, Microsoft's **Stravinsky** and **Mozart CD-ROMs** should be in your collection just to listen to the music and gain a greater understanding of these classic artists.

Loom is still my favorite CD-ROM-based game. **PhoneDisc USA—Business** and **Home** are far and away the best USA databases available.

Windows-based screen savers have made my office into a fun place to be. While I can't live without the **Star Trek** screen saver from **Berkeley Systems**, I recently put their **Disney** product onto the computer. It happens to come with some MIDI files. Now, mermaids sing and swim across my screen. I just love it.

Along with this, I like the **SoundBlaster** and the **Sound Galaxy** boards for adding 16-bit sound to your system.

MS-DOS 6.0 has to be on my hits list. It now integrates a wide variety of products into the basic DOS services. Contrary to what I've read in the press, I have never had a problem with Doublespace, and appreciate the extra space it gives me on my disk.

Along with this, **Space Manager** from Vertisoft, the folks who sold Doublespace to Microsoft, adds some useful functions to Doublespace, the best of which is an even better compression ratio and more space that I get from Microsoft.

Memory is really important to me, and **QEMM 7** and **Memory Commander** both stand out as excellent methods to gain as much low-end memory as possible. Memory Commander is much easier to use than QEMM and actually gives me somewhat more memory, but I find that on the machine I run DOS programs under Windows, I like QEMM better since I have some problems with Memory Commander in that type of environment.

Games have gotten interesting again, especially as they are now coming out under Windows. I really like **The Casebooks of Ace Harding**, **Shadowgate**, and **Uninvited**, all from ICOM. I still haven't got ahead of my 14-year-old son in Shadowgate, but I'm trying.

A wild CD-ROM-based Windows product from something called Software Marketing Corporation is **UFO**. This CD-ROM claims to be "This Planet's Most Complete Guide to Close Encounters" and attempts to prove to you that UFOs exist. All twelve hundred sightings contained on this CD-ROM have been "Meticulously examined by respected authorities in the field of UFO-logy." If you are looking for that perfect present for the multimedia aficionado who has everything, this is probably it.

Stereo, from Animation, puts a full sound studio

MicroTimes Writers' Soapbox Awards

into your multimedia computer and gives you complete control of almost everything associated with multimedia. You will really like the MIDI and CD-ROM stereo players, and the mixer is better than anything else I've tried.

Delrina's WinFaxPro still has my endorsement as the best of the Windows fax software products, and the massive collection of cartoon fax cover sheets makes this program fun to use, as you attempt to use the most appropriate cover sheet for your message. Along with this, PerForm Pro Plus, also from Delrina, gets my vote as the best of the Windows Form Designer and Database software managers.

Many folks attempt to replace the Windows File and Program Manager with something else. I'm partial to Central Point PC Tools for Windows. It has a variety of Windows utility programs and comes with Central Point Backup (my vote for the best Windows Backup program). I still don't let it replace the Program Manager, though, since I like the way it works.

I recommend the Fargo Primera wax transfer color printer to anyone who needs color under Windows. With its low street price, it is still a best buy in my book.

I've always been a fan of Avery Label Pro. I've recently tested their Windows Label Pro and still think that this is the best label product available. I also like their Personal Label Printer, and think that this is one of the most labor-saving devices you can attach to your computer.

If you need great clip art, and really great ease of use for graphics programs, I'd still go with Arts & Letters. While I like Freelance Graphics for quick business graphics, I think that Arts & Letters wins everything else, hands down. I couldn't live without it.

I am considering switching my recommendation for communications programs to Powerline from the folks at Enable. I've only used a beta version, but it does what you need in a nice and organized way. It doesn't have enough buttons across the bottom of the screen, but you can easily manipulate and modify their pulldown menus to add any command you would wish or macro you might send. It still chokes on uploading ASCH text; when they get this fixed, in their release version, I'll recommend it.

WinSense, which lets you customize your Windows environment for all possible contingencies, still has my recommendation as a program every Windows user should not live without.

And, my last recommendation: Windows Uninstaller from MicroHelp should also be a required product for any Windows user. This nifty

MicroTimes Writers' Soapbox Awards

goodie helps you uninstall the godawful number of files which most Windows programs scatter all around when they grab your computer. While many programs now come with their own uninstall routines, there are still enough arrogant programs out there which assume you'll never get rid of them and fail to provide that help.

David Morgenstern

What a great privilege it is for me to write under the BMUG banner. The helping and giving that flows daily from our staff and volunteers is the embodiment of the spirit of computing. Computers are not just machines. They are the synergistic combination of silicon and biological memories, only coming to life when we turn on the machine and connect with the data. BMUG believes computers can be a force for positive change, and we need the support of members and the developer community to keep up our good work.

I thank *MicroTimes*, Mary Eisenhart, and especially, all the readers who have supported the BMUG column. May you and your data remain safe and healthy in the coming year.

Here are my picks for hardware and software honors. I guarantee that you will find them slightly unusual! They are practical items, that will help keep you computing and productive. Many are not the sexiest choices, but if that's your requirement you'll do better with a Victoria's Secret catalog.

I've also stayed away from any recommendations of particular Macintosh models. This is the best time in history to buy a Macintosh. Don't believe there are too many choices or models to choose from. You will score big with almost anything you buy, especially models with the 68040 processor. Buy more computer than you think you need and you'll do just fine.

David's Top Five Hardware Products

- **Berkeley Data Access SCSI Cables.** If you've spent thousands of dollars for a hard drive bigger than the Grand Canyon, you don't want a crummy two-buck cable to bus your precious data. Steve at B.D.A. can talk SCSI cables all day, and his are the best! This is a small, wholesale kind of operation, so you have to order cables a couple at a time; four at a time will get you the best price break. Berkeley Data Access, 2560 Bancroft Way, #3, Berkeley, CA 94704. (510)644-2396.
- **Modem or CD-ROM drive.** Take your pick. Modems will not speed up or improve the operation of your Macintosh. They do not of

MICRO TELE BUYERS GUIDE

MicroTimes Writers' Soapbox Awards

continued from page 134

themselves give you any output, or product that you can touch with your hands. Instead, a modem moves you out from your solitary relationship with your computer desktop, and into the entire world's computing space. You've got to be there with us!

There's an alphabet soup's worth of different protocols that can confuse the new user, but there's nothing to worry about. It's worth the extra money to buy a fast modem that supports the V.32bis protocol, even though it requires a special "hardware handshake" cable (most stores bundle everything together for you). The model with the most favorable mentions in BMUG meetings right now is the U.S. Robotics Sportster 14.4 modem.

CD-ROMs are getting to be essential equipment. There's lots of good information, and really interesting games. Let's get our priorities straight, right? BMUG likes the Apple CD 300 drive, which is a good double-spin drive. It comes with a handful of discs, too.

• **Panamax Surge Protectors.** If these are not the best surge protectors in the world, they are the next best thing. Panamax protectors are not cheap, but they'll keep your even more expensive computer equipment from the vagaries of the power grid. They also have flavors for your home entertainment system or copier. If your system is damaged by a surge while properly connected with their protector, they will pay for any and all repairs. Panamax, 150 Mitchell Blvd., San Rafael, CA 94903-2057. 1-800-472-5555; fax (415)472-5540.

• **Q-Safety Earthquake Safety Fastening Products** are an exceptional set of simple devices to hold your computer, electronic equipment, or anything else down during an earthquake. There are fasteners for cabinets, water coolers—everything! The braces are various types of molded nylon automobile industry Velcro fasteners. Q-Safety, 2341 East Foothill Blvd., Pasadena, CA 91107. (818)449-1590; fax (818)449-6866.

• **The Tao of AppleScript** was the first book on the market about AppleScript. Perhaps you're interested in finding out how BMUG was able to automate the layout of our disk catalog—taking information on the thousands of programs in the BMUG shareware library, stored in almost two dozen FileMaker Pro databases, and pass it on to PageMaker for formatting and correct positioning. Our script chugged on for ten days and nights (sounds almost biblical, doesn't it?), but saved months of human work. Sound like something you could use? You bet!

It includes a high-density disk containing Apple's official AppleScript software, as well as scripting utilities and additions written specifically for the book. The book weighs in just shy of 300 pages and is published by

MicroTimes Writers' Soapbox Awards

Hayden Books. It's only \$20 when ordered from the BMUG office. (510)549-2684; fax (510)849-9026.

David's Top Five Software Products

- **The BMUG tie-dyed T-shirt.** I know, it's a soft-wear product—so sue me! This beautiful, bright rainbow shirt, with "BMUG" on the front, and "The BMUG T-Shirt, tie-dyed in Berkeley by Deadheads" on the back, is a winner in any crowd—hard rock and hardware. Only \$15.

- **ClarisWorks.** Did you forget to add in software when you were budgeting your Macintosh purchase? It's not an uncommon occurrence. If you can spring for just one program, take a look at ClarisWorks. It has plenty of features, and has a great user interface. It really works beautifully together, as it was designed to—shocking behavior in a piece of software!

- **Creating a Healthy Work Environment.** Some bosses still don't believe that computer use can cause health problems. If you can get them to read it, Apple has put out a little 12-page pamphlet that runs through basic repetitive-stress, eye fatigue, and hardware setup health issues. It even mentions laser printer ozone pollution. It's a good place to start a health and safety discussion. Apple Computer Inc., 20525 Mariani Ave., Cupertino, CA 95014. (408)996-1010.

- **EndNote Plus.** More people than ever before are going back to school. Keeping track of information for the various term papers you have due is always a problem. EndNote Plus, a powerful database that knows all about bibliographic references and styles, almost makes writing a term paper fun. It automatically generates a correctly formatted bibliography and footnotes for your paper. Niles and Associates, 2000 Hearst St., Berkeley, CA 94709. (510)649-8176, fax: (510)649-8179.

- **Think for Yourself CD-ROM.** This is a CD-ROM collection of statistics from United Nations, World Health Organization, and other American governmental sources, with an easy-to-use Discovery data analysis program. The information includes data on AIDS, the environment, health, and American demographics. The Discovery application "understands" the information of the data sets, and lets even young kids analyze and solve problems. It has a list price of \$249, and an academic discount of \$149. PEMD Education Group, P.O. Box 39, 35000 Highway 128, Cloverdale, CA 95425. (707)894-3668; fax (707)894-5200.

Robert Moskowitz

Expanding The Definition Of Telecommuting

As of this moment, I'm expanding the definition of telecommuting. Single-handedly. Unilaterally. On my own.

Until now, almost everyone who is anyone in the world of telecommuting considered it to be the act of working from home (or from a telecommuting center) while meeting requirements and fulfilling responsibilities that derived from your Full-Time Job.

That's an antiquated and artificial distinction, akin to defining medicine as the process and skills taught in medical schools, rather than one of many healing arts. It's like saying that only the police are concerned with fighting crime, rather than it being every citizen's responsibility. It's as dumb as thinking that politics is only what happens in legislatures and capitals, rather than the normal interaction between people who have differing agendas, incomplete power, and varying abilities to persuade or impose their ideas on others. It's as out of step with reality as those MIS experts of a few years ago who told us that personal computers weren't real computers, and the work we did with them wasn't as important as the work those mainframes were chunking out.

Here's the new definition: Telecommuting is the process of working in, experiencing, or thinking about a physical or human environment that happens to be at a distance from where you are at the moment.

The employee with the full-time job who works at home one day a week has the same problems, opportunities, and challenges as the consultant who's answering a client's questions by telephone. They're the same as for the home-based entrepreneur who's dealing with subcontractors, the PTA chairperson who's feeding the baby while telephoning volunteers about organizing a fundraiser, the teenager who's on the phone for hours with the very person he just spent a whole day with at school, or the lover who's sitting silently, yet squeezing his or her whole personality through those two little copper telephone lines to the loved one miles away.

It's cruel and unusual punishment to say that unless you have a full-time job, you simply aren't part of the telecommuting revolution, that you're not "pushing the envelope," that you don't count. Experts are prognosticating that full-time employment is following a downward spiral as companies use part-timers, temps, job-sharing, and, yes, telecommuting to meet their productivity requirements for tomorrow's fast-paced, fast-changing economy. If you insist on making "full-time employment" part of the definition of telecommuters, you're ultimately going to define telecommuters out of existence.

So here's to telecommuting (my definition)—an integral part of twentieth century life, a process virtually all of us understand, a skill virtually all of us have mastered, and an experience virtually all of us will continue to count as a real and vital part

of normal, everyday life—regardless of what you experts try to tell us.

Douglas J. Nakakihara

With the dust finally settling from the most abysmal year ever seen by the computer industry, the best you can say for Commodore Business Machines, Inc. is "the body's still warm."

Cutthroat pricing and a global recession left few companies in the entire industry, including IBM and Apple, unscathed. However, I am confident that Commodore has taken the proper and necessary steps to wait out the storm.

Commodore has downsized US operations to a skeletal crew, but has reportedly kept its core R&D personnel. Warranty repairs are now being handled by a third party, and the product supply pipeline has been streamlined. Plans are being made to move from the now-too-big headquarters in West Chester, PA.

Former president Jim Dionne is gone and the company has pinned a lot of hopes on the new Amiga CD32 game console. With demand in Europe exceeding the twenty thousand CD32 units being produced each week, it would appear that Commodore may have a hit on its hands, if sales continue at this pace.

Success will be a lot harder to achieve in the US, when CD32 is formally introduced here in January. Technologically speaking, CD32 is far superior to its only real shipping competitor, Sega CD, and is priced about the same. Philips' CD-I is much more expensive and isn't targeted directly at the game console market. Fortunately for all concerned, Nintendo will not have a CD peripheral in the immediate future. CD32 just may have a chance to establish itself before the more powerful 3DO and Atari Jaguar start shipping, but Commodore will have to get on the ball and devote some real dollars to make it fly.

VideoCD, a new cross-platform format that can hold seventy-four minutes of video and audio on a disc the size of a standard CD, could also play a big role in CD32's success. VideoCD has some big names behind it, which should guarantee software availability. I hope Commodore can ship the announced MPEG adapter by the time VideoCDs become available, supposedly by the time you read this.

Additionally, if Commodore can get a Kodak PhotoCD licensing agreement worked out, this should also fuel demand for CD32. QuickTime movies may be supported as well on CD32. Essentially, the more cross-platform software that CD32 can support, the better its chances for surviving and prospering in the US market.

The high-end Amiga has drifted away from

MicroTimes Writers' Soapbox Awards

being a general purpose computer and is now focused nearly exclusively on video graphics. Sure, the Amiga is more than capable of running productivity software like word processors and spreadsheets, but the major developers have justifiably ignored the tiny Amiga market.

If the Amiga can take a sizable piece of the computer video graphics market, it can survive as a platform. There are still some excellent business productivity titles available for the Amiga; however, if you need serious stuff, you can't beat Windows on a cheap PC clone.

Doug's Best of 1993

New Tek's Video Toaster 4000

The savior for the Amiga is without question New Tek's Video Toaster 4000, without which the Amiga would be truly dead. This new version is more powerful and cheaper than the original! Major productions like *Jurassic Park*, *seaQuest DSV*, *Quantum Leap*, and *Babylon 5* have proven that the Video Toaster-Amiga combo is a useful professional computer graphics tool. Furthermore, cable companies, videographers, and the like have found the Video Toaster's video switching capabilities a godsend.

MacroSystemUS's VLab

VLab provides the most economical way to grab full-resolution and color video frames at 30 frames per second. The tradeoff is time, since it doesn't do it in real time. Still, this is a ground-breaking product and a real joy to use.

SunRize Industries' AD516

Essentially the "Audio Toaster." Eight-channel direct-to-disk 16-bit recording and playback. The new time-line cue list is nothing short of incredible.

Digital Processing Systems Inc.'s Personal Animation Recorder

This device turns your Amiga into a single-frame-recording deck without the hassles and drawbacks of its tape counterpart.

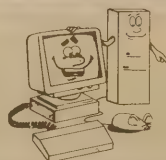

IVS's MovieMaker

The most economical way to edit and show Amiga animations at 30 frames per second with 16-bit stereo sound. Use it with DCTV and you will have some pretty impressive output which can go direct to video tape. JPEG add-on hardware is supposedly in the works.

Great Valley Products' ImageFX

This is the kitchen sink image processing package. ImageFX includes, in addition to its powerful

MicroTimes Writers' Soapbox Awards

image processing capability, complete painting tools and a morphing program. It also directly supports many 24-bit graphics cards. A very mature product for an initial release.

24-bit Graphic Cards

1993 saw the release of a plethora of 24-bit graphics cards, including Retina, Picasso II, EGS-28/24 Spectrum, Merlin, and Piccolo. All offering at least super VGA level resolution and colors, the Amiga is no longer behind in this area. However, until Commodore adopts a retargetable graphics (RTG) standard, each card will continue to integrate differently into the OS. This results in various levels of program compatibility. The RTG standard is supposed to be set sometime in 1994, coinciding with the release of the next-generation Amiga.

Michael Robin

The ending of one year and beginning of a new one gives me an excuse to sort through (and clear away) all of the accumulated press releases, new product announcements, and review copies of software piled around my desk. It is also a chance to step back from the constant barrage of industry information and reflect upon the year.

Software

The first place to look is software—the tools that make my computer useful. The core group of applications that I regularly use are Microsoft Word 5.1, FileMaker Pro, and MicroPhone II.

Although I prefer these three apps over their competition, I would not go into shock if I had to switch tomorrow. However, there are three utilities—Word Wrapper, Retrieve It!, and StuffIt Deluxe—that I would sorely miss if they were taken away.

Word Wrapper (Open Designs, 415/929-1425), which we've talked about in previous issues and writers' soapboxes, is a small desk accessory (DA) that strips away carriage returns from text (ASCII) documents. This is definitely a time- and life-saver when working with text received over electronic networks.

StuffIt is one of the main com-pression-/decompression tools for the Mac. **Deluxe v3.0** offers more features, giving you greater power and options. I probably don't use even half of its functionality, but when someone sends me a BinHex, UUEncode, Zip, or almost any other type of compressed document, StuffIt Deluxe usually lets me turn it back into a person-readable document. Version 3.0 also makes it even easier to make self-extracting files.

Last year I mentioned **Retrieve It!** from MVP

Software. This text retrieval desk accessory finds files, and text within files, quickly and easily. This year **Retrieve It!** was reintroduced as one of the first products from Claris Clear Choice. (Claris Clear Choice is a line of "personal productivity software created by independent software developers.") Aside from redesigning the package, **Retrieve It!** logo icon, and the manual, Claris did not change things very much. In addition to an easy-to-use interface, **Retrieve It!** provides a range of search capabilities, from a single word or a phrase to complex operations such as "within 25 characters of" or a date delimited Boolean search. It will also do this in the background and let you peek at the documents it finds from within **Retrieve It!**

Hardware

The computer industry continues to experience constant changes in hardware technology. This year witnessed the continued proliferation of 486-based PCs, color notebook computers, new subnotebook computers, new low-cost workstations, and an array of 040-based Macintosh models.

The offerings from Apple changed names and configurations so quickly it was difficult to know what was new and what was old. As part of the most recent product reorganization, for example, the short-lived **Centris** line became members of the **Quadra** family, but by any name they are excellent 040 Macintosh computers.

I will admit, however, to being more confused than usual by the current offerings from Apple. On paper it seems logical to separate the model names by distribution channel, but with many of the new models being so similar, it's difficult to understand the reason for the distinctions. If they're all basically a variation of the same machine, why spend the time and money calling them something different, or building the same computer in the differently shaped box?

This situation will probably continue in the coming year as Apple offers new configurations (such as Macs with both a Motorola and Intel CPU), and begins the transition to the PowerPC.

Enough about Macs. Three other hardware events this year that stand out in my memory:

On the workstation front, the **Indy** from Silicon Graphics is a truly exciting new computer. It offers an ideal platform for multimedia with powerful 3-D graphics and a camera as well as Windows and Macintosh emulation, all for a \$5000 base price.

At the other end of computing are two new small computers. The first is the **HP OmniBook**, a very small, lightweight subnotebook, featuring PCMCIA flash cards, built-in ROM-based Windows

Bondwell Beats 'Em!

Since
1975

Bondwell's strengths are derived from front line pioneering in high-tech electronics on worldwide basis. We have specialized in design and manufacturing of notebook and laptop computers for over a decade. Unlike those who just slap their name on the products, we have full

control over the design, manufacturing, quality control of our products - that is why we can offer you a combination of price, performance and support that no other manufacturers can match.

Our engineers and technical experts offer full support for the products. Because we design and manufacture them, you can rely on us for the years you own the product. Our standard support package includes a No Risk 30-Days Money Back Guarantee, Life-Time Toll-Free Technical Support... all of this comes at a very competitive price that is truly affordable to you.

Quality Parts Bondwell's notebook computers are built with heavy duty usage in mind. They are well-built in aluminum casing which offers excellent protection and durability that you would expect for everyday use. It is one of the most reliable, full-fledged notebook computer that one can find. To give your notebook a classic and elegant touch, we are offering a leather look, soft vinyl-covered casing as an option. Not only will it add class to your notebook computer, it also helps to prevent scratches!

Ranging from the most powerful 486DX2-50 with docking unit to the basic 486SLC notebook computers, we have the widest range of powerful notebook computers that you can choose to suit your computing needs. Our 486-based notebook computers come standard with 2 or 4-Megabyte RAM, 80/120/200/300 Megabyte of hard drive capacity for your option. A combination of power and thoughtful features that will truly meet your expectation and satisfaction.

applications, and infrared technology for communications—to other OmniBooks, the desktop, or printers. The original OmniBook 300 used a low-energy 386, but Hewlett-Packard has recently announced a new model powered by a 486.

The other “small” event was the release of the much-discussed Apple Newton. It is too early to know if this pen-based, handheld device will be the killer machine for the mid-1990s, but it promises to challenge our thinking on how we use computers and how we communicate with each other.

1993 was also the year of continued growth on the electronic networks, with the majority of focus on the Internet and the promised National Information Infrastructure or Highway. Having grown up in Los Angeles, I know the value of a good, fast transportation vehicle. After spending most of the year cruising around in an old reliable 2400 baud modem (the Volkswagen of the early '90s?), I decided to beef things up with a 14.4, V.42 fax modem. And it feels grand. Yes, I can see the new super compression, V.FAST modems just around the corner, but until these are everywhere and affordable, traveling the electronic highways and byways at 14.4 baud is a pretty nice way to go.

Jim Warren

MacZeal

Sometimes, Sculley's scurrilous scenarios infuriated me—noncompetitive over-pricing and elitist preoccupation with high-end esoteric Macs while haughtily ignoring the low-end and mid-range mass Mac market. But Sculley's gone, and most of that now appears to be history.

So I continue to be a Mac zealot—primarily because the Mac operating system and the thousands of commercial, shareware, and freeware applications that conform to the Mac's carefully designed and long-published user-interface specifications are so easy to learn, easy to use, and easy to move between.

Why, hell—on a Mac, you can be *productive!*—even *without* being a computer expert.

My zeal is further rekindled, now that post-Sculley Apple has decided to offer dual-platform (PC and Mac) functionality in some 1994 Macs, and even—*glory!*—license their Mac OS for use on others' platforms. (If Steve Jobs had done that in the first place, the Windows window-of-opportunity would never have opened. Cooperative competition wins; clutching at control loses.)

I do wish, however, that Apple would finally offer a true multitasking Mac operating system, with legitimate preemptive multitasking. They coulda done it with System 7, but they decided to remain

upwards compatible with their previous mistake—(un)cooperative multitasking.

IBM's OS/2 has offered preemptive multitasking for some time, and Windows NT has promised it (and will promise it) for years.

It *ain't* that hard to do—the old Alpha Micro AMOS in the late '70s was a multiuser operating system with preemptive multitasking, using nothing more than a 6800 CPU board and 64K-or-so of memory in a cheap \$100 bus desktop computer box with a 5–10MB hard disk, leaving lots of space to spare.

DOS & Windows

In several years, Windows—which was promoted for years before it was stable enough to be widely accepted—will be as robust as the Mac interface is now. And probably a few years later, most of the major Windows applications may have mostly standardized their user interfaces—making it as easy to learn and switch between applications as it has been on the Mac from its beginning.

And in the future—years after benevolent Bellevue Billy first announced and began promoting it—Windows NT, also, will undoubtedly become widely installed. And only a few years thereafter, it will even become reliable—once enough customers have helped Microsoft finish debugging it, as they have done with Windows 1.x, 2.x, and 3.x.

On the other hand, for convenient programming and automatic, un-esoteric mass data and text manipulation—limited to command-line interfaces and unencumbered by the inconvenience of (humane) graphical user interfaces—I still like DOS. If I wanna hack huge databases, I tend to shove 'em into a DOS box and thrash them to my heart's content.

Peripherals

For the last several years, I have consistently turned to APS Technologies for my mass-storage needs (1-800-354-1213). I've bought half a dozen disks and DAT drives from them. The first reason is price. The second reason is robust, cordial, patient, competent customer service and technical support.

My APS goodies include several Archive Python DAT-tape systems, controlled with Dantz Development's (510/253-3000) *Retrospect* backup software. They have *repeatedly* saved me from my imperfect self, plus occasional hardware failures. And I routinely slip the latest backup tapes containing *everything*—about 3GB total—in my pocket whenever I leave home. Their tiny bulge makes me feel comfy in our fire-prone, quake-threatened times.

Improved SCSI boxes: APS has just introduced

what I consider to be a *neat* improvement in external mass-storage SCSI boxes—small cases with two features:

1. Each has an active controller that diddles the otherwise-infuriating SCSI chains to assure continuous, accurate, in-spec electrical termination! A *great* boon for all who have endlessly swapped cables and boxes seeking the magic combinations that pacify the forever-unknowable SCSI Gods.

2. These cases have very quiet fans and can be stacked, and APS offers a tiny, 4"-long SCSI connector to “cable” between the stacked cases. No more stupid cable-snarl.

Magnificent modems: The exploding world of BBSes (bulletin board systems) and the global Internet offer *worlds* of information, contacts, and computer programs. All you need is a modem. Furthermore, fax machines offer the exciting opportunity to create landfill at remote sites using other people's paper.

Given how cheap they are, a high-speed modem with send-receive fax capabilities is the *only* way to commute. I contentedly use desktop TelePort Gold and PowerBook PowerPort Gold 14.4-kilobaud fax/modems from Global Village (415/390-8200). Their fax software is better than most, and their modems support up to 57.6Kbaud functional data throughput when communing with other V.42bis modems—even over unconditioned residential phone lines. Savings in connect-time charges alone can often quickly pay for these units—to say nothing of savings of your time and patience.

Among other things, these Global Village fax/modems were *instrumental* in this year's successful push to make comprehensive state legislative data available via the public computer nets without state fees.

Scanners: In 1990, I got an Abaton/Everex grayscale scanner. When it wimped out and I called them for out-of-warranty repair, they wanted about half of what I'd paid for the entire system!—and casually said they were no longer supporting their three-year-old product. Interesting approach to customer “support.”

I now have a unit from a reliable company—the Hewlett-Packard ScanJet IIcx. It lists for under \$1200; is a flat-bed scanner (much better'n them curl-'em-up sheet-scanners); emits 24-bit color and 256-level grayscale; and has optional pagefeeders, transparency adapters, and Mac interfaces.

1. It's a great price for all those capabilities.
2. HP has a decades-long reputation for building solid products.
3. I can depend on HP to continue to back its

move
Combines PCI interface with SCSI
10Mb synchronous
5Mb synchronous

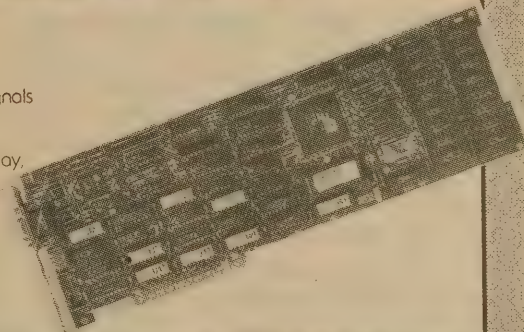

PENTIUM-66 VL GREEN SYSTEM BOARD

- Pentium 66/60/50/33 MHz
- 3 Bus Master system slots for 2 SCSI & 1 network cards
- 8 16-Bit ISA slots
- Up to 128MB Memory (72 pin Simms)
- 128K/256K/512K cache memory
- 3 levels of green PC power saving
- AMI BIOS and Flash Prom

- Power meter V1.7: 44.8 mips
- Core test V2.8: 13.256KB/sec.
- American Made & Manufactured
- FCC available

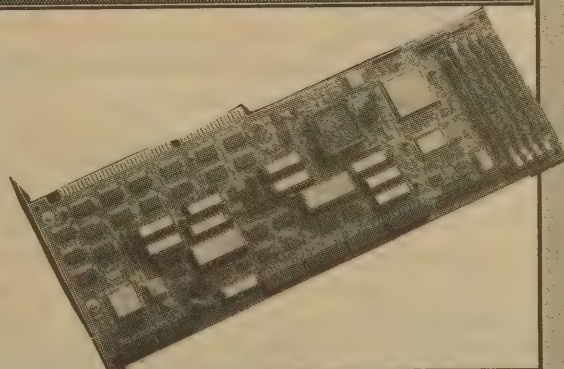

PCI WINDOWS ACCELERATOR VGA

- Supports 32 bit PCI Local Bus
- Fully IBM VGA compatible
- Graphics user interface accelerator
- Supports all display resolutions
- Supports multiplexed address and data signals
data burst standard PCI bus
- 24-bit true color RAMDAC default for
16, 256, 32K, 65K, and 16.8M color display,
and pixel clock up to 110MHz
- Hardware cursor 64 X 64 X 2
- VESA specs support for monitors and BIOS
- Display memory 1Mb DRAM
default expandable up to 2mb

FAULT TOLERANT CACHE CONTROLLER

- Cache memory 512K up to 16Mb
- High speed IDE Interface
- Bus master interface: Adaptec
compatible
- Supports DOS, Windows, Windows
NT, SCO UNIX, OS2, Novell
- Best performance for multi-tasking
- Non-stop fault tolerance
- Anti-virus protection
- Supports up to 4 HDD
on one controller

MicroTimes Writers' Soapbox Awards

products at equitable-though-industrial repair rates—even three years hence.

Cross-platform keyboards: On my Mac and my PC, I have a pair of keyboards—almost identical in feel and key-location. Invaluable for touch-typists who switch between the two platforms! Furthermore, both have an optional-use small trackball for the mouse-averse and roll-prone. Low-cost comfort from Key Tronic Corp. (1-800-262-6006).

Sun-visor computing: Not exactly *MicroTimes* mainstream, but—for security against unkind surveillance of nonconformists' driving habits—Cincinnati Microwave's battery-powered **Passport Escort** traffic-radar detectors are excellent. Small, pocket-portable, and the Maytags of the commuter counterspy contraptions (1-800-543-1608).

MacStuff

For years, I have been a Symantec (408/253-9600) loyalist—a loyalty well earned by their product quality and Gordon Eubanks' leadership.

MacProgramming tools: Symantec's **Think Pascal** programming system is far more than merely a Pascal compiler for the Mac. It is absolutely the best program-development system I have ever used—and I've been programming on and off since the early '60s. And **Think Pascal** is *amazingly* inexpensive.

For C hackers, **Symantec's Think C** system is excellent. Its user interface is not as polished as the Pascal system's, but it still beats the hell out of clunky command-line C systems.

MacUtilities: I consider Symantec's **SAM Anti-Virus for the Mac** and its **Norton Utilities for the Mac** to be the default standards for such invaluable functions. Norton has cleaned up my file aberrations more than once!

Kiwi Software has several Mac utilities including a great (cheap!) little **Control Panel** add-on that allows Mac users to quickly pull down through main menus to their submenus (805/685-4031). I use it constantly.

MacPackages: I like Symantec's **GreatWorks**—combining text editing, database, spreadsheet, charting, drawing, painting, outlining, and communications in one glob.

MacDatabase systems: Jim Rea's **Panorama** from ProVUE Development is my flat-file database-manager-of-choice (714/892-8199). It is unusually easy to use for most of its functions, unusually fast, and *delightfully* inexpensive.

Furthermore, Jim has built a package of **PowerBook** contact management, scheduling, and expense-tracking tools on a stripped-down version of **Panorama** that is even less expensive—but

much more powerful than most similar packages.

MacFile searching: ON Technology's **OnLocation** saves me endless hassles and frustration in searching for items that I buried in—literally—several gigabytes of text and databases scattered across tens of thousands of files, where I can only remember one or several key words (1-800-767-6683). In the background, when the system is idle, it automatically updates its compact indices for each disk.

MacGroupware: Ever since working a bit with mouse- and GUI-inventor Doug Engelbart, who's been working on collaborative systems since the early '60s, I have been a fan of computer-assisted collaboration. ON Technology's **MeetingMaker** is a neat step in that direction. It allows numerous people to share the development of documents across a LocalTalk or EtherTalk network. Handy for anyone who can't do everything.

MacBooks: Aside from sometimes-readable product manuals, there are two sources to which I automatically turn for well-written, comprehensive tutorials and reference works on just about MacAnything:

Addison-Wesley Publishing Company has long been the publisher of Apple's official **Inside Macintosh**—completely detailed reference manuals (1-800-447-2226). Beginning in 1992, as Mac variations proliferated, they significantly revamped the series—from its original five-volume series (plus Vol. 6 for System 7) to a better-organized series that is currently ten volumes and counting. Additionally, AW publishes a whole batch of *excellent* reference works for Mac programmers and users.

Peachpit Press is my other favorite publisher of manuals for Mac users—and also of books for desktop publishers and, increasingly, for Microsoft Windows users (1-800-283-9444). They are a small publisher dedicated to outstanding quality in their well-defined topic areas. Their **Little Mac Book** and **Macintosh Bible** series are default-standard tutorials and reference works for Mac users. They have a whole range of highly readable, complete manuals for numerous specific Mac software applications—usually notable improvements over the original product manuals.

Both Peachpit and AW have catalogs available upon request and accept telephone orders.

PC Software

I don't use my resident PCs much. But when I want to hack some fast code, or munch on massive datafiles—such as half a gigabyte of voter-registrations or assessor data or some such—the PC is often the handiest tool around, usually with DOS, occasionally under Windows. No messin'

with fancy GUIs—just hack the files and get the job done (and, often, pump the results over to the Mac for fancy finishing touches).

For local and remote data-communications on the PC, I use DataStorm's **Procomm-Plus** (remote) and **HotWire** (local, via an RS232 link, including cabling) (314/443-3282).

As with Symantec, I am a strong Borland International (408/431-1000) and Philippe Kahn loyalist.

PC programming: For PC programming tools, I automatically turn to Borland's **C** or **Pascal**—dandy development systems. Powerful tools, excellent prices, versions available for both Windows and DOS platforms.

PC database systems: Borland's **Paradox** is an outstanding PC relational DBMS (database management system). And, of course, their **dBASE** is the ol'-time standard for PC databases. It's sorta like the English language—perhaps difficult to learn and sometimes inadequate to express complex ideas, but it's almost universal.

The only major gripe I have about **Paradox** and **dBASE** is that they don't have modern versions available on the Mac—for cross-platform utility and compatibility.

PC books: For tutorials and reference books on PC software products—notably including most Borland software—I turn first to Osborne/McGraw-Hill (1-800-227-0900). They have a *massive* collection of generally excellent pubs on PC applications—free catalog available.

Networking

I'll leave LANs (local area networks) unmentioned, other than to say that Novell is a strong competitor to Microsoft—in an industry that badly needs balanced, vigorous competition.

For *real* networking—of people and information—there're BBSes (computer bulletin board systems) and there's the Internet. (Oh yeah—there're also the higher-priced, more-limited spreads like CompuServe and Plodigy—but why pay more and get less?)

Local BBSing: There are tens of thousands of BBSes around the United States—check the listing in the back of any monthly *MicroTimes* for hundreds of 'em in California.

Although there are *numerous* counter-examples to the following provincial view, nonetheless: I consider BBSes to be primarily of use for local geographic areas—and for comparatively slow global email via Fidonet. That is, most of them primarily serve areas within the local calling area or inside a range from which one can call without having to make a major contribution to the phone monopoly's profits (generating enough spare loot

Apple® Macintosh® Portrait Display

The Apple® Macintosh® Portrait Display is a high-resolution 15-inch monochrome display. It's ideal for work with desktop publishing, word processing, and general productivity applications. The full 8 1/2 x 11-inch page display shows a complete page of information just as it will appear in print. That makes it easy to preview and edit documents and add text or graphics. You'll also find that page layout of text and graphics will be more accurate and much more efficient. And you'll see clearly how the flatter screen and higher refresh rate can minimize flicker, and provide excellent focus for sharp, clear images and text.

#1714203

\$699

Apple® Macintosh® 21" Color Display

The Apple® Macintosh® 21" Color Display sets the standard for large-screen color displays, and lets you work with two full pages of text and graphics in brilliant color. The 21" Color Display is ideal if you need a high-performance, large-screen color display for presentations, page layouts, engineering design, or video applications. The 21-inch screen provides more than three times the screen area of standard displays to give you more room to work—and increase your productivity. The Macintosh 21" Color Display lets you work with as many colors as your video card will support. You can work with different applications simultaneously, integrate color graphics into presentations and publications, and prepare video and animation presentations to use with television monitors or videocassette recorders. All in brilliant, vivid, pure color.

#1721524

\$2399

Apple® 14" Color Trinitron® Display

The new Apple® Macintosh® Color Display provides the high quality and practical ergonomic design you expect from Apple. Its color and gray-scale capabilities give you versatility for a variety of projects. And its enhanced electronics allow this 14" monitor to display full-color images with photographic quality. The display's low, stable center of gravity keeps it from being easily tipped over, and its built-in tilt-and-swivel base makes adjustment easy.

#1738513

\$499

SUPERMATCH 17" 17" TRINITRON® COLOR DISPLAY

Low-cost, large-screen color for business productivity applications. The 17" color display includes multiple modes, with supports for 1024x768 full-page-plus—the workspace of a 20" display, 832x624 WYSIWYG, and 640x480 magnified view resolutions; microprocessor-based controls for customizing your display to your environment; antistat technology; accurate 6500K white point and "plug and play" compatibility with the motherboard graphics of the Macintosh Quadra.

#1822238

\$1199

SUPERMATCH 17" 17" MULTIMODE COLOR DISPLAY

Low-cost, large-screen color for business productivity applications. This 17" color display includes multiple modes, with supports for 1024x768 full-page-plus—the workspace of a 20" display, 832x624 WYSIWYG, and 640x480 magnified view resolutions; automatically syncs to all popular Macintosh and PC timing, including VGA, SVGA and VESA; microprocessor-based controls for customizing your display to your environment; accurate 6500K white point and "plug and play" compatibility with the motherboard graphics of the Macintosh Quadra.

Apple® Macintosh® Quadra™ 605 4/80

The Apple® Macintosh® Quadra™ 605 personal computer, Apple's most affordable high-performance desktop system, is an ideal multipurpose personal computer for business and professional users. Like all Macintosh Quadra computers, it puts the highest levels of Macintosh performance and flexibility at your fingertips. Yet the Macintosh Quadra 605 brings the cost of high performance down to almost any budget, and its new, slimline design saves desk space. The Macintosh Quadra 605 uses the powerful 68040 processor, so you can scroll, search, and sort through your applications faster than ever before. You'll also appreciate the speed with which the Macintosh Quadra 605 redraws graphics, recalculates spreadsheets, and reformats large documents. It comes with 4 megabytes of RAM on board, expandable to 36, so you can work with multiple applications simultaneously. #1848954

\$887

Apple® Macintosh® Quadra™ 610 8/230

Like all Apple® Macintosh® Quadra™ computers, the Macintosh Quadra 610 delivers the high performance you need to get the job done in a demanding environment. It offers the flexibility to meet your needs today, and the room to grow tomorrow. Based on the fast, 25-megahertz Motorola 68040 processor, the Macintosh Quadra 610 provides affordable high performance. It comes with 8 megabytes of RAM and an integral math coprocessor. In addition, you can expand memory to up to 68 megabytes when you want to add horsepower for sophisticated graphics and multimedia applications as well as mainstream business programs. The Macintosh Quadra 610 even provides high-speed Ethernet support on-board. #1848986

\$1699

Apple® Macintosh® Quadra™ 650 8/230 CD

If you've been waiting for a high-performance computer that's easy to expand, welcome to the Apple Macintosh Quadra 650 computer. As one of our most powerful personal computers, the Macintosh Quadra 650 is a good choice if you need a computer that's built for speed, designed for flexibility, and capable of growing with you. Based on the fast, 33-megahertz Motorola 68040 processor, the Macintosh Quadra 650 provides affordable high performance. It comes with 8 megabytes of RAM and an integral math coprocessor. For increased performance, you can expand memory to up to 136 megabytes. #1849024

\$2648

Apple® StyleWriter® II Printer

The Apple® StyleWriter® II printer, laser-quality printing at an affordable price.

- 360 dots per inch quality
- Multipurpose tray holds up to 100 sheets of paper and 15 envelopes
- Comes with 39 scalable TrueType™ fonts

MODEMS

INTERNAL DATA/FAX MODEM

DATA PORT™ 14,400 BPS

All-in-one high-speed V.32bis Fax/Modem

Delivers the highest performance, reliability, and compatibility in the industry. Tested, proven the leader in connecting calls, even on noisy, impaired lines.

The DataPort 14.4/Fax Modem delivers data at line speeds up to 14,400 bps. That's fast! But combined with its advanced, optically-coupled phone line interface and V.42bis data compression and error correction, you gain effective data throughput of up to 57,600 bps—nearly 24 times faster than 2,400 bps modems—on "real world" phone lines! This high performance significantly saves long distance costs.

The DataPort 14.4/Fax Modem expands your personal computer into a fax workstation. You can send and receive faxes without ever waiting in line, and send presentation-quality faxes!

COMPUTER BOOKS

COMMUNICATIONS/NETWORKING

THE WHOLE INTERNET USERS GUIDE & CATALOG

This book will help you to unlock Internet's resources. It is a complete user's guide to the Internet, covering everything from the basics like electronic mail and newsgroups to the newest developments. A large part of the book tells you how to find the resources you want. This is the first book to cover the Internet's new "research libraries" - Gopher, WAIS and the World Wide Web. There are many other new tools that help you search the Net's resources by topic.

PUBLISHING YOURSELF ON CD ROM

One CD is worth a thousand floppy disks. On one CD-ROM you can combine text, graphics, sound, animation, and video in ways never before possible on computers. But to use this powerful new medium you need to need very expensive mastering software and dedicated hardware devices. Now with this breakthrough book and CD-ROM, bring the power of CD-ROM to everyone.

SL WABER POWER CONDITIONER

If your equipment suffers from power problems, your company suffers too... SL Waber Has A Solution.
Studies show that over 95% of computer problems are due to brownouts, surges, and damage to circuitry resulting in over-heating, permanent damage, and loss of user time. Since the actual voltage level delivered to your equipment by the utility company may be higher or lower than what is required for safe operation, it's up to you to protect your equipment. Five models feature both undervoltage and overvoltage regulation and range from 300VA to 2400VA. Each model filters out unwanted noise and utilizes SL Waber's patented 3-stage surge suppression design consisting of metal oxide varistors, gas tube, and silicon avalanche diode; all providing protection against surges up to 72,025 amps!

PC Hardware

ANTHURIUM PCI LOCAL BUS SYSTEM

Anthurium's PCI Local Bus system is powered by a 486DX2-66 processor, housed in a full-size tower case. Intel's PCI Local Bus offers 35% increased performance over the VESA Local Bus and features the Intel Saturn 82420 chipset, 256K cache on-board (upgradable to 512K), and three PCI Local Bus slots. The system includes 8MB of RAM (expandable to 128MB), 500MB SCSI II hard drive, 1.2MB and 1.44MB floppy drives, 15" SVGA monitor, 124-key keyboard, three-button mouse, two serial and one parallel ports, and MS-DOS 6.0. (\$2699) Anthurium Technology, Inc., 16371 Gothard St., Unit D, Huntington Beach, CA 92648. (714)375-0210.

ENPOWER 486DX2-80

Using individually selected and tested 66MHz Intel 486 processors that can run at 80MHz, PC Club has developed a proprietary motherboard that will let you work this higher speed. They have also designed the Crystal Cooler to handle the heat problems. The system includes a Pentium ready ZIP socket on the motherboard, three VESA Local Bus slots, 4MB of RAM (expandable to 64MB), 1MB of VRAM, 340MB hard disk drive, 1.2MB and 1.44MB floppy drives, 101-key keyboard, MS-DOS 6.0, and Windows 3.1. (\$1999) PC Club, Inc., 18537 E. Gale Ave., #B, Industry, CA 91748. (818)913-2582.

NEC POWERMATE 486ES SERIES

The PowerMate 486es Series represents NEC's second generation of economical PowerMate PCs for the general business user. NEC has incorporated a roster of advanced features, including compliance with the EPA's Energy Star Program, accelerated local bus video technology, second level cache, and a scalable architecture. All PowerMate 486es systems support a built-in CD-ROM drive and ship with 1MB of video memory, 4MB of RAM (expandable to 36MB), three expansion slots, three device bays, a 1.44MB floppy disk drive, preinstalled MS-DOS 6.0 and Windows 3.1, and an NEC keyboard and mouse. (PowerMate 425es, \$975; PowerMate 433es, \$1199; PowerMate 466es, \$1619) NEC Technologies, Inc., 1414 Massachusetts Ave., Boxborough, MA 01719. (508)264-8000.

VIDEOTIGER

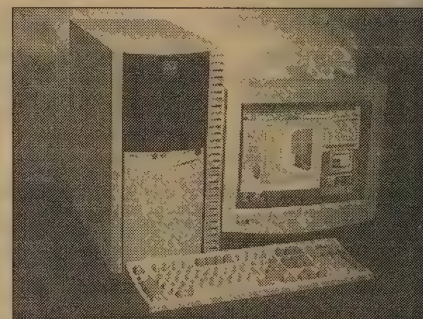

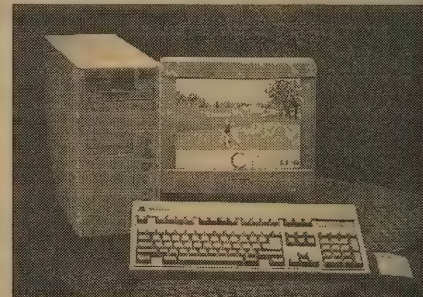

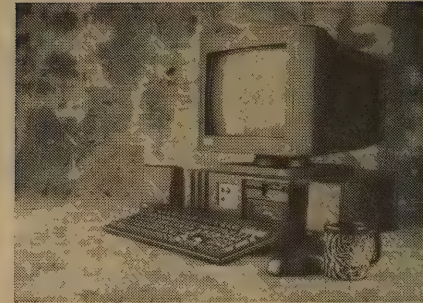

VideoTiger is a multimedia PC suited for small-business users. It combines CD-quality sound, full-motion video, and high resolution. With VideoTiger, you can create your own videos and multimedia presentations, play audio CDs, and handle all your business computer tasks. Based on a 33MHz, 486 processor, it includes 8MB of RAM, CD-ROM drive, SVGA monitor, 16-bit sound card, stereo speakers, and Xingit!, a thirty-frames-per-second video card. Xingit! provides real-time video capture, so you can freeze a video frame and print out a high-resolution copy of it, and MPEG compression, so you use less space to store your information. (\$3995) Quadrant Components, 4378 Enterprise Street, Fremont, CA 94538. (510)656-9988.

MICRO EXPRESS MICROFLEX-VL/S

Based on the 40MHz, Cyrix Cx486S, the new MicroFLEX-VL/S can outperform PCs based on the Intel 486DX2-66. While the 486DX2-66 chip operates internally at 66MHz and externally at 33MHz, the 40MHz Cx486S chip operates both internally and externally at 40MHz. This means that the VESA local bus components, such as the video and disk drive controllers operate at 40MHz instead of at only 33MHz. The MicroFLEX VL/S comes with 4MB of RAM, a 200MB hard disk drive with VESA caching controller, both 5.25" and 3.5" floppy drives, a VESA-standard local bus video card, SVGA monitor, math coprocessor, a mouse, MS-DOS 6.0, and Windows 3.1. (\$1795. For an additional \$25 each, PFS:WindowWorks v2 and PFS:Publisher for Windows will be bundled with the system) Micro Express, Inc., 1801 Carnegie Ave., Santa Ana, CA 92705. 1-800-989-9900.

ALR EVOLUTION V STP

The Evolution V STP (Sport Tower PCI) is a new sport tower-styled chassis, offered in a variety of configurations using the Intel 60 and 66MHz Pentium processor. The systems include nine slots, four of which are PCI slots, 8MB of RAM (upgradable to 192MB), and 256K read/write-back cache. Integrated on the

PC Hardware

STP motherboard is a PCI-based 32-bit fast SCSI II interface providing high-speed access to as many as seven SCSI devices. The new sport tower-styled chassis is designed for network environments and holds a total of six drive bays for a total of up to 6GB of data storage. (\$3295) Advanced Logic Research, Inc., 9401 Jeronimo, Irvine, CA 92718. (714)581-6770.

TAGRAM CONCERTO HI-NOTE

Available with an Intel 486DX-33, DX2-50 or DX2-66 processor, the Concerto Hi-Note includes a Pentium ready, VESA Local Bus motherboard, 4MB of RAM (expandable to 32MB), 128K cache (expandable to 256K), numeric coprocessor, AMI BIOS, five 16-bit and two 32-bit VLB slots, 250MB hard drive, seven bay desktop case, and 101-key keyboard. Providing powerful multimedia capabilities, the system features the 16-bit sound card, Panasonic CR562 CD-ROM drive, and 14" Proton Multimedia low-radiation monitor with built-in stereo dual speakers. In addition, Tagram bundles multimedia software (MS Works Multimedia version, Asymetrix MediaBlitz, Voice Recognition software, Monologue for Windows, MS-DOS 6.0, Windows 3.1, and more) and six CD-ROM titles. (\$2059) Tagram Systems Corp.,

1451-B Edinger Ave., Tustin, CA 92680. (714)258-3222.

DECPC XL SERIES

The series is comprised of four new system models—DECpc XL 433dx, DECpc XL 466d2, DECpc XL 560, and DECpc XL 566—offering users the choice of a high-performance i486 or Pentium processor. Using a unique motherboard/daughterboard modular approach, the series is designed to provide users with an easy upgrade path for multiple generations of

Pentium and Alpha AXP CPU technology, while preserving the investment in the DECpc XL platform. Digital's easy access, micro-tower enclosure includes a PCI/ISA main logic board, up to 192MB of RAM, upgradable flash BIOS, five bays (one internal, four

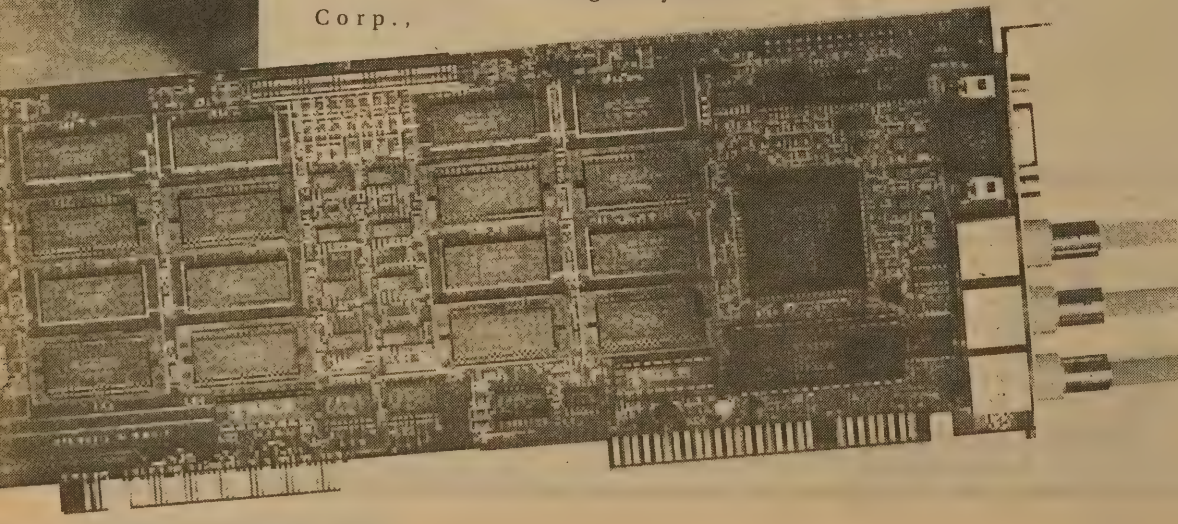

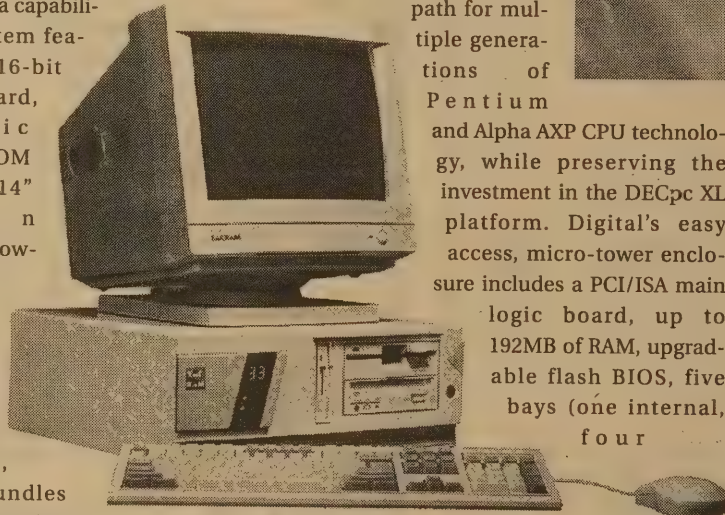

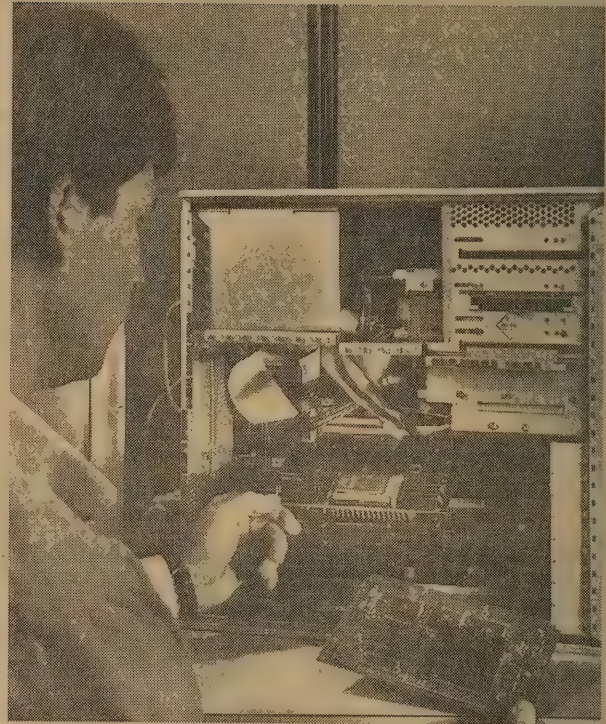

external), and six slots (two PCI, three ISA, and one Interleaved). In addition, the thermal design of the system box features two variable speed fans that are

heat sensitive and activate automatically. (DECpc XL 433dx, \$2899 includes 8MB of RAM, 340MB SCSI hard drive, 3.5" floppy drive, S3-928PCI local bus video, 1MB of VRAM, dual SCSI CD-ROM, MS-DOS, Windows, mouse, and keyboard.) Digital Equipment Corp., Maynard, MA 01754-2571. 1-800-210-1408.

PEGASUS PCI ACCELERATOR BOARD

The Pegasus PCI is a PCI Local Bus-compatible graphics accelerator that is capable of displaying 16.7 million colors at resolutions up to 1024 x 768. To simplify installation and provide easy access to configuration menus, the Pegasus PCI comes with an install utility that makes it possible to change monitor resolution and color settings from a Windows menu accessed by double clicking on an icon. Also included is a PowerStar power management utility that will allow a user to reduce their monitor's power usage after a specified time period. The Pegasus PCI comes standard with a BNC-style RGB connector and VGA 15-pin D-sub connector. (\$999 with 4MB of VRAM) STB Systems, Inc., 1651 N. Glenville, Richardson, TX 75081. (214)234-8750.

Top: DECpc XL Series from Digital Equipment Corp.; Middle: the Concerto Hi-Note from Tagram Systems Corp.; Left: the Pegasus PCI Accelerator Board from STB Systems, Inc.

VIDEOBLITZ BOARD

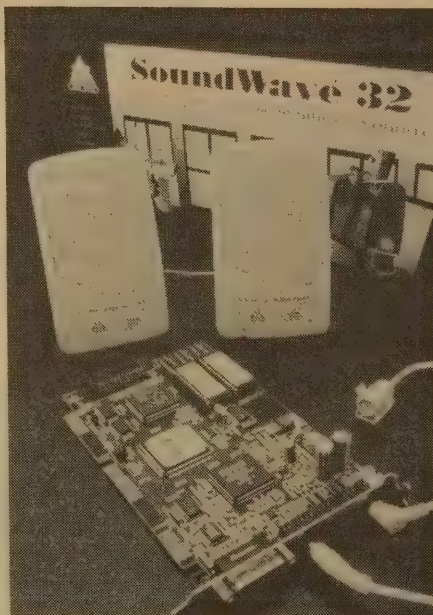

VideoBlitz is a high-performance VESA Local Bus graphics accelerator designed for users of graphics programs such as Windows, OS/2, and AutoCAD. It is based on the Weitek P9000 GUI accelerator chip and comes standard with 2MB VRAM, delivering high speed with rich color at non-interlaced resolutions up to 1600 x 1200. Unlike many other graphics cards, it delivers 16.8 million

colors at the popular 800 x 600 resolution. VideoBlitz's installation program guides users through the configuration process quickly and easily. It is compatible with most VESA Local Bus 486-based systems. (\$549) Genoa Systems, Inc., 75 E Trimble Rd., San Jose, CA 95131. (408)434-0997.

ORCHID SOUNDWAVE 32

The SoundWave 32 sound card, based on the Analog Devices 2115 digital signal processor (DSP), combines complete multimedia compatibility with simultaneous sound standards support. It can process over twenty million instructions per second, enabling the SoundWave 32 to accurately emulate a wide number of sound and synthesizer architectures, including Yamaha's OPL synthesizers and the Roland MT-32 sound module. For realistic sounds, this card has over 8MB of high-quality sound samples onboard. And for complete multimedia compatibility, the SoundWave 32 also features dual CD-ROM interfaces for Orchid, Sony, and Mitsumi CD-ROM drives. Interface connections include stereo speakers output (speakers includ-

Top to bottom: Orchid CDS-3110 CD-ROM drive; Toshiba XM-4101 CD-ROM drive; Orchid SoundWave 32 sound card.

ed), a line output for connecting the SoundWave to a home stereo, a microphone input (microphone included), and a line input for external audio devices. (\$299

and comes bundled with Macromedia Action, Asystem's Sound Impression, and other Windows-based sound utilities) Orchid Technology, Inc., 45365 Northport Loop W., Fremont, CA 94538. (510)683-0300.

ORCHID CDS-3110 CD-ROM DRIVE

The CDS-3110 from Orchid Technology is a high-performance CD-ROM drive for multimedia use. It supports all of the major multimedia CD specifications, allowing the Orchid drive to play back CD-ROM titles that merge sound, graphics, text, animation, photo images, and full-motion video on a single track. The front panel controls also let users play an audio CD without having to run any software. The CDS-3110 is available in three configurations: internal, external, and as a multimedia upgrade kit. Both internal and external kits come complete with Orchid's SoundWave 32 sound card. The multimedia upgrade kit also includes bundled software

from Macromind, Aristosoft, and others, in addition to self-powered speakers, a microphone, and home audio interface cables. (Internal kit, \$349; External kit, \$449, and multimedia upgrade kit, \$649) Orchid Technology, Inc., 45365 Northport Loop W., Fremont, CA 94538. (510)683-0300.

TOSHIBA XM-4101 CD-ROM DRIVE

The XM-4101 offers affordable high-performance CD-ROM drives. The drives have an access time of 320 milliseconds and transfer at a rate of 300K per second. They also include a 64K buffer, to further speed the transfer of information, and an audio jack. The drives meet the MPC-2 standards and work with Kodak multisession Photo CD. A slim, 1" high profile fits computers and docking stations that utilize 1" high peripherals. The power requirement is only 3 watts. The XM-4101B is an internal drive, and the TXM-4101L is an external drive. Both drives can work with either PCs or Macintosh computers. (\$320 for the XM-4101B; and \$410 for the TXM-4101L) Toshiba America Information Systems, Inc. 9740 Irvine Blvd., Irvine, CA 92718. (714)457-0777.

CHECKIT PRO: ANALYST

CheckIt Pro: Analyst is a Windows-based diagnostic utility that provides comprehensive system analysis. It will be simple to collect configuration and performance data, test hardware integrity, and access an extensive technical reference library. In addition, CheckIt Pro: Analyst can evaluate a system to find changes, compare performance with other systems to determine upgrade needs, assess the compatibility of hardware and software upgrades, and recommend setup specifications for add-on equipment. (\$149.95) TouchStone Software Corp., 2130 Main St., Suite 250, Huntington Beach, CA 92648. 1-800-531-0450.

FRAMEMAKER 4.0 FOR WINDOWS

FrameMaker 4.0 includes more than one hundred new features and enhancements designed to make the power of this application more accessible and easier to use for creating demanding documents in advanced desktop computing environments. Version 4 offers a redesigned user interface to improve access to frequently used features as well as significant new capabilities such as formatting features that allow users to more easily design their documents, an innovative document comparison feature, enhanced word processing, and advanced color and graphics. Frame Technology has also extended the power of FrameMaker by adding flexible menus that VARs and system administrators can customize to meet specific user needs. Along with the introduction of FrameMaker 4.0 for Windows, Frame is introducing versions for Sun SPARCstations, HP workstations, and Macintosh computers. (Windows 3.1 and Macintosh, \$895; Sun and HP, personal license, \$1295, shared license, \$2495) Frame Technology, Inc., 1010 Rincon Circle, San Jose, CA 95131.

BRIOPUBLISH, FRAMEMAKER EXTENSION

Utilizing FrameMaker's new C-based API, BrioPublish extends the power of FrameMaker 4 by bringing extensive client/server database access capabilities to its users. This easy-to-use database publishing tool for FrameMaker 4, is designed for publishers of professional database documents. BrioPublish automatically generates fully formatted FrameMaker 4 documents directly from information stored in a database, thereby eliminating manual cutting,

pastings, and reformatting of corporate data into a document. The advantage of the BrioPublish database publishing solution is its close integration with FrameMaker 4. BrioPublish is completely accessible from within FrameMaker so users encounter a familiar interface. BrioPublish runs on both Windows and Macintosh computers. (\$795) Brio Technology, Inc., 444 Castro St., Suite 700, Mountain View, CA 94041. 1-800-486-BRIO

CC:MAIL LINK TO UUCP 2.0

Lotus cc:Mail Link to UUCP v2.0 provides a gateway connecting cc:Mail email users to UNIX systems via the UNIX-to-UNIX Copy Protocol (UUCP). Outbound cc:Mail messages are translated to UUCP-format messages, where they can then be sent to and read by users on a UNIX host computer. Incoming UUCP mail messages are translated to the cc:Mail format. Key features in the new release are enhanced reliability through the provision of additional error checking and more robust asynchronous communications protocols; support for the transfer of multiple file types, including fax files and transmission of Macintosh file attachments; and simpler, more flexible procedures for installation and configuration. A Smart Addressing feature enables Lotus cc:Mail Link to UUCP to automatically match names in an existing cc:Mail Post Office with incoming UUCP messages, saving LAN administrators from having to manually create and maintain address-translation files. (\$495, free upgrades to registered users of previous versions are available) Lotus Development Corp., 55 Cambridge Pkwy., Cambridge, MA 02142. (617)577-5800.

ALTAMIRA COMPOSER

Composer is a creative application designed for professional use by desktop publishers, graphic artists, photographers, and multimedia authors working in the Windows environment. Every image is a separate image object that is never pasted into a background image, but floats in a stack. In addition to featuring image objects, Composer allows users to perform hundreds of functions "on" and "between" these image objects with superior quality and flexibility. Users can move images not just horizontally and vertically, but up and down in a stack, covering up or revealing images that lie underneath. (\$795) Altamira Software Corp., 150 Shoreline Hwy., Suite B27, Mill Valley, CA 94941. (415)332-5801.

HARVARD GRAPHICS 2.0 FOR WINDOWS

Harvard Graphics 2.0 provides users with content assistance and professional design advice. A new feature called the Advisor offers on-screen Design Tips to help users improve the overall visual effectiveness of their presentations. Design Tips helps users select the best chart type for their presenta-

PC Software

tions and offers special advice on creating more effective visuals. In addition to Design Tips, the Advisor offers Quick Tips and Quick Looks. Version 2.0 also features a Runtime Player that allows users to display their Harvard Graphics presentation on DOS or Windows systems, even if Harvard Graphics is not loaded. (\$395; users of previous Windows or DOS versions and users of competitive presentation graphics products can upgrade to v2.0 for \$125) Software Publishing Corp., 3165 Kifer Rd., PO Box 54983, Santa Clara, CA 95056-0983. 1-800-234-2500.

DYNO NOTEPAD FOR WINDOWS

Dyno Notepad is a flexible and compact PIM outliner that helps users organize their thoughts, write correspondence, and create "to-do" lists. Users can work with Dyno Notepad the same way they do with a familiar paper notepad. For example, they can capture their thoughts, outline them, write basic documents, prioritize action items, develop proposals, and keep lists of things to accomplish. Notebook and mobile PC users can use Notepad to compose documents while traveling, then later bring their outliners and other documents into word processors for final formatting. Corporate and small-business workgroups—which may have both Windows and Macintosh computers—can use it to share notes on a network between groups. (\$59.95) Portfolio Software, Inc., 10062 Miller Ave., Cupertino, CA 95014-3471. (408)252-0420.

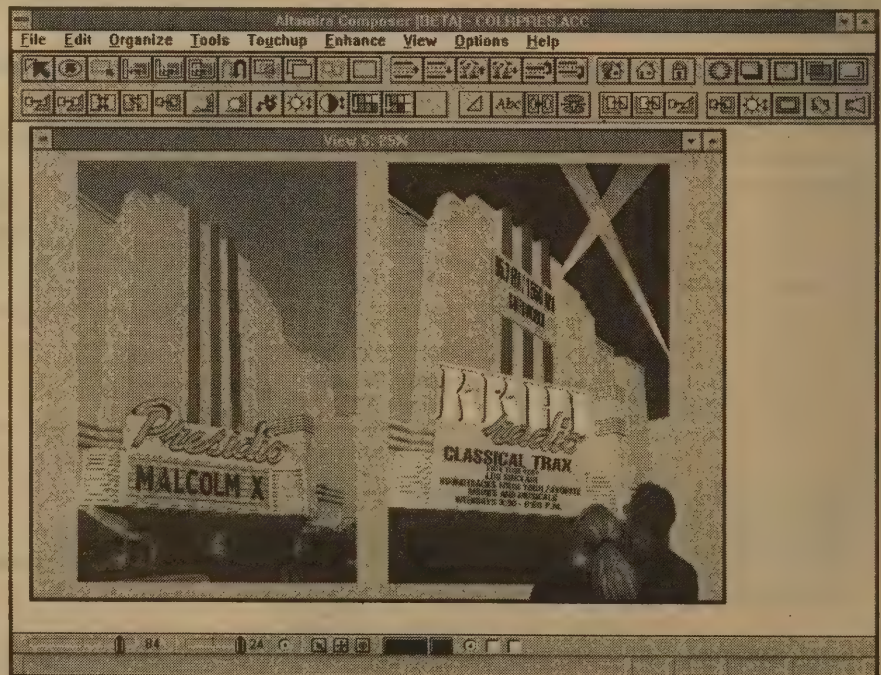

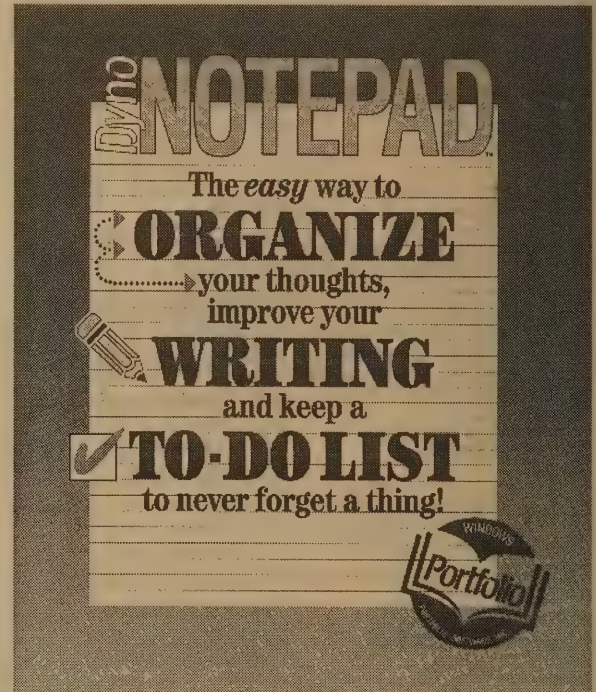

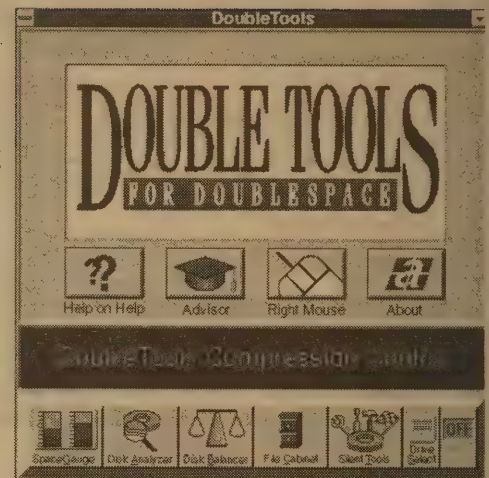

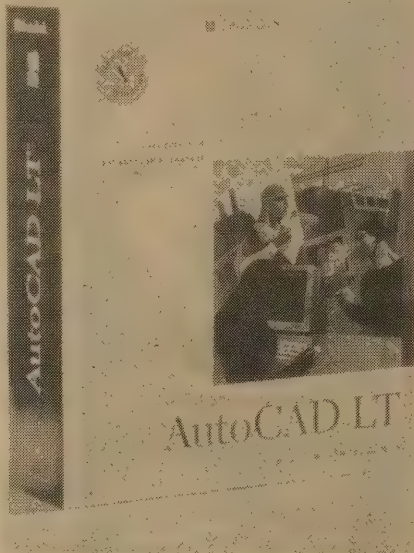

ADDSTOR DOUBLETOLS 1.0

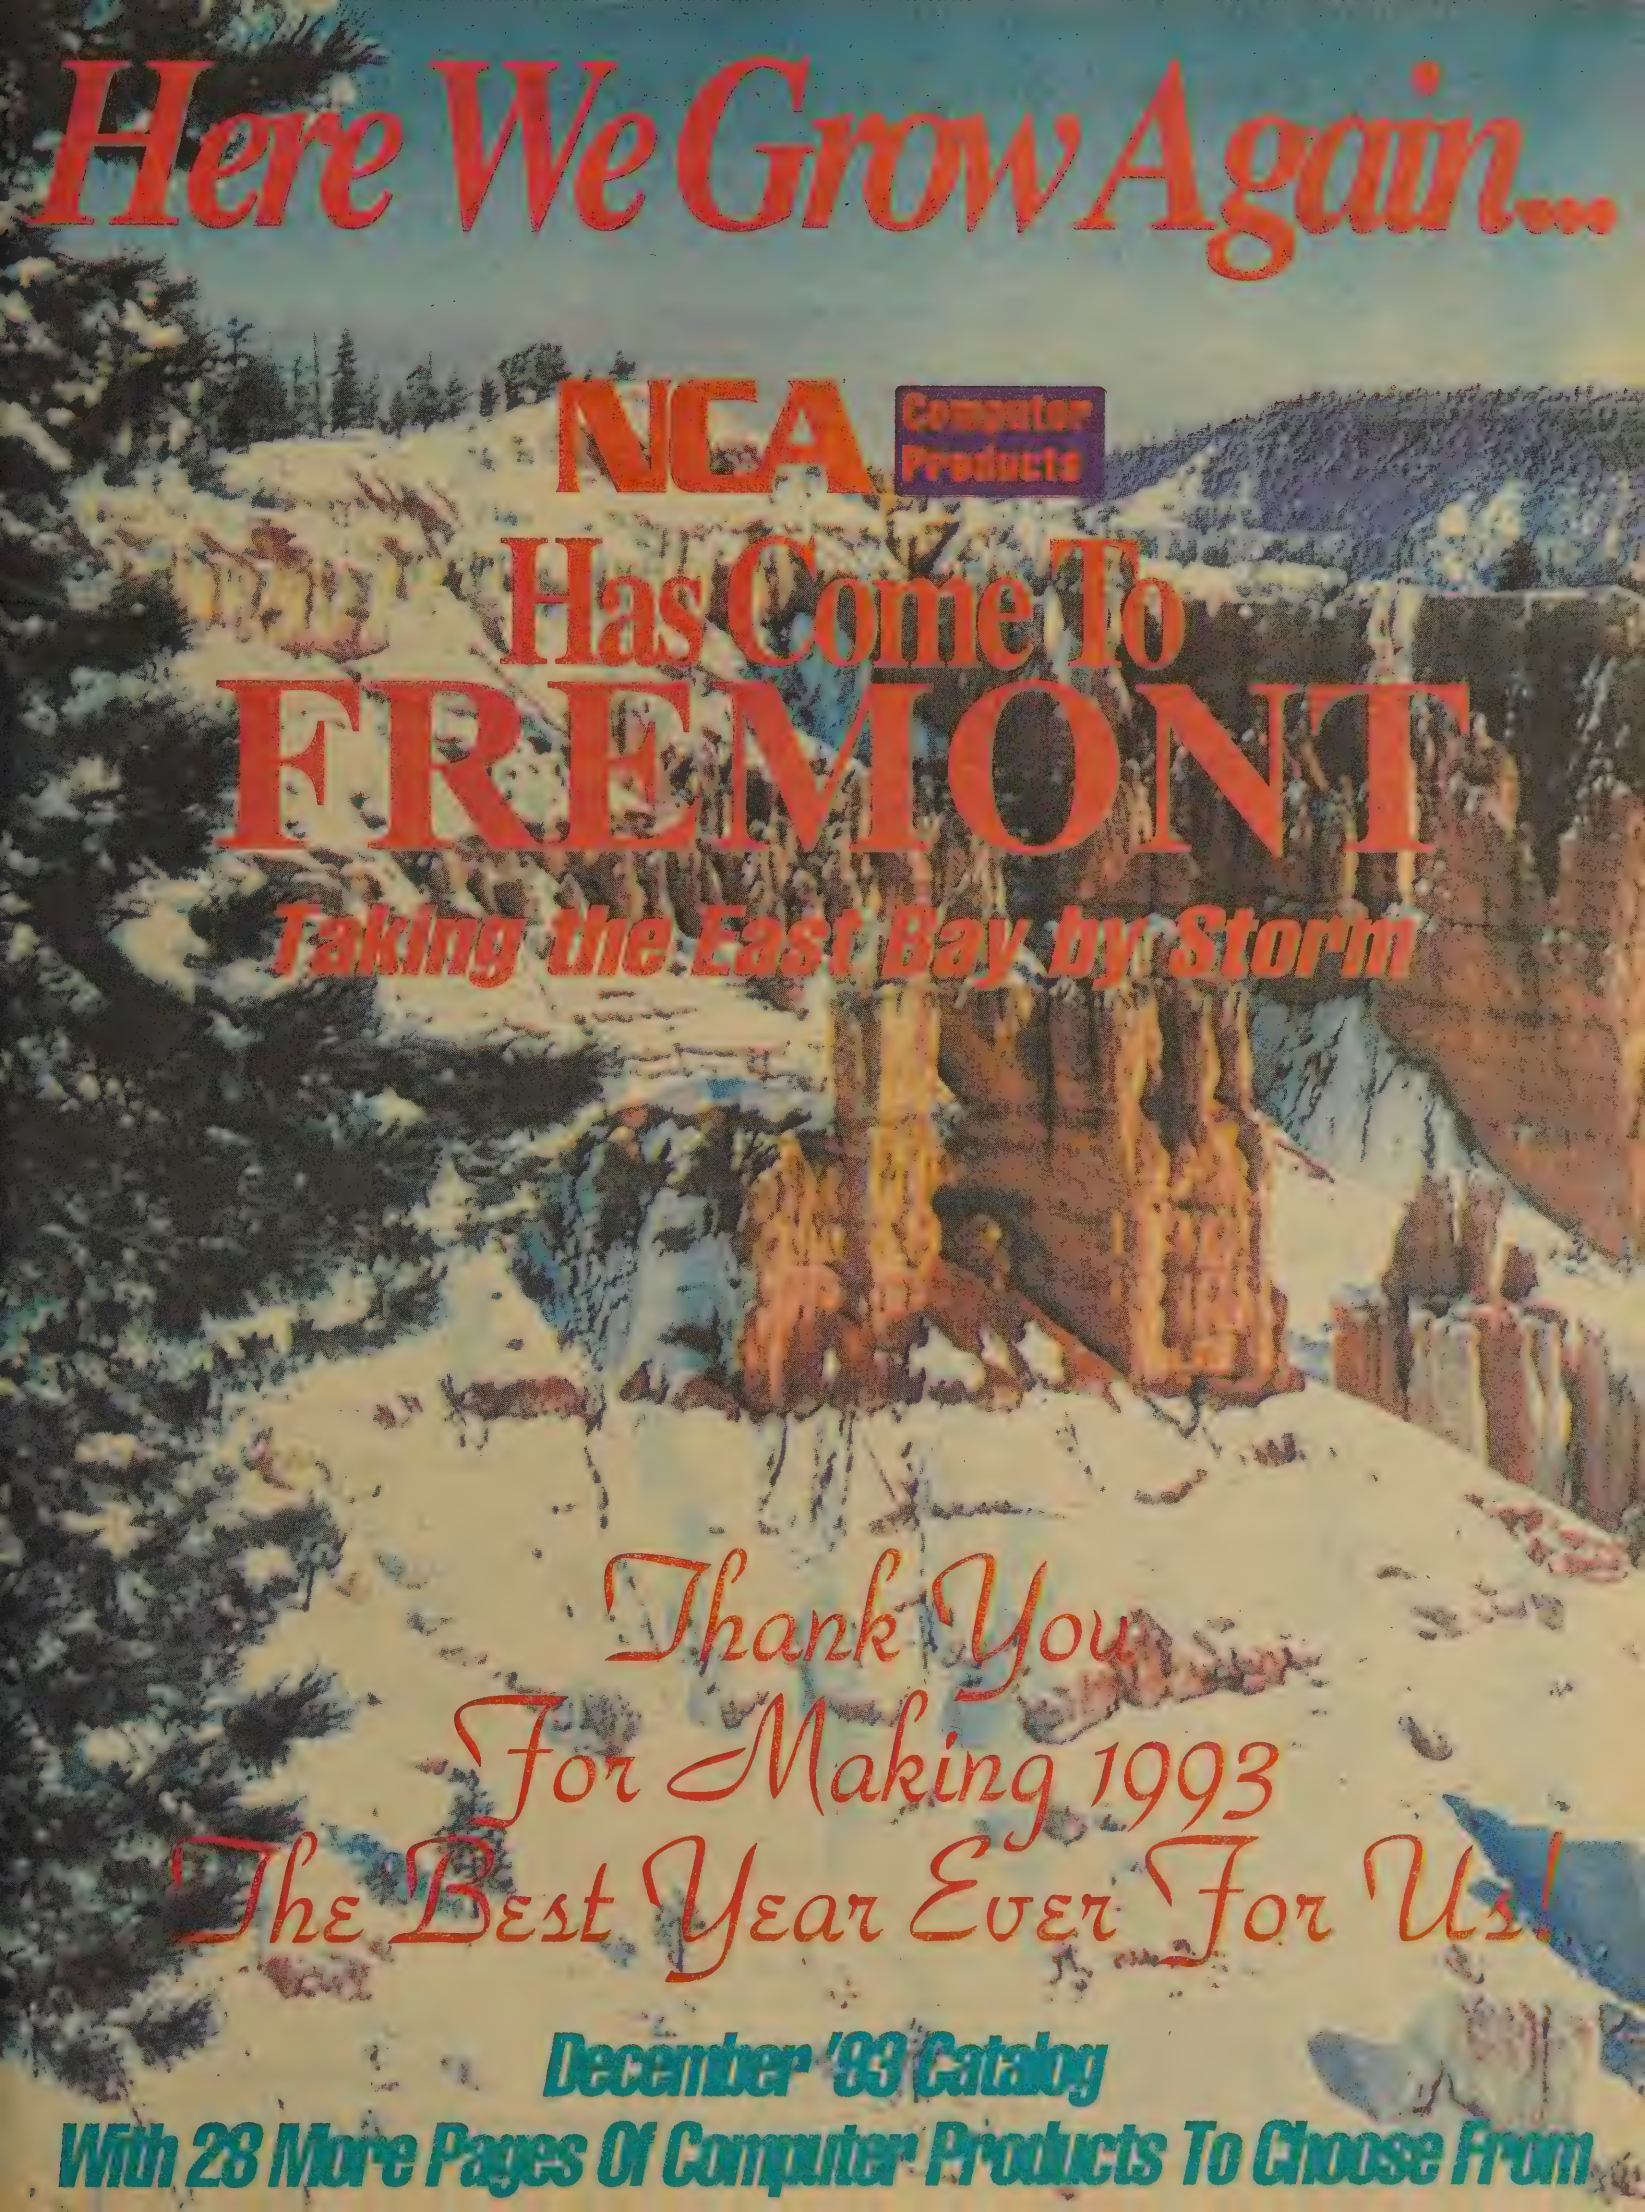

DoubleTools is a Windows-based enhancement utility for the DoubleSpace data compression feature of MS-DOS 6.0. It provides extensive graphic displays in the Windows environment to help MS-DOS 6.0 users to manage disks and files compressed by DoubleSpace, and extends DoubleSpace support to removable media such as floppy and Bernoulli disks. This utility offers background defragmenting of disks, environ-

ment-sensitive help, simplified file sharing, and automatic mounting of removable media. In addition, DoubleTools supports Universal Data Exchange (UDE), which enables users to read and write to compressed files on any DOS system. (\$99.95) Addstor, Inc., 1040 Marsh Rd., Menlo Park, CA 94025. (415)688-0470.

AUTOCAD LT FOR WINDOWS

AutoCAD LT, a powerful, low-cost, Windows-based computer-aided design (CAD) package, offers complete 2-D and basic 3-D drafting capabil-

CONTROLLER SUPER SOURCE

DATA TECHNOLOGY C O R P O R A T I O N

DTC 3270VL VESA Local Bus **SCSI** Host CONTROLLER

- Supports 7 SCSI Devices (up to 8GB each)
- Supports 2 Floppy Disk Drives
- DOS CD-ROM drivers
- DTC ASPI Drivers for: DOS, Novell Network 386
- Internal SCSI cable
- Floptical Support under DOS
- Complete installation and user documentation
- 3-Year Hardware Warranty

\$129

DTC 2278VL KIT VESA LOCAL BUS **IDE** CONTROLLER WITH MULTI-FUNCTION I/O

- High Performance - Up to 8.3MB/sec "Featuring the DTC 805 Single Chip Controller"
- Supports 2 IDE Drives/2 Floppy Drives
- Drivers for MS-DOS, and Novell Network 386
- (1) 34-Pin, (2) 40-Pin cables
- Complete installation and user documentation
- 3-Year Hardware Warranty

\$39

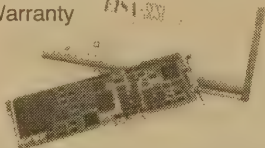

DTC 3280AS ISA TO **SCSI** 16-BIT Host CONTROLLER

- 16-Bit Host Interface
- Dual 128-byte buffers
- Supports 7 SCSI Devices (up to 8GB each)
- Supports 2 Floppy Disk Drives
- DTC ASPI Drivers for: DOS, Novell Network 386
- DOS CD-ROM drivers
- Internal SCSI cable
- Complete installation and user documentation
- 3-Year Hardware Warranty

\$139

DTC 3290 EISA TO **SCSI** 32-BIT Host CONTROLLER WITH CACHE

- Supports 7 SCSI devices / 4 Floppy Driver
- 33MB/Sec burst transfer rate
- Over 15MB/Sec sustained rate
- Multitasking & multithreaded I/O operation
- No jumpers or switches to set
- ASPI-compatible drivers for DOS, Novell and OS/2
- 3-Year Hardware Warranty

\$499

DTC 2277VL KIT VESA Local Bus CACHING **IDE** CONTROLLER

- Supports 4 IDE devices (up to 4GB each)
- Support 2 Floppy Drives
- Upgradable to 16MB of Cache (uses standard SIMM modules)
- Drivers for MS-DOS, Novell Network™ 386, OS/2v2.x, SCO UNIX v3.2.x
- (1) 34-Pin, (2) 40-Pin cables
- Complete installation and user documentation
- Change Cards without re-formatting drives
- 3-Year Hardware Warranty

\$149

DTC 2280 16-BIT PC/AT **IDE** SUPER I/O CONTROLLER

- Supports 2 IDE devices
- Supports floppy drives
- 2 RS232C Serial Ports
- 1 Parallel Printer Port
- 1 Game/Joystick Port

K-STOR™

250MB or 360MB Removable Disk Subsystem

Data Security and Data Portability!

Now you can take your entire data base with you-operating systems and applications! Lock your drive away at night for the highest levels of data security! Transport disk drive cartridge between home and office or office and office-eliminates the need to copy multiple files to floppies! Use as a fast back-up device!

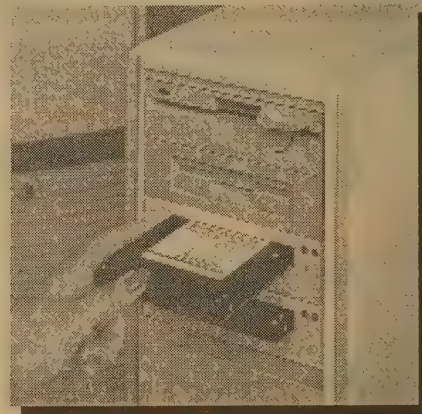

FEATURES:

- 16 bit IDE controller card and device driver.
- Simple installation
- Compatible with existing installed drivers and controllers
- Supports an additional 2 IDE drives
- Up to 2 IDE controllers / 4 IDE drives in a system
- 16.5ms. average access sustained data transfer rates to 2.4MB/sec.
- 100G non operating shock tolerance.
- 700G non operating shock tolerance in carrying case
- Energy Star Compliant
- Two Year Warranty

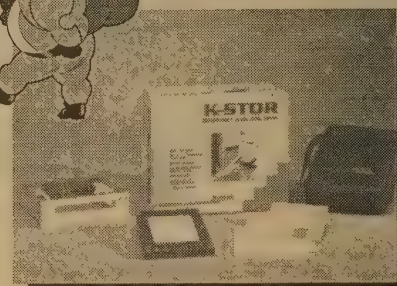

COMPLETE KIT INCLUDES:

- 250MB or 360MB removable hard drive
- IDE docking station
- Intelligent 16 bit IDE controller
- Carrying case and cable
- Installation guide
- Software device driver

Kalok
CORPORATION

"Kaloks K-Stor system offers a handy way to transport data between your office and home PCs. And the disks are rugged enough so that you don't need to treat them with excessive care!"
PC Magazine, 10/26/93.

"Bottom line: K-Stor gives you higher performance, triple the capacity, for less bulk...for cheaper than Bernoulli's 150MB multidisk or Syquest 88MB units..."
InfoWorld, 7/19/93

\$498

FOR WINDOWS

Professional Sound Editing Software For Your Windows 3.1 Compatible Sound Card

Wave provides recording, editing, and playback of digital sound. You can rearrange a piece of recorded music, add perfect fade-in and fade-out, choose from a wide selection of sound special effects like reverb, digital delay, unwanted pauses and mistakes from narration tracks, even create incredibly unusual system sounds.

NEW : Digital Effects Processor, On-line Context-Sensitive Help Function, Speed Controller, & Support for Microsoft Compression

\$89

Version 2 Includes:

WAVE Q
Automated EQ Presets

EFX CLIPS
Automated Effects Presets

- 6 new sound processing effects
- Sound speed control
- Context-sensitive online help
- Microsoft ADPCM compression

THE TURTLE TOOLS FOR MULTIMEDIA

Essential tools to use your sound card or MPC to its fullest

- **Midisoft Session™** - MIDI sequencer for developing or editing musical compositions
- **MIDI tune up™** - MINI file editor for non-musicians. Lets you graphically change tempo, key instrument and other setting
- **KeyPlayer™** - Non-musicians can play and record music using just your PC keyboard.
- **SoundAttach™** - Attach MID and/or WAV sound files to all Windows actions. Randomly if you like!

Sound Bank™ - Over 300 Sound Effects and Musical pieces in 4 different WAV formats and Redbook audio for professional quality!

\$39*

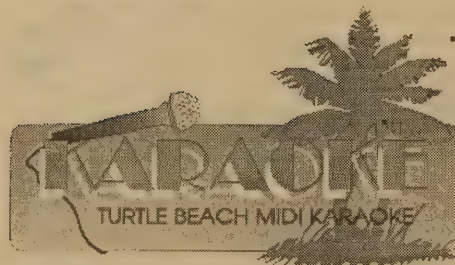

*With any Sound Card purchase

*For a limited time only
\$69 sold separately

- **Pitch Control** - with the click of a mouse you can customize any song to suit your vocal range.
- **Digital Audio Integration** - Click on RECORD, play your MIDI file and sing your heart out into the microphone to preserve the star performance of you and your MIDI band.
- **Speed Control** - Alter playing speed to suit anybody, old or young.
- **TrueType™** - Font Support - Select any font from the TrueType collection to make the words look the way you want... and so Grandpa read 'em.
- **Windows Sound Card Compatible** - Turtle Beach MIDI Karaoke supports any Windows 3.1 sound card. The MIDI section is totally General MIDI compatible.

- **Bitmap Import** - import any .BMP file to create custom backgrounds for your song text to scroll

PC Software

Continued from page 204

ities as well as full compatibility and seamless interoperability with AutoCAD. Pull-down menus, customizable toolbars, and an extensive help system ease learning. It is ideal for architects, engineers, designers, and contractors who need a complete CAD solution, but don't need the power and sophistication of AutoCAD. Use it at work with AutoCAD, in the field on notebook computers, or as a training tool for AutoCAD. (\$495) Autodesk, Inc., 2320 Marinship Way, Sausalito, CA 94965. (415)332-2344.

AUTOSKETCH RELEASE 2.0 FOR WINDOWS

AutoSketch for Windows 2.0 is an affordable 2-D CAD-based precision drawing package. This new release combines the power and precision of CAD with the freedom of an illustration program. AutoSketch for Windows makes it easy to produce concept sketches, technical diagrams, architectural layouts, electrical drawings, patterns, illustrations, presentations, and information graphics. Freehand curve tools and line options give you the versatility to meet any need. Easy view features let you choose drawings, symbols, and fonts with simple icons. It supports TrueType fonts, .DWG write compatibility with AutoCAD, .DFX import/export, and over two thousand symbols. (\$299) Autodesk, Inc., 2320 Marinship Way, Sausalito, CA 94965. (415)332-2344.

MAC-TO-DOS FOR WINDOWS

The file transfer utility gives PCs running Windows the ability to read and directly write to Macintosh media, including Macintosh 1.44MB diskettes, removable cartridges, and magneto-optical cartridges. The easy-to-use interface features drag-and-drop for single and multiple file transfers. Mac-to-DOS for Windows allows users to change file and directory names. Users can view ASCII files from within this utility before transferring them to their hard disk. (\$99.95) Peripheral Land, Inc., 47421 Bayside Pkwy., Fremont, CA 94538. 1-800-288-8754.

FONT WORKS

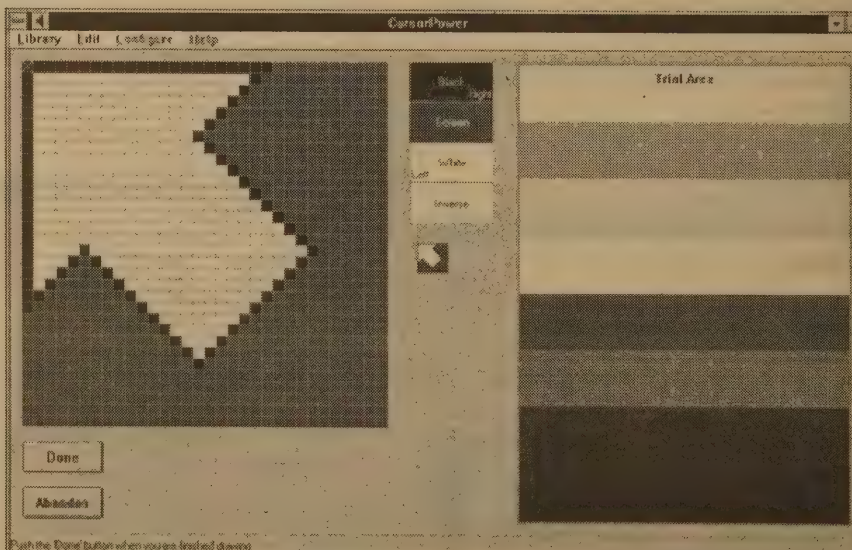

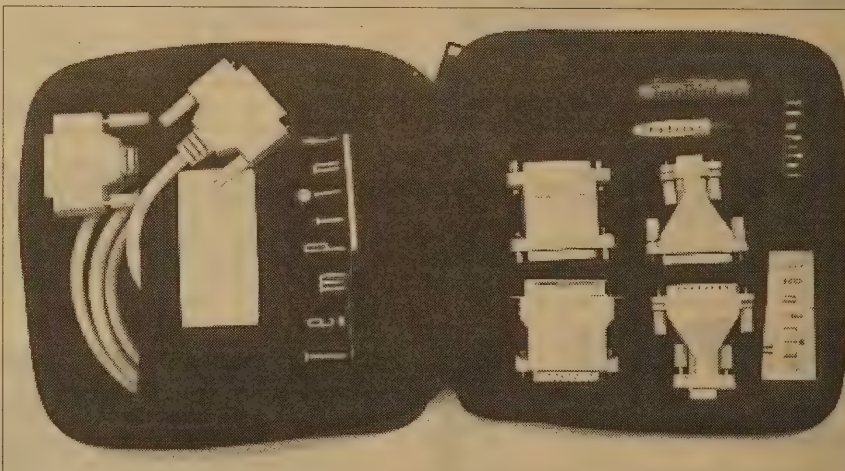

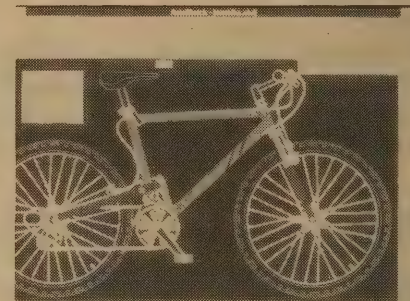

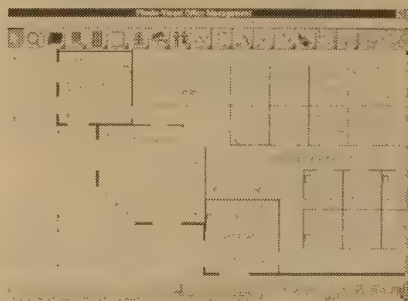

Font Works solves the growing problem for business users who exchange documents—not getting the fonts they expected

and losing document formatting due to poor font substitution. Font Works is an integrated font solution that gives Windows users a comprehensive library of high-quality fonts and the tools to use them effectively. Font Works assures users that they will get accurate font replacements, helps users make informed font selections, and gives them more than two hundred high-quality fonts. Based on ElseWare's infinifont technology, Font Works can generate fonts on-the-fly while consuming less than one fifth of the disk space required by current font technology.

Font Works also provides font management utilities that let users organize fonts according to task or project. In addition, users can customize their applications' font menus by hiding fonts not regularly used. (\$129.95) ElseWare Corp., 101 Stewart St., Suite 700, Seattle, WA 98101-1048. 1-800-ELSEWARE.

CURSORPOWER

CursorPower enables users to redesign and resize the arrow, hourglass, I-beam, and other cursors that come standard with

Monitor Saver™

ENERGY SAVING DEVICE

- Automatically turns off the monitor when left idle for a specified time.
- Power resumes at a simple keystroke or mouse movement

Patent Pending

No software required
Work with any operating systems

Exceed EPA Energy Star Standard.

Save \$100 or more annually.
Pay for itself in just a few months.

EZ Single dial control
Easy to use

Eliminates harmful electromagnetic
emission when monitor is left idle.

Avoid screen "burn-in" without
screen saver software.

Save energy and reduce pollutants
that cause acid rain and greenhouse
effect.

Save up to 80% of the energy
consumption of a monitor.

Reduce wear and tear and prolong
the useful life of monitor

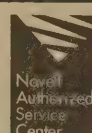

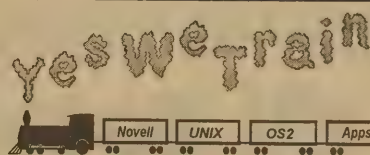

Simple installation, connect in
seconds.

both Windows 3.1 and OS/2 2.1. With the utility, users may also imagine and create new cursors from scratch, and turn graphics and text into cursors. This package features a library of over one hundred arrows, symbols, signs, musical notes, hand signals, animals, robots, insignia, and other designs that may be used to replace default cursors. Versions for both Windows and OS/2 are included on one disk. (\$49.95) North Shore Systems, Inc., PO Box, 8687, Incline Village, NV 89450. (702)831-1108.

TEMPRINT

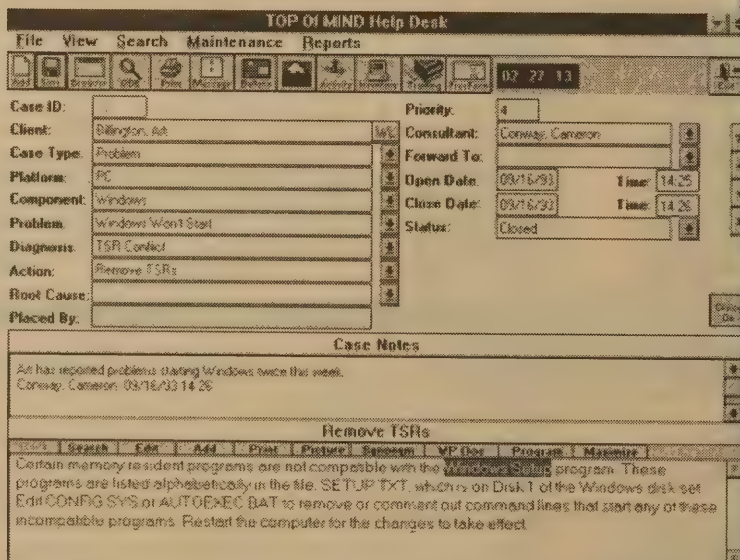

TempPrint is a universal printer driver designed for DOS-based portable computers. TempPrint comes with a universal cable kit designed to

meet the expanding needs of mobile computer users. The drag-and-drop interface simplifies the tasks required to effectively plan and manage resources in your office. As objects are placed—such as furniture, equipment, and people—into drawings, Planix simultaneously creates a database of everything in the workplace. (\$249) Foresight Resources Corp., 10725 Ambassador Dr., Kansas City, MO 64153. 1-800-231-8574.

QUICKSEARCH

QuickSearch, dataDisc's text and image retrieval software, is designed for easy and inexpensive publishing of electronic catalogs, books, user manuals, legal or medical documents. QuickSearch

Clockwise from top: OAG FlightDisk Starter Kit; SafetyPlan Builder; Top of Mind Windows Help Desk.

meet the expanding needs of mobile computer users. This new software product combines unparalleled printing flexibility, compact packaging design, and ease-of-use. The combination of TempPrint and its cable will quickly and easily print from any DOS program, running under DOS or Windows to almost any character or laser printer. It is not even necessary to know the brand or model of the "temporary printer." TempPrint comes with a thirty-day full money back guarantee if the user is not completely satisfied, and a ninety-day product warranty. (\$69.95) Perini Software Corp., 4755 Alla Rd., Marina del Rey, CA 90292. 1-800-631-4141.

PLANIX FOR WINDOWS

Planix: Visual Office Management software for Windows is designed to let large and small businesses automate the management of an office and its contents. It integrates drawing, database, and spreadsheet functions in an easy-to-use, graphic layout format. Planix makes it easy for the user to draw and plan office space through its AutoLayout tools and equipment configu-

is a DOS-based product that has the look and feel of Windows, yet does not require Windows to work. QuickSearch lets the user perform single and multiple word searches, wildcard searches, and proximity searches. Users can also search for images and display its associated text. Other features include word lists, history lists (past searches), and hit lists. Full-color or black-and-white images have unlimited zooming capabilities. An elec-

OAG FLIGHTDISK STARTER KIT FOR WINDOWS

This software sample kit gives frequent travelers direct access to comprehensive information on all commercial airline flights in North America, any time, from any place. Using the same database as trav-

el agencies, users can quickly and easily check up-to-date information on departure and arrival times, seat availability, fares, restrictions, type of plane, weather, hotels, restaurants, distances from airports to cities, ground transportation, and more. The kit provides a sampling of OAG (Official Airline Guide) services for an introductory period at a nominal price; customers can continue to use the OAG system by subscribing to any or all of the three OAG services, which include OAG FlightDisk, OAG FlightFax, and OAG Electronic Edition Travel Service. (\$39.95) Microlytics, Inc., Two Tobey Village Office Park, Pittsford, NY 14534. (716)248-9150.

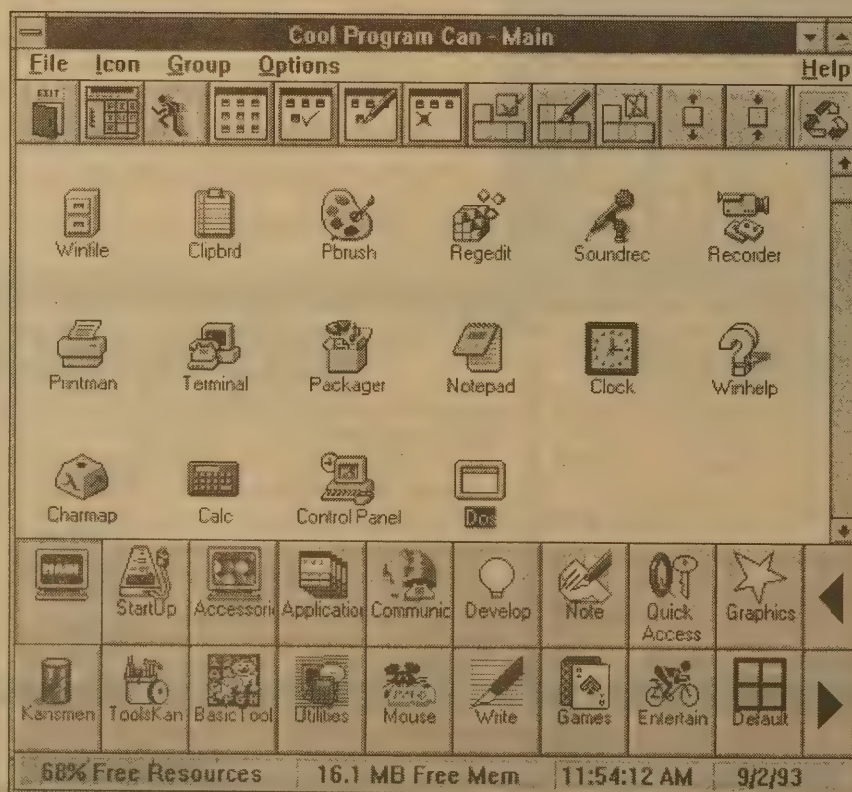

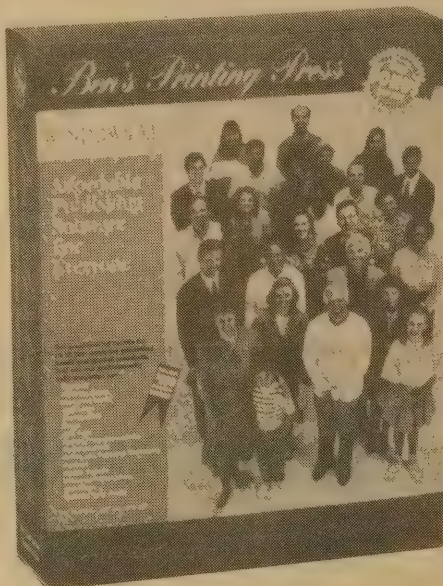

SAFETYPLAN BUILDER

SafetyPlan Builder is an expert information software package that helps businesses create a complete written safety plan that meets state and federal OSHA standards. By first interviewing the users, it gathers all the information needed so it can search and retrieve the necessary OSHA requirements of the user's industry and location. It also references a collection of over four hundred pages of text detailing state and federal OSHA as well as industry specific safe work practices standards. The manual not only assists the user in running the program, but also acts as a source book

about the process of safety planning and dealing with OSHA. (\$139) Jain Tools for Sales Inc., 127 Second St., Los Altos, CA 94022. 1-800-346-5426.

TOP OF MIND WINDOWS HELP DESK

Top of Mind Windows Help Desk helps users in customer service departments to diagnose and solve their customers' problems. By analyzing, compiling statistics on, routing, and tracking problem calls, it helps users troubleshoot, improve efficiency, and set customer service training priorities. The software features a central, self-organizing database with which users train themselves to use Top of Mind Windows Help Desk. Other features are online hypermedia to store text, graphics, and charts; both quick and in-depth search functions; and inventory and updating functions which automatically share information from one workstation to the entire system. Corporate MIS, telemarketing, and sales departments can also use the software. (\$4500 for a single workstation, \$22,500 for a 15-user LAN version of the installed software) The Molloy Group, Inc., 90 E. Halsey Rd., Parsippany, NJ 07054. (201)884-2040.

PRINTAPLOT PRO

PrintAPlot Pro, standalone TSR plotter emulation software, incorporates an ADI (protected mode) driver that enables users to plot to more than 1200 laser, ink jet, PostScript, and dot matrix printers, at resolutions from 75 to 600dpi, while still inside AutoCAD. With PrintAPlot Pro, all CAD and graphics software users can now convert HPGL/2 as well as HPGL files, preview each plot before printing (including tiled output), and print continuous long plots. Working entirely in the background in AutoCAD, only a spinning cursor at the bottom of the screen lets users know that PrintAPlot Pro is working. It also includes support for 255 pens, with any pen being able to select from a palette of 255 AutoCAD or HPGL/2 colors. Users can

change pens or line widths, patterns and colors, tile "A" or "E" size drawings, adjust plot scaling or rotation,

BAYWARE POWER JAPANESE FOR WINDOWS

Power Japanese is a multimedia language course that lets users teach themselves basic spoken and written Japanese using their own desktop or laptop PC. It features a ten thousand-word online dictionary, a Japanese language text editor, and a learning module, Voicetrac, that lets you tailor the course to suit the way you learn best. Available from any part of the program, the new dictionary lets you look up meanings both ways—from Japanese to English and vice versa. By actively involving the learner—in listening, speaking, reading, and writing—Power Japanese forces greater retention of new knowledge, while still holding interest over the long-haul necessary to learn a foreign language. (Available on CD-ROM, 3.5" or 5.25" disks, \$389) BayWare, Inc., 1720 S. Amphlett Blvd., Suite 205, San Mateo, CA 94402. 1-800-879-7899.

CYBERMEDIA MULTITALK FOR WINDOWS

MultiTalk translates all menus and dialog boxes of any Windows program—including Windows applets such as File Manager and Write—into Danish, Dutch, American English, English, Finnish, French, Canadian, German, Icelandic, Italian, Norwegian, Portuguese, Spanish, and Swedish. Software developers and publishers may use MultiTalk to quickly and easily convert an application into a second, third, or fourth language, without time-consuming and labor-intensive reengineering and translation costs. Users may easily convert the native-language original of a program, saving the substantial cost differential typical of an international version of the same software. (\$189.99) CyberMedia, Inc., 1800 Century Park E., #1145, Los Angeles, CA 90067. (310)843-0800.

DIS PROJECT NAVIGATOR

Project Navigator is designed to meet the document tracking needs of construction professionals. It provides a means to generate, track, log, and communicate every piece of documentation that is used on a project, including transmittals, RFIs, drawings, change orders, correspondence, and specifications. It also allows you to build lists of everyone involved in the project—their names, company, address, phone, and fax numbers. They can be grouped and sorted in any way you want and selected to automatically receive specific documents which you identify. Running under Windows, you can simultaneously view multiple projects and move data between them. Project Navigator also provides a seamless link to popular word processors and links data automatically to those documents. Diversified Information Services, Inc.,

4370 Tujunga Ave., Suite 130, Studio City, CA 91604. (818)506-7265.

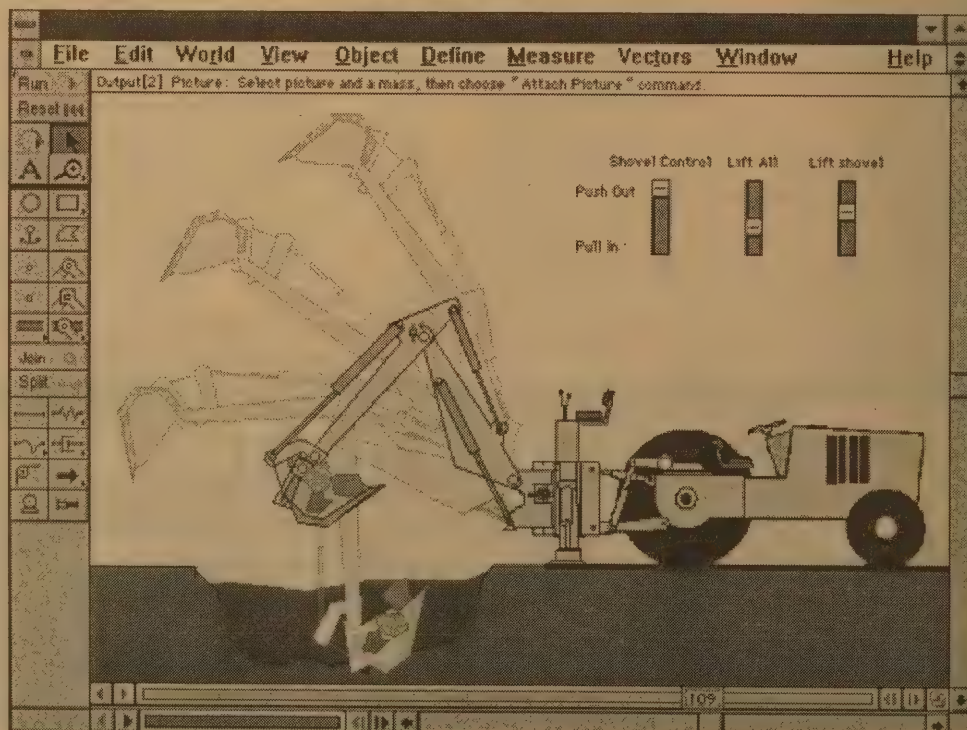

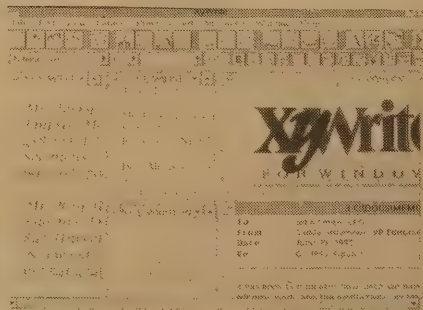

COOL-COOL-CAN

Cool-Cool-Can, a desktop manager for Windows, provides easy desktop and file management. Features include a simple layout designed for groups and icons that eliminates confusing MDI icons and windows; graphical file viewers which allow you to quickly view a file's contents without launching the application; and instant access to all applications. It operates on any PC running Microsoft Windows. (\$99; special introductory price, \$59) Kansmen Corp., PO Box 360070, Milpitas, CA 950036-0070. (408)263-9881.

BEN'S PRINTING PRESS FOR WINDOWS

This affordable, easy-to-use desktop publishing program is for office or home PC users. You can design new greeting cards, certificates, stationery, posters, business cards, calendars, banners, flyers, and more. It features sixteen TrueType fonts and supports bit-mapped, Encapsulated PostScript, and Picture Graphics color printing as well as black-and-white Picture Graphics printing. Other features are a cut-and-paste clipboard for transferring text and images between applications, and a grab-and-drag tool for easy

The first new idea in business communications since e-mail

THE FIRST CORPORATE OPERATING SYSTEM.

Introducing WordPerfect® Office 4.0.

Large or small, local or global, companies operate on meetings. Memos. Deadlines. And paperwork, paperwork, paperwork.

But now there's a new system — a single, cross-platform workgroup application that can handle all your internal business operations and communications electronically. It's WordPerfect® Office 4.0, the first operating system for companies.

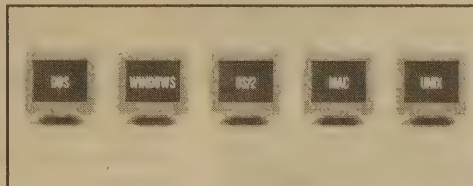

E-mail isn't enough anymore.

WordPerfect advances the technology of e-mail by "mail-enabling" a lot more than just messages. It also automates all the basic, relentless stuff of business like calendaring, scheduling and task management. All for the price of e-mail alone.

You make the rules.

WordPerfect Office lets you control how information reaches you, and where it's filed and routed. It lets you or your proxy quickly check scheduling conflicts on other calendars in the network. And only WordPerfect Office 4.0 has groundbreaking e-mail features like Out Box, which lets you track — and even retract — messages.

Simplified administration across platforms

WordPerfect Office 4.0 is a highly capable cross-platform package, for small or large LANS and WANS. It can support communications on Windows, DOS, Macintosh, UNIX, OS/2 and VAX/VMS and offers multiple gateways.

A new standard in electronic messaging.

By integrating a best-of-breed e-mail system with calendaring, scheduling, task and workflow management WordPerfect Office 4.0 can do a lot to upgrade your own office's operating system. See how by contacting the reseller listed below today.

sizing of images and documents. Ben's Printing Press complements the more than fifty standard templates built into the original DOS version, which includes hundreds of fonts, clip art, pictures, borders, and text for customizing them. (\$59.95) Owl Software Corp., 7633 Fulton Ave., North Hollywood, CA 91605. 1-800-432-4695.

WORKING MODEL FOR WINDOWS

Working Model for Windows provides engineers, animators, and designers with an easy-to-use tool for motion simulation and analysis. Motion simulation gives engineers an intuitive feel for their design's performance and lets them quickly visualize their finished products under a wide variety of conditions. Creating mechanical systems by graphically building objects or importing them from a computer-aided-drafting program, Working Model assigns them real physical properties like mass, friction, and elasticity. You then run simulations on these

these mechanical systems. It also has a complete set of measurement tools for data analysis. (\$995) Knowledge Revolution, Inc., 15 Brush Place, San Francisco, CA 94103. (415)553-8153.

XYWRITE FOR WINDOWS

XyWrite for Windows is a word processing program for serious writers. It combines customization options, ease-of-use, and speed. Writers can view and edit documents in four different ways, one of which has an expanded view. The expanded view reveals to you every code, including all formatting commands. XyWrite is completely customizable, from menus and dialog boxes to screen colors and cursor size. You can undelete a string of recent commands to retrieve a paragraph you mistakenly deleted ten minutes ago. Straightforward keyboard commands such as "find" and "set right margin" reduce keystrokes and mouse clicks. You can also edit program files or documents in other applications directly from within XyWrite. (\$495) The

Technology Group, 36 S. Charles St., Baltimore, MD 21201. (410)576-2040.

MYCHARTS

MyCharts makes creating presentation charts simple, easy, and affordable. To create a bar graph, for example, just type the data under each bar. The graph automatically grows. You can switch between twelve chart types, in 2-D or 3-D, with a click of the mouse. You can customize MyCharts charts by importing clip art images in a wide variety of formats. Your charts can be easily pasted into most word processing programs. With MyCharts, you can combine text, graphics, and clip art into colorful impressive presentations. (\$24.95) MySoftware Co., 1259 El Camino Real, Suite 167, Menlo Park, CA 94025. (415)325-9383.

QUICKVIEW

QuickView is a Microsoft Multimedia Viewer compatible application. It allows creators of Windows-based multimedia CD-ROM titles to develop titles that will play on both Macintosh and Windows. QuickView includes all the features of Altura's QuickHelp, online help system. Additional features are support for Macintosh sound files and Windows .WAV files, embedded panes and windows, full text search and retrieval, external commands, and support for QuickTime and AVI movies. (\$495 for the development kit, \$995 for licensing of non-commercial titles, \$2500) Altura Software, Inc. 510 Lighthouse Ave., Suite. 5, Pacific Grove, CA 93950. (408)655-8005.

XL8 CODE

XL8 Code allows you to translate software source code—the instructions written by the programmer—from English to French or another foreign language. Software vendors can also use XL8 to translate instructions for computer users in another language. XL8 Code extracts text from a variety of operating systems as well as computer languages. Using fuzzy logic, literal translation, proof-reading features, and glossaries, it translates the text. XL8 Code gives you powerful keyboard editing tools and file management tools for large multifile, multilanguage projects. (\$1995 for XL8 for Managers; \$595 for XL8 Professional; \$200 for individual translator station software) GlobalWare, Inc., 10474 Santa Monica Blvd., #304, Los Angeles, CA 90025. (310)441-1024.

INCREDIBLE SELECTION

DISK DRIVE DEPOT

GREAT PRICES

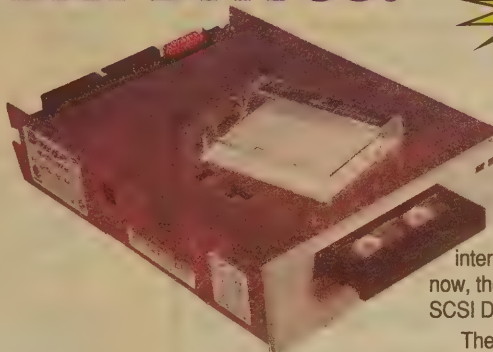

PROFESSIONAL SERVICE

Micropolis Monster

Files just keep getting bigger and bigger! How much space is free on your drive? Don't worry! Our prices on really big drives are getting lower and lower! The Depot's special purchase offers you this **NEW, One Gigabyte, SCSI-II** Micropolis 1598-15 drive for only **\$795!** With a 14.5ms access time and 1GB formatted storage space this internal drive is perfect for those huge spread-sheet or graphic files. Drop in and pick up your drive today! The supply is limited.

Dynamite DAT Drives!

\$495

Store up to 2000 megabytes on a DAT tape the size of a matchbook! DAT drives offer unbeatable performance and reliability. DAT tapes are super inexpensive and extremely rugged. For serious backup and data interchange, DAT is the only solution. 'Til now, the only problem has been the price. SCSI DAT drives typically cost \$1500 or more.

The Depot has purchased a quantity of Wangtek factory refurbished drives at unheard of prices. These drives are guaranteed to meet or beat new drive performance specifications and are available at the fraction of the cost of a new drive. Try this drive on your system. You'll be amazed at the performance and convenience DAT has to offer.

CD-ROM Drive Explosion

You asked for them - we found them at bargain prices. The Disk Drive Depot now has a complete selection of CD-ROM drives in stock. These pictured photo CD compatible NEC CDR 73 and 83 CD-ROMs start at an amazingly low \$189 for the internal model. You need a CD drive to take advantage of all the latest software. We have multimedia CD-ROMs starting at **\$149!** Multi-session, MPC, multi-spin, all the latest and fastest CD-ROM technology can be yours! Call or drop by the Depot today and pick one from our huge selection.

CD-ROMs AS LOW AS \$149!

Mac-Compatible SCSI OCR Scanners

Tired of typing? Disk Drive Depot makes OCR technology affordable! Abaton uses modern one-bit technology coupled with OmniType software to create the ideal

\$249

document scanning package for Macintosh applications.

MegaViews

American
Megatrends

- Did You Know!!

• In the January issue of PC Sources, the four top ranked systems all used the SuperVoyager motherboard from American Megatrends.

"When it's all said and done, the biggest difference between motherboards and between systems comes down to chip design."

"Among the 11 reviewed systems, five chip set vendors are represented: American Megatrends, Micronics, Opti, SIS and VLSI. Of these, without a doubt, the most efficient design is American Megatrends."

UPGRADING YOUR SYSTEM? GO US MACH! BEST PRODUCT, PRICE, QUALITY, SERVICE!

Add and subtract to make your dream machine!

READY TO GO

7 bus-mastering slots with 3 VLB extensions, memory upgradeable to 32MB, ZIF socket for easy CPU insertion & removal and future P5 Overdrive support, U.S. made quality motherboard, 2.88M future floppy drive and hi-speed 16550 UART on COM1 & COM2 for smooth serial port transmission. You can pay ordinary price, but you can't get this extraordinary system anywhere!

New AIR VLB motherboard with built-in VLB-SCSI-2 featuring Adaptec 6260 Chipset for 100% software support guarantee, VLB IDE & Floppy Interface, plus 2S/1P/1G - all built-in quality! We add new Western Digital 420MB IDE super-fast harddrive, Diamond Viper VLB with 2MB VRAM and 15" full screen digital controlled monitor. Another quality state of art from UMIrac!

[illegible]

P5 comes! For those of you who need ultimate PC power, this is the choice. 512K secondary level 15NS Cache, VLB IDE, FD and I/O built-in. 16MB, 540MB 128K cache! And a perfect matched Diamond Stealth P VLB and the 17" Full Screen Digital Control KFC monitor. Ready for any graphic/scientific intensive work!

- Intel® 80386SX 5 Slot VLB 28C+ Cache Multibus-PC
- Intel® 70ns FPM SRAM RAM
- QJ Access Fast SCSI-2 VLB Controller
- With VLB H.E., FD and 2S/T/P/Q
- CD-ROM & 1.44M TFAD floppy Drives
- 2x 3GB Toshiba SCSI-2 MK-537HS Cache Harddrive
- Premium XM 340TH SCSI-2 256K CD-ROM
- Diamond Super VLB 2MB VRAM Wadtek 9000 ChipSet
- G.D.C. 17" 1280x1024M Multisync Digital Monitor
- Premium Full Tower 200W PS
- QJ1 Keyboard

8 full EISA bus-mastering slots with 3 VLB extension, memory upgradeable to 256MB using 72Pin SIMM, ZIF socket for easy CPU insertion & removal and future P5 Overdrive support, U.S. made quality motherboard. Compare this to AMI or Micronics and you see no reason to spend five hundred dollars for just the name! We add Viper VLB to make this machine fly further high!

- ☒ 30 Day Money Back Compatibility Guarantee on Systems

oes - sell computers and you got lots of choices, right?

(Wrong!) You have only one choice if you want it to be a great choice! Buying a PC is not merely pulling the lever for a machine and looking to C prompt. To achieve the optimized performance from a cost effective point of view, you need to know exactly how each component behaves, understand their characteristics and compatibility. At Umiracle, we keep searching and testing everyday, until you want latest cost-effective technology at the best price, you have only one choice. Please, no-guessing, give quotation.

As impressed and appreciated their technical expertise. This is the only technically sound PC store! Remember, selling a PC is not like selling eggs in supermarket, knowing what they are selling counts! Afterall, who can answer questions like: "co-existence of IDE and SCSI," difference between DX and DX2," VESA mode and VESA LOCAL BUS." Nobody beats them in BayArea, nobody!

You can buy a cheap PC anywhere! But if you want to buy a low cost, best value PC, this is the only choice. They are the true technology leader, combining state-of-the-art electronic arts the best cost-effective way. Don't even think about Circuit-XXX, CostXX, Radio Shack, or anywhere else!

I have been to at least 20 PC stores for shopping my ten gram PC, this is the only store that gave all my answers and impressed me by how well they organize, how much they know what they are selling! And of course, bought from them.

Best pricing, trouble-free products, on-time delivery, and the best price I bought 50 systems for my company from them, and they have been working fine. Next 50 will of course be theirs.

Robert M. Linder, Sunnyvale

Wide product choices

Technical expertise, thorough

hardware testing, on-

time delivery. You can

compare, but you will

ultimately come to us

Guarantee!

Don't just blindly look for lowest price! It makes no sense to buy an VLB system without harddisk controller and video card on VLB. You aren't taking the advantage on the VLB! Be careful, from time to time, you would see ads selling cheap VLB without real controller and video card. Don't take the bait! Or you end up losing money to upgrade.

HP OMNIBOOK 425

The new OmniBook 425 is a 2.9lb., 25MHz 486-based portable PC with a full-sized keyboard and a suite of Windows applications built in. It has a 9" enhanced reflective display, one PCMCIA hard disk or flash disk drive, and can run on four AA batteries. The OmniBook 425 incorporates Windows 3.1, HP's personal information management tools for the creation and communication of information on-the-go, and popular Windows applications, including Word for Windows 2.0 and Excel 4.0. Because the built-in software operates in ROM and uses self-refreshed DRAMs, the OmniBook features instant-on and one-touch task switching. Extensive communications capabilities include LapLink Remote Access PC-linking software, and optional fax/modem. (OmniBook 425 with 40MB hard disk, \$2125 or with 10MB flash disk, \$2375) Hewlett-Packard Co. Inquiries, 1000 N.E. Circle Blvd., Corvallis, OR 97330. 1-800-443-1254.

CYPRESS 820 DOCKING STATION

Adding greater functionality to its 820 Local Bus Notebook, Cypress Computer offers an optional docking station that includes two 32-bit VESA local bus slots and two 16-bit ISA slots. It has a built-in SCSI interface for an internal SCSI CD-ROM, an internal 3.5" full-height SCSI drive of up to 2GB plus a pair of stereo speakers. There is also an external 25-pin SCSI port to daisy-chain up to seven devices. When you can install an ISA or VESA Local Bus card in the docking station for use with an external monitor, the notebook's internal video card is disabled automatically. With a simple pull on a lever the notebook is released and you are ready to travel. (\$530) Cypress Computer, Inc., 26120 Eden Landing Rd., Hayward, CA 94545. (510)786-9106.

TI INTELLIGENT DOCKING SYSTEM

With the TravelMate Intelligent Docking System users can have the best of both notebook and desktop computing in a single system. The Load/Eject feature makes connecting a TravelMate notebook as easy as loading a videotape into a VCR. Designed for all TravelMate's with QuickPort connections, the system's expansion capabilities include three full-size and three half-size 16-bit ISA card slots; two 3.5" and two 5.25" internal drive bays (SCSI II compatible); two PCMCIA

Type III card slots; and interfaces including parallel, serial, VGA monitor, PS/2 mouse, keyboard, RJ-11 jack, and game port. (\$849)

VAR 486SLC-33MHZ COLOR NOTEBOOKS

The VAR 486SLC-33MHz Dual Scan Color Notebook offers dual scan color on a 9.5" screen while the VAR 486SLC-33MHz Active Color Notebook offers TFT active color technology on an 8.5" screen. Both models are based on the Cyrix 486SLC-33MHz chip, and come with 4MB of RAM and a 200MB hard disk. The SCSI port enables users to access and up to seven SCSI devices, including a CD-ROM drive and a scanner. In both models MS-DOS 6.0 is installed as well as support for 256 colors at 640 x 480 resolution graphics. Options include a fax/modem, a second RS-232 serial port, trackball, and Ethernet 10BaseT. (VAR 486SLC-33MHz Dual Scan Color Notebook: \$2350; VAR 486SLC-33MHz Active Color Notebook: \$3299) Logisys, Inc., 4749 E Wesley Dr., Anaheim, CA 92806. 1-800-333-5679.

IBM THINKPAD 750 SERIES

The ThinkPad 750 line of notebook computers support wireless communications, speech recognition, and on-screen television. Powered by a 486SL/33MHz processor, users can select a 170MB or 340MB hard disk drive and up to 20MB of RAM. They contain a 16-bit stereo audio subsystem, a high-fidelity speaker, and input/output jacks capable of supporting microphones, headphones, or portable stereo speakers. If you need greater multimedia capability, a portable docking station is available. The station provides full-motion video, built-in stereo speakers, and expansion for mass storage devices including CD-ROM. Its 6lb. weight and integrated handle make it light and easy to carry, even with the notebook locked in place.

Top to bottom: Cypress 820 Docking Station; the Omnibook 425 from Hewlett-Packard; the VAR 486SLC-33MHz Color Notebook; TravelMate Intelligent Docking System from Texas Instruments.

(ThinkPad 750 active matrix color notebook with 170MB hard disk, \$4699) IBM Corp., 1133 Westchester Ave., White Plains, NY 10604. (914)766-1425.

Macintosh Software

APPLE PHOTOFLASH

PhotoFlash is designed to help users of page layout and presentation software quickly and easily access, enhance, and place photos in documents. It has three key components: an integrated browser that simplifies selection of images, photo preparation tools that enhance images, and scripting capabilities that place images into popular page layout applications and automate routine tasks. PhotoFlash is optimized to manage digi-

tal images, requiring less memory and disk space. It also comes with integrated image compression technology and a selective compression feature that allows users to compress different areas of a photo and different levels. PhotoFlash accepts Photoshop plug-in modules and can be accelerated by PhotoFlash compatible accelerator cards. (\$279) Apple Computer, Inc., 20525 Mariani Ave., Cupertino, CA 95014. (408)996-1010.

PIXAR SHOWPLACE 2.0

Showplace gives Macintosh users an easy, visual way to compose and produce high-quality 3-D pictures without using complex modelers. It was designed to allow users to easily access the power of

Left: Pixar Showplace 2.0; Below: DeltaGraph Pro 3 from DeltaPoint, Inc.;

RenderMan. Version 2.0 increases the universe of available predesigned shapes for picture-making by accepting DFX (AutoCAD) models in addition to RIB (RenderMan) models and by supporting an open environment for the development of RIB plug-ins. Included with Showplace is MacRenderMan and NetRenderMan. NetRenderMan allows users to distribute images to be rendered over a network of Macintosh computers. Three server licenses for NetRenderMan are included with Showplace 2.0. (\$695; CD-ROM version, \$495) Pixar Corp., 1001 W. Cutting, Richmond, CA 94804. (510)236-4000.

SOFTWARE SOLUTIONS TERRITORY MANAGER

The Territory Manager is designed for sales reps that spend most of their time in front of prospects, and whose office may be the car, the prospect's office, or even the airport waiting lounge. Using point-and-click menus, it streamlines the most tedious chores faced by outside sales reps, including record keeping, call management, and appointment scheduling. The program also features powerful analysis tools that provide feedback on sales effectiveness, and indicate where efforts should be made to bring the greatest sales increase. Territory Manager can be tailored to meet the particular needs of a company or individual through Software Solutions customization services. (\$295) Software Solutions, Inc., 6404 E. Oak St., Evansville, IN 47715. (812)477-3181.

WIN2MAC

Win2Mac, a cross-platform porting technology for Windows developers, implements the Windows 3.1 application programming interface (API) as a Macintosh library. This allows Windows developers to work with a single set of existing Windows source code to recompile and build Macintosh applications. Developers are able to port applications while working in the native Macintosh development environment because the Win2Mac library works with both the Macintosh Programmer's Workshop (MPW) and Symantec ThinkC. Altura Software, Inc., 510 Lighthouse Ave., Suite 5, Pacific Grove, CA 93950. (408)655-8005.

Are You Suffering From Computer Anxiety?

- Should I buy ISA, EISA, VESA or PCI?
- What's the difference between DX2, DLC, SLC2...etc?
- Is the Pentium Processor running at 60MHz or it is also a clock doubler?
- Is PCI supposed to be faster or slower than VESA Bus?
- Is the P24T OverDrive the same as the Pentium Processor?
- What the heck is a "Green PC", and do I need it?

That's it, I've had enough,
I am just gonna call NOW
and get it over with.

The Latest in Technology...

Intel Pentium Processor
PCI Local Bus
75MHz Clock Tripler
IBM Blue Lightning
Green PC's

Challenger PCI

Challenger PCI is a lightning fast system that is guaranteed to deliver the ultimate performance of the Pentium and PCI Technologies. The Challenger incorporates a motherboard that is designed and manufactured by the inventor of PCI/Pentium-Intel Corporation, and a video Card (Viper PCI) designed and manufactured by the leader of graphics accelerator boards Diamond Computer Systems.

Performance That Will Take Your Breath Away!

Intel Pentium/PCI Motherboard
64-Bit Pentium-PCI Architecture
Diamond Viper PCI 84M WinMarks

- 60MHz Intel Pentium Processor 16K Cache
- 64-Bit Intel Pentium /PCI Motherboard
- 256KB Direct mapped, write back cache

Macintosh Software

CYPHERPAD

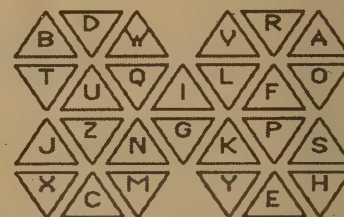

cypherPAD, a privacy and locking program, combines a unique sign-in, on-screen alphabetic keypad with usrEZ's privacy software features and technologies. Using a distinctive, alphabetic keypad that's familiar and easy to use, the user securely enters passwords on the computer screen. The mouse pointer and mouse button are used to select/enter password characters on the keypad. If viewed by others, even from a slight angle, the keypad characters are impossible to distinguish. For additional viewing privacy, keypad alphabetic characters change randomly, and with a change rate established by the user. cypherPAD provides options for nine keypad locations, for either twenty-six or fifty-two alphabetic buttons, and for three keypad sizes. (\$49.95) usrEZ Software, Inc., 1881 Von Karman Ave., Tower 17, Suite 1270, Irvine, CA 92715. (714)756-5140.

DELTAGRAPH PRO 3

This software allows you to create charts, graphs, and tables on the Mac. Used by people in engineering, marketing, research, and finance, DeltaGraph Pro 3 delivers fast, professional-looking results. With its formatting options, you can create more than two hundred different chart styles. DeltaGraph's Chart Advisor will even recommend the best chart to use. You can import data into the software from a wide range of applications. AppleScript and Frontier support allows you to automatically pass data from Excel or FileMaker to DeltaGraph Pro 3, create a chart in the background, and return the data to your application. You can crunch your numbers with more than forty mathematical and statistical functions, including logarithmic scaling, control curve fitting, and XYZ coordinates. (\$195) DeltaPoint, Inc., 2 Harris Ct., Suite B-1, Monterey, CA 93940. (408)648-4000.

BUYERS GUIDE

Macintosh Hardware

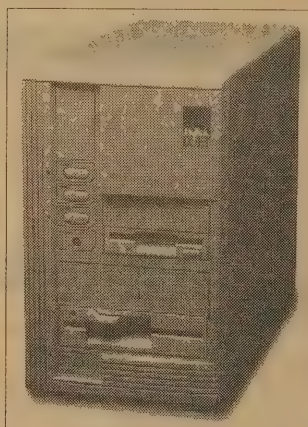

PLI DAT 10GB

In response to the need for faster network backup solutions, PLI introduced the PLI DAT10GB. Compatible with the latest DAT format, DDS-2, this new drive delivers twice the capacity and performance of the older PLI DAT 5GB. It is compatible with 60-meter, 90-meter, and 120-meter 4mm DAT cartridges. PLI bundles this drive with Retrospect Remote backup software by Dantz Development Corp. Use of standardized DDS, DDS-DC, DDS-2, and DDS2-DC recording formats means that previously backed up files on older cartridges can be accessed by the PLI DAT 10GB. (External drives, \$2422. Internal units for the Macintosh Quadra 950 and Apple's Work Group Server 95 are available for \$2228. PLI 120-meter DAT media is \$46) Peripheral Land, Inc., 47421 Bayshore Pkwy., Fremont, CA 94538. 1-800-288-8754.

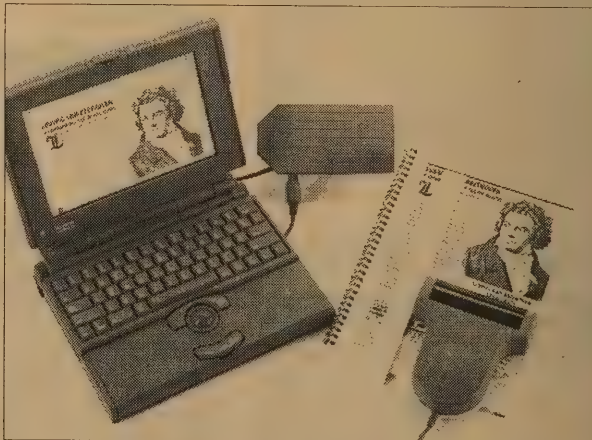

LIGHTNINGSCAN PORTABLE

LightningScan Portable, for the Macintosh PowerBook and undocked Duos, is a completely portable scanning system, weighing about 11lb. Requiring 4MB of RAM, it uses a small serial interface which runs at over three times the speed of

AppleTalk. LightningScan Portable includes ThunderWorks' software for image editing and optical character recognition. This software lets you edit and print in grayscale without requiring a grayscale monitor. The Scan & Join Option provides full-page scanning by joining

Left: the NuTek Duet; Below: ThunderWorks LightningScan Portable.

multiple scan passes without distortion. ThunderWorks also features brightness and contrast controls, image calibration, unlimited resizing options, PostScript support, and saves images in all popular file formats. With Thunderware's OCR software, the resulting text can be used in most word processing and spreadsheet formats including MS Word and Excel, WordPerfect, and many other programs. Thunderware, Inc., 21 Orinda Way, Orinda, CA 94563-2565. 1-800-628-0693.

LOGITECH TRACKMAN

The TrackMan stationary desktop mouse has been redesigned to conform more closely with the human hand, featuring advanced ergonomic styling and precision control. It includes MouseKey v1.2 software for greater cursor and tracking control, and offers users the ability to assign different tasks to the buttons, such as the double-click feature, for faster and easier computing. (\$139) Logitech, Inc., 6505 Kaiser Dr., Fremont, CA 94555. 1-800-889-0063.

FWB HAMMER•PE

The Hammer•PE offers a cost-effective solution for increasing storage capacity while providing a high-quality drive. The Hammer•PE line of SCSI-2 hard drives comes in capacities ranging from 170MB to 545MB. Each drive comes with Hard Disk Toolkit•Personal Edition, the entry-level version of FWB's Toolkit software. (Hammer•PE 170, \$529) FWB, Inc., 2040 Polk St., Suite 215, San Francisco, CA 94109. (415)474-8055.

MOUNTAINGATE INCREMEG REMOVABLE DRIVES

IncreMeg, removable, transportable 3.5" hard disk drives, are designed to safeguard and keep intact large amounts of data that eclipse the capacity of standard disk drives. It lets you safely store and transport your data-intensive projects such as multimedia presentations, digital films, archives, and records. The half-height model holds up to 1GB, while the larger model stores up to 12GB. IncreMeg hard drives feature patented methods of shock isolation and data protection to guarantee safe travel. They are compatible with most computers and are available as internal and desktop models. MountainGate Data Systems, Inc., 1110 W. Taft Ave., Orange, CA 92613. (714)998-6900.

NUTEK DUET

The NuTek Duet lets you run Macintosh and PC software on a single machine. With the push of a button you can switch between your favorite Mac and Windows, DOS, or even UNIX applications. While

you are working in one environment the Duet is still processing the other in the background, with no slowdown in performance.

It contains both an Intel 33MHz 486DX and Motorola 33MHz 030 with a 68882 numeric coprocessor. Each CPU comes with 4MB of RAM and an 80MB hard disk.

Both systems share a 1.44MB, 3.5" floppy disk drive, and two expansion bays (3.5" and 5.25"). NuTek USA Corp., PO Box 160505, Cupertino, CA 95016; (408)973-8799.

Printers & Scanners

XEROX PERSONAL PRINTER 4004

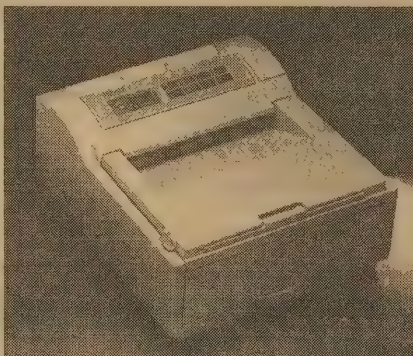

The Personal Printer 4004 is a low-cost personal printer that uses advanced ink-jet technology and operates at rates faster than most home printers. Because of the design of its print head, this 300dpi printer produces two lines of text or graphics on a single pass, enabling it to yield approximately three pages of text per minute. It is equipped with an integral one hundred-page automatic sheet feeder that handles paper ranging in weight from 16 to 24lbs. Odd-sized paper and envelopes are easily accommodated through a manual bypass, which is activated in a simple, front-located, one-step operation. (\$299) Xerox Corp., Xerox Sq.-05B, Rochester, NY 14644. 1-800-ASK-XEROX, ext. 4004.

images on various types of paper, card stock, envelopes, and overhead transparencies. The model has a print speed of up to 382 characters per second and 360dpi raster graphics resolution. Small (12.8" x 5.5" x 6.9"), lightweight (5.5lbs), and quiet (45.5 dba), the SJ-144 utilizes a heat fusion printing process that produces smear-resistant images. Standard features include three paper paths, sophisticated fonts, and multiple printing modes such as zoom. The SJ-144 is for use with MS-DOS- or Windows-based PCs. (\$599) Star Micronics America, Inc., 420 Lexington Ave., Suite 2702, New York, NY 10170. (212)986-6770.

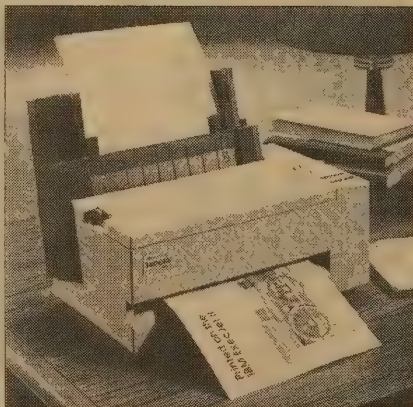

CANON LBP-430

This full-featured, energy efficient Canon laser printer is ideal for the small-business and home office consumer. It comes standard with scalable fonts, compatibility with HP LJ-IIP (PCL 5), Automatic Image Refinement technology, and 1MB of RAM. The laser printer uses Canon's superfine toner for refined text and graphics, and incorporates Canon's new on-demand fuser engine designed for energy efficiency and savings. In addition to 300dpi resolution and printing speed of four pages per minute, Canon provides a two-year warranty. (\$799) Canon Computer Systems, Inc., 2995 Redhill Ave., Costa Mesa, CA 92626. 1-800-848-4123.

OKIDATA OL400E

The OL400e 4ppm, laser-quality printer is ideal for the individual or small work-group using PCs. Measuring only 1.25' square, it offers better print quality, faster speed, and lower operating costs than ink jet printers. Print drivers for Windows, Microsoft Word, WordPerfect, and Harvard Graphics are included as well as four typefaces and forty-four fonts. The built-in one hundred-sheet adjustable paper tray holds a variety of paper sizes. The OL400e also has a manual feed for labels, envelopes, and legal-size documents. It comes standard with 512K of memory, upgradable to 4.5MB. It also has an electronic cleaning and recycling system to reduce toner waste. (\$699) Okidata, Inc., 532 Fellowship Rd., Mount Laurel, NJ 08054. (609)235-2600.

PANASONIC SIDEWRITER

The new SideWriter is a line of 4ppm, 300dpi, upright, laser-quality printers with a small desktop footprint. The printers stand 14" high, and take up .52 sq. ft., a space slightly larger than a standard envelope. Incorporating innovative LED printing technology, the SideWriter is available in two versions—the KX-P5400 featuring Adobe PostScript and the KX-P4400 with HP's PCL4 printer language only. Both printers use parallel interfaces and work with all IBM-compatible PCs. The PostScript model has an additional option of an AppleTalk interface for use with Macintosh computers. The PostScript printer can double as a personal plain paper fax machine with the addition of the PostScript fax option.

Top to bottom: Panasonic SideWriter upright printer; Okidata OL400e; IBM ExecJet II 4076 printer

Faxes are sent directly from your software application using the same steps needed to print a document. (KX-P5400 is \$999 and the KX-P4400 is \$649) Panasonic Communications & Systems Co., Two Panasonic Way, Secaucus, NJ 07094. 1-800-742-8086.

SJ-144 PRINTER

The Star Micronics SJ-144 prints full-color and black-and-white text and graphic

IBM EXECJET II 4076 PRINTER

The IBM ExecJet 4076 printer offers an affordable monochrome ink jet printer that incorporates laser printer features such as scalable fonts, advanced flash memory, and 600 x 300 dpi printing. The ExecJet II features twelve resident scalable fonts and two resident bitmap fonts. Additional fonts can be downloaded into either the optional RAM or Flash memory. The printer is designed for quick and easy set-up and use. Built-in IBM Proprinter datastream and HP Deskjet 500 emulation provide compatibility with nearly all software applications. The "no-U-turn" paper path provides excellent paper handling reliability. (\$349) Lexmark International, Inc., 740 New Circle Rd. N.W., Lexington, KY 50411-1876. 1-800-358-5835.

Printers & Scanners

IBM 4037 5E LASER PRINTER

The 4037 5E uses a new Lexmark-designed electrophotographic (EP) print engine rated at up to 5ppm. Coupled with its edge-smoothing Print Quality Enhancement Technology, it produces superior 1500 x 300 dpi printing. It uses a 10MHz 68000 micro-processor and comes with sixteen scalable

Left: HP Optiva 95R toner cartridge exchange pack; Far left: IBM 4037 5E laser printer.

International, Inc., 740 New Circle Rd. N.W., Lexington, KY 50411-1876. 1-800-358-5835.

HP OPTIVA 95R TONER CARTRIDGE EXCHANGE PACK

The HP Optiva 95R toner cartridge is a remanufactured cartridge designed to meet the print-quality standard of HP LaserJet printers. The HP Optiva 95R toner cartridge exchange packet contains everything users need to box and prepare the used cartridge for return. The package is sent to HP via a prepaid UPS shipping label. Users should receive the HP Optiva 95R in four to twelve days. The cartridge, priced 27% less than a new HP 92295A toner cartridge, is tested and backed by a ninety-

Type 1 fonts, twenty-four bitmap fonts, and supports an optional twenty-three scalable font SIMM, for a total capacity of thirty-nine scalable fonts. The 4037 5E uses an ozone-free printing process and complies with the EPA Energy Star program. The print cartridge can be returned free to Lexmark for recycling. (\$799) Lexmark

day warranty against defects. HP will also accept compatible toner cartridges made for the Canon SX engine by Apple and Canon. (\$95) Hewlett-Packard Co., Direct Marketing Organization, PO Box 58059, MS511L-SJ, Santa Clara, CA 95051-8059. 1-800-752-0900.

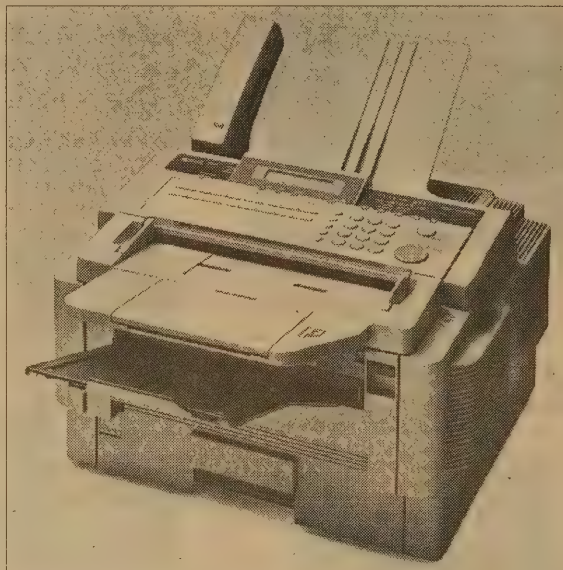

COLOSSALJET FB

The ColossalJet FB flatbed ink jet color printer is a 300dpi printer with a 48" x 66" imaging area and can print on large pre-cut or roll-fed media using environmentally safe ink jet inks and dyes. It can also print to rigid media up to 1" thick allowing direct printing onto foam core, wood, plastic, cardboard, and fabric. Interchangeable heads quickly convert the ColossalJet FB into a precision X/Y axis cutting device for vinyl cutting,

Right: Ricoh Multifunctional Fax2500L.

die making, and more. For instance, you can print to corrugated material then cut it into a box shape. This offers an ideal solution for package design and prototyping, and for small quantity custom

designs. (\$85,000) Colossal Graphics, Inc., 437 Emerson St., Palo Alto, CA 94301. (415)328-2264.

RICOH MULTIFUNCTIONAL FAX2500L

By adding an optional computer printer interface to a high-performance, plain paper fax machine, the Fax2500L is transformed into an economical and versatile multifunction peripheral. It saves desk space by consolidating two essential functions into one device, and saves money by eliminating an investment in redundant technology. The Fax2500L delivers excellent printer performance for any IBM compatible PC, at up to 10ppm and resolution of 300dpi. Emulations include HP LaserJet III Plus (PCL 5) and Epson FX. PostScript may

be added by plugging in a third-party emulation card. (The fax unit has a suggested list price of \$2955 and the printer interface option, sold separately, is \$695) Ricoh Corp., 5 Dedrick Place, W. Caldwell, NJ 07006. (201)882-2000.

Below: StudioScan from Agfa Division Miles, Inc.

AGFA STUDIOSCAN

StudioScan offers a low-cost, entry-level scanner for the office, home/small-business, and presentations graphics markets. Highlights include 300 x 600 pixels per inch (ppi) optical resolution; single pass scanning; color, continuous tone, halftone, and line art scanning modes; and a transparency

option. It is packaged with a variety of scanning software, including FotoSnap and FotoLook software drivers, FotoTuneLE color management software, and Adobe's PhotoshopLE. StudioScan is supported on both the Macintosh and PC. It includes SCSI interfaces for both platforms and a SCSI board for the PC. Agfa Division Miles, Inc., 200 Ballardvale St., Wilmington, MA 01887. 1-800-685-4271, ext. 5415.

HP SCANJET IICX SCANNER

The HP ScanJet IICx is a low-priced, high-performance color and grayscale flatbed scanner. It incorporates improved software technology and enhanced resolution that enables business and technical users to produce crisp, high-quality documents quickly and economically. A new optional transparency adapter offers added flexibility to users who work with a variety of hardcopy media, such as 35mm slides and transparencies. The ScanJet IICx comes with HP DeskScan II v2.0 scanning software that offers easy-to-use interfaces for both novice and expert users and HP's AccuPage 2.0 OCR technology. The scanner is bundled with additional software, including Aldus PhotoStyler Special Edition for Windows and Adobe Photoshop Limited Edition for Macintosh. (\$1179; optional transparency adapter is \$759; fifty-page Automatic Document Feeder is \$559) Hewlett-Packard Co., PO Box 58059, MS511L-SJ, Santa Clara, CA 95051. 1-800-722-6538.

Now View Photographs On Your Computer or TV

Kodak Photo CD Transfer Service

Now in San Francisco!

If you ever had to scan photos for use in your documents, presentations or animations, you'll love Kodak's Photo CD. You get the quality and resolution you'd get from a professional scanner costing thousands of dollars! Have your 35mm negatives or slides transferred into a Photo CD—each CD stores up to 100 images. Use the CD with your CD ROM drive on your computer to work with high-quality images in your favorite photo editing program in applications as varied as Re-Touching, Composition, Color Pre-Press or Ad Layout. It's easy to find the pictures you want, because we include an index print of each picture on the Photo CD Disc.

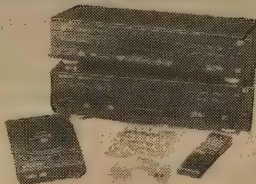

Photo CD provides a compact and cost-effective means of storing photographic-resolution digitized images. It also eliminates albums, shoe boxes and projectors, and makes the process of cataloging, organizing and watching hundreds of pictures as easy as watching TV.

Also, ask about our Photo CD players which include remote controls with advanced imaging handling capabilities like panning, autoplay and custom sequencing.

TERMS AND CONDITIONS

- One year parts and labor warranty on systems.
- Knowledgeable technical support engineers in service.
- Prices and availability subject to change w/o notice.
- Shipping, insurance and COD charges are extra and non-refundable. Prices reflect cash discounts.
- Return shipping must be insured, prepaid and bearing an RMA# on the shipping label.
- Defective items replaced or repaired at our discretion.
- No responsible for typos.
- All returns subject to 15% restocking fee and cover only Hi-Tech USA brand computers, excludes peripherals and software. No refunds after 30 days.
- Superior reputation for service, quality and value.
- Purchase orders are welcomed and subject to approval.

Telecommunications Software

BITFAX PROFESSIONAL FOR WINDOWS

BitFax Professional for Windows offers a complete fax, voice, and data communications product in a simple, easy-to-use solution. In addition to offering the ability to fax from any Windows application, its SharePort technology automatically distinguishes between fax, voice, and data calls. As an integrated solution, software conflicts that occur from using multiple communication applications are eliminated. BitFax Professional's Voice Manager can receive, log, record, play, and store personal messages, turning a PC into a personal answering machine. It also lets users create multiple personal mailboxes, each with a personal greeting. Users can password protect their mailbox and select Auto Pager, a feature that calls their pager after they receive a voice message or fax. It also includes AnyFax OCR, which converts faxes into text and supports more than ten languages. (\$129) Bit

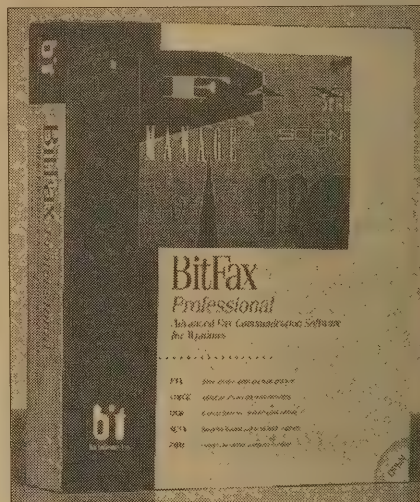

Software, Inc., 47987 Fremont Blvd., Fremont, CA 94538. (510)490-2928.

ALADDIN SITCOMM

SITcomm—Simple Intuitive Telecommunications—allows Macintosh users to easily connect to commercial online services, bulletin board services, and the Internet. Its features include automated logons, auto-expansion of compressed files, built-in compression, translation of non-Mac files, and scripting capabilities with AppleScript or UserLand Frontier. SITcomm automates logons through an Address Book that contains the user's settings for each service used. Each Address Book entry includes the service type, phone number, user ID, password, and other logon information. SITcomm also offers features for travelers and PowerBook users, including calling card

dialing and power saving enhancements. (\$120; registered users of any Aladdin commercial or shareware product can purchase SITcomm for \$39; for registered users of competing telecommunications programs it is \$49) Aladdin Systems, Inc., 165 Westridge Dr., Watsonville, CA 95076. (408)761-6200.

MicroTimes Writers' Soapbox Awards

continued from page 164

that they can spend \$16 billion on fiber-optic services—for those wealthy enough to afford them—in several limited areas of California in the next few years).

Internet to the World: For reaching beyond local dial-up, to about two million networked computers and fifteen to twenty million users, the nonproprietary, nonprofit, cooperative, public Internet is the way to go. But how to get there?

Many folks already have Internet access—at work, or in their K-12 school, or via their local college or university, or through some nonprofit organization, or in their public library, or through one of the free or hyper-low-cost community networks that are popping up all over. For those who don't—and even those who want to check into the numerous provocative internal dialogues among thousands of users, check into the WELL, Portal, and Netcom.

The WELL is one of the oldest and best-known public Internet hosts, famous for its online commentaries by numerous industry luminaries (415/332-4335 voice). Fees are \$15/month + \$2/hour (plus long-distance costs or CompuServe Packet Net at \$4/hour).

Beyond the WELL, I'm torn between Portal and Netcom—I like both of 'em.

Portal (408/973-9111 voice) has been around longer. Their rate for an individual's account is \$19.95/month with *unlimited* connect-time (plus \$19.95 one-time setup fee, plus long-distance or SprintNet access—but they have free local dial-up in San Mateo, Redwood City, Mountain View, and Cupertino).

Netcom (1-800-501-8649 voice) is comin' on like gang-busters. Their rate for a personal account is \$17.50/month on a credit card, also with *unlimited* connect-time (after a one-time cost of \$34.50 that includes the first month of service; plus long-distance or datanet access—but they have twenty-one toll-free local dial-up sites in a growing number of areas, around and beyond California).

Wireless MAN: For full-blown Internet access as a TCP/IP host—*without* paying a high-speed ransom to the copper-wire monopoly—take a look at spread-spectrum, broadcast-based Metropolitan-Area Networking via Tetherless Access, Ltd. (510/659-0809). They are about to offer 64-kilobaud Internet access for fixed fees of about \$200/month (San Francisco Bay Area)—up to perhaps \$350/month for some other areas. Beyond the Bay Area, they are planning services for the metropolitan areas around San Diego and Davis in California, as well as Washington, DC; Chicago; and Telluride, Colorado. The radio hardware currently costs about \$3000/node and a single node can serve as many host computers as

you want to connect to the 64Kb and Internet link.

Spread-spectrum technology has been around since the '70s. It's what the cellular carriers are switching to for better service, fewer disconnects, better frequency usage, and much greater privacy. Tetherless has been operating a prototype system for the San Diego Public Libraries for well over a year. *Hot stuff!*

For Internet novices: There are two books that I routinely recommend to those wanting to learn—or learn more—about the Internet: *The Whole Internet* (see next paragraph) and Brendan Kehoe's highly readable *Zen and the Art of the Internet* (112 pages, Prentice Hall; Englewood Cliffs NJ). You can finish *Zen* in a few hours, and end up with a good overview of what the Internet is, the basics of how it works, and a reasonable understanding of most of the powerful services it provides.

Net (and UNIX) books: There's a definitive source of *outstanding*, completely detailed tutorials and reference books about TCP/IP networking, the Internet, USENET, and most of the lurid intricacies of UNIX—O'Reilly & Associates, Inc. (1-800-998-9938). They are a small publisher, have carefully carved out their turf, and serve it exquisitely.

O'Reilly's 376-page, *The Whole Internet: User's Guide and Catalog*, by Ed Krol, has become the default-standard tutorial and detailed reference manual about the Internet.

Their 443-page, *!%@:: Addressing & Networks*, by Frey and Adams, is the default-standard directory and reference book for global electronic mail.

Their Nutshell series, plus a raft of other books, are the default-standard reference works for UNIX—with equally excellent books and series covering X-Window, OSE, Motif, etc.

BBSing: There is a monthly magazine that delves into BBS systems and online issues with a level of candor and bluntness usually missing from our industry's trade rags (though *MicroTimes* does permit us columnists to flame forth with—as far as I can tell—absolute freedom; *delightful!*). The laudable BBS rag is called *BoardWatch* (1-800-933-6038).

Note: Beginning in the mid-'70s, I founded half a dozen computer rags. I receive about half a dozen trade periodicals every week, and regularly scan about six of 'em. But I gotta tell ya—*BoardWatch* is the only one where I almost invariably *read* most of its non-product articles. I find that most advertising-supported rags deal almost entirely with politely phrased product presentations and reviews—toys that I endlessly covet, of course—but their non-product features often appear to be for big-buying business users (*yawn!*).

In vivid contrast, *BoardWatch* sez it like it is—

readily airing unfettered commentary-with-rationale and frothing letters and (reprinted) email from readers.

Freedom & Privacy

There's one final un-product—freeware—that I want to recommend: Phil Zimmermann's PGP (Pretty Good Privacy). It's an implementation of public-key cryptography that can be downloaded from any of perhaps fifty thousand BBSes and Internet hosts.

Public-key crypto is the best publicly known system for protecting computer files and email from unwanted snoops. It is believed to be uncrackable—which horrifies government's Big Brothers. It provides an electronic safe and an impenetrable electronic envelope.

Furthermore, it is equally useful for authenticating/verifying the authorship of a document—all via globally published public “keys” chosen by the individuals wanting such protection and authentication (each person keeps a matching private key secret unto themselves).

Phil created PGP as a personal hobby/exercise, based on globally published, public technical papers detailing how it works.

Then, in March of 1991, Phil and thousands of net users suddenly heard that the US Senate was about to pass an omnibus anti-terrorism bill that would prohibit secure communications in the United States, except when access was guaranteed to the government.

With such a blatant threat to freedom of expression, freedom from censorship, and privacy of personal communications looming fast on the horizon, Phil allowed a fellow cryptoid—Kelly Goen—to have a copy of PGP for uploading to as many BBSes and host computers as possible. But only to systems in the US—due to embarrassingly stupid, arrogant crypto export regulations.

It took only hours for foreign networkers to copy it via the Internet—*exactly* as they have done for years with copies of the government-approved DES crypto system, equally prohibited from export even though it exists on essentially all UNIX-based Internet hosts in the US.

Now Phil Zimmermann is being threatened by a San Jose federal grand jury—for exporting PGP, which he *carefully* avoided doing. As usual, the feds are going after the little guy—while carefully avoiding AT&T, UC Berkeley, and SCO, all of which have routinely shipped export-prohibited copies of the DES (Data Encryption System) to tens of thousands of US-based UNIX systems connected to the global Internet.

PGP is free; download a copy—while you still can. And send a dollar—or several thousand of

Russian Dosimeter

These pocket-sized (5" x 1.75" x .75") units count gamma radiation exposure from .01 to 9.99 micro-Sieverts per hour (One micro-Sievert = 100 micro-Roentgens). According to the instructions, the maximum admissible safe radiation level is .1 to .6 µSv/h. The instrument uses four commonly available button cells (Russian ones included) that are supposedly good for about 2 years of use four times a day. We opened one of the units up and were interested to find Russian IC's inside!

HSC# 80123

\$29.95 \$19.95

Video Processor!

Enhance your video productions without cleaning out your wallet! Four color controls allow you to adjust "sunlight" (brightness), color saturation (really gives life back to washed-out videos), flesh tones and color tint (useful for videos taped with a camera that did not have color balance set). Two other controls let you adjust image resolution and picture sharpness, while a pair of controls let you suspend the processing so you can see the effect of what you are adjusting. Switchable between two different inputs (video only, not RF). Inputs and outputs are RCA jacks. New in box with manual, 90 day warranty.

HSC# 13978 ~~\$49.95~~ **\$39.95**

One-trick Phone Friend

This little novelty was meant as an easy-access dialer for one of the off-brand long distance services. You can't change the pre-programmed access codes, but it will remember the last number you dialed with it, so you could use it as a one-number (16-digits) memory re-dialer. Handy for those mid-night overseas calls! Uses three button cells which might need replacing.

HSC# 14438 ~~\$4.95~~

\$3.95

Computer Parts

Full-size AT-style case with slide cover over the drive fronts, brand new with hardware kit, takes standard AT power supply (not included), room for up to five half-height drives, 16.5" x 6" x 21"

HSC# 14433 ~~\$19.95~~ **\$9.95**

MicroTimes Writers' Soapbox Awards

'em—to the Phil Zimmermann Defense Fund, c/o Philip DuBois, Attorney-at-Law, 2305 Broadway, Boulder, CO 80304. We need to stand and be counted beside those who protect freedom—or we will lose what's left of it.

Comments are welcomed, addressed to me at 345 Swett Road, Woodside, CA 94062 or email to jwarren@well.sf.ca.us

John Wolcott

1993 has been a terrific year for the computer user. New products abound. Hardware and software that you couldn't afford have dropped in price to within the grasp of the average user. Previously "unthinkable" innovation is being incorporated into new products that are making computing what it always should have been.

With the arrival of multimedia, the personal computer is now a regular member of the family, offering interactive educational tools; business accounting and secretarial functions; communication with banks, businesses, bulletin boards, and fax machines; and, of course, game simulations with sound and amazing graphical capabilities that almost seem to "think." As society becomes more computer literate and the computer becomes more user friendly, we are seeing people who had avoided computer usage and understanding like the plague, recognizing a need for computer literacy in everyday business and personal application.

Emerging products this year that have caught my attention are "lightning speed" processors, massive media storage devices, advanced word processing applications, and an array of new pointing devices. As new technology in CPUs evolves, processors that are more than adequate for the average user are very reasonably priced. Media storage devices will now hold staggering amounts of data with speedy access times. CD-ROM drives, hard drives, and Floptical™ drives deliver applications that were, until recently, too enormous to fit on an entire hard drive. Their prices are well within reach of even a first-time system purchaser. Computer "super stores" are cropping up in droves to meet this need.

Desktop publishing applications are falling by the wayside as new word processors grow to meet every publishing need. Page design, graphical images with editing and resizing, font selection, spell checking, thesaurus access, and even grammar correction are standard items with the release of new word processing applications. Microsoft Word 6.0 has just been released and offers many new features that make it a powerful publishing application. The program almost seems

to think for you in terms of presenting a polished finished product. It is quite a "step up" from any word processing application previously available. You'll find that Word 6.0 will enhance your word processing productivity by allowing you to concentrate on content and allowing the program to do your layout work for you.

Not to be outdone, WordPerfect Corporation has dispensed with its cumbersome command environment to release a truly powerful and easy-to-use word processor that is fully integrated with the Windows environment. WordPerfect 6.0 is an elegant package that will take you from simple letter composition through publication-quality presentations with exceptional results. The new features incorporated with this release will astonish even the most skeptical writer.

Choice of a cursor control device is a matter of personal taste. Pens, track balls, and mice will all do the same job in different ways. I had been a devoted Logitech mouse user and still am, to some extent. Using a notebook computer "on the road" required finding a work area to set up the computer and a flat surface for the mouse pad.

I happened upon the PortaPoint from VersaPoint Technology, a small rectangular plastic box that has a rubber "pointing button" in the center and two click buttons below. By placing your index finger on the "pointing button," you move the cursor on screen by nudging your finger in the direction you want the cursor to move. The harder you nudge, the faster the cursor moves. Button clicks are easily accomplished with your thumb. As with learning to use a mouse, you'll find that this is initially very awkward to use. After some practice, it becomes second nature and allows you to work with your computer in a limited space, eliminating the need for a flat surface. I am still more productive using a Logitech mouse, and still working on proficiency with the PortaPoint. But the PortaPoint has met a real need for my day-to-day purposes. This is a "must have" for your notebook computer.

Are you one of the many who are watching computer prices drop and waiting for them to "bottom out" before making a purchase? If you're ready for what computer systems and devices offer today, don't wait. Yes, computer prices will continue to drop as new technology emerges. A low price for the latest technology is the holy grail of the computer industry. The only way to make a system purchase or to upgrade what you have is to dive right on in.

Wayne A. Yacco

Hardware:

General Parametrics (510/524-3950) has come up with a very cool use for active-matrix color. And while the Video Show Presenter lacks a full keyboard, it is probably going to be even more useful to presenters than a full-blown computer.

This paddle-shaped device lets you direct a presentation in either Harvard Graphics, Lotus Freelance, or Microsoft PowerPoint, and it adds functions that are unavailable to you in any other way. While you watch your presentation in color and simultaneously face your audience, you can also secretly see your author's notes, check thumbnails of the entire presentation, or preview the next slide. The Video Show Presenter is a powerful innovation in both presentation hardware and software, and could turn almost any Clark Kent presenter into Supershowman. It also foreshadows inexpensive hand-held color computer technology.

Hewlett-Packard has just shipped the Omnibook 425, and I've had a chance to play with one of the first of these vastly improved machines. This is the machine HP would have designed two years ago if they could have seen the future. A 486 processor gives you a big boost in speed from the 300 model, and the 425 apparently comes with another 2MB of standard memory. At least mine did. That also makes Windows run much faster.

The Omnibook's powerhouse applications—MS Word and Excel—fairly zoom now. Traveling Software's Remote Access (206/483-8088), which debuted with the OmniBook, remains also, but the addition of 2.01 Card and Socket Services gives the unit's two available sockets the power to connect to the world in many more ways. A lack of backlighting remains a weakness for many applications, but the battery life Omnibook gains through this sacrifice gives it legs.

(Speaking of subnotebooks: RA showed up at COMDEX as part of Traveling's Commworks' exciting small machine: the first active-matrix color subnotebook! Can color handhelds be far?)

The number 425 paid off twice this year—BCC (1-800-827-4222) has upgraded the Avanti 486 to create the 425C. Its new-generation passive-matrix color display rivals the saturation and brightness of TFT units. Otherwise, it's essentially the same system that I nominated here last year. BCC chose to use a small 8.25" display for much the same reason that other vendors have turned to double-scan technology, but a smaller display has also gained it the advantage that HP obtained by forgoing backlighting.

The Avanti gets far more than two hours of continuous operation running at full turbo speed. The display's not at all hard on the eyes either. The only drawback is that its size also reduces the size

EVERGREEN

MicroTimes Writers' Soapbox Awards

of Windows icons and buttons, making it a little difficult to click on them with the built-in trackball (the only other change from the earlier model). Nevertheless, I'm able to use the 425C day-in and day-out without distress, headaches, or fatigue. Avanti's put together a nearly ideal combination of light weight, power, storage, and color, and given it the long life I crave.

The one thing that the Avanti doesn't have yet is a PCMCIA slot, but they're coming soon. And they're coming soon for the desktop too. In fact, I think that PCMCIA sockets will come to predominate on the desktop as well as on portables as the bus of choice for personal computing. It shouldn't take more than two years for it to largely supplant the ISA bus, and given sufficient bandwidth and speed, future versions will displace other technologies as well. Size, green power management, hot swapping, standardization, and plug-and-play installation will all contribute to this. The ability of mass merchandisers to sell systems and blister-packed peripherals on razor-thin margins will push it over the edge. PCMCIA Card and Socket Services 2.01 is the year's top technology.

The **Microsoft BallPoint Mouse** is my final hardware pick. It's so much smoother than its predecessor that it's hard to believe they're related. It's ergonomically improved too with better button placement, a more caressable shape, and an adjustable attachment system that lets you shut the lid of a portable while it's attached. I liked the original BallPoint too, and was frankly surprised that Microsoft could make this much improvement to it.

Software:

I was likewise surprised by the advances in the new driver for the BallPoint and MS Mouse. It was already the best driver on the market, and like the new trackball, I didn't think there was much room for improvement. But there are a host of impressive new features. You can now set the cursor to jump to mid-screen on command, turn into a magnifier, wrap around the screen from edge to edge, and jump to the default button of dialog boxes.

Two other software categories have me excited this year. One is interactive multimedia CD-ROM. The new interactive digital multimedia titles from Philips POV and Media Vision—**Voyeur**, **Quantum Gate**, and **Critical Path**—are all first efforts to produce adult video games. They are more like interactive movies in many ways. For example, the stars of **Voyeur** are Robert Culp and Grace Zabriski, and live action is used in **Critical Path** as well. (Media Vision Executive Vice President Min Yee is inspired in the role of a mad general, too.) In addition, both **Voyeur** and **Critical Path** were filmed against a blue screen. Sets were created with 3D Studio and added later. **Quantum Gate**

was created by Greg Roach of Hyperbole fame and is especially innovative in its extension of interactivity to the control of characters as well as plot.

Another area of particularly noteworthy innovation is in graphics software. Both **Adobe Photoshop** (415/961-4400) and **Autodesk 3D Studio** (1-800-445-5415) are out in impressive new releases including the Windows version of Photoshop.

HSC (310/392-8441) has added **Live Picture** to a roster which already boasts the brilliant **Kai's Power Tools (KPT)** add-on for Photoshop. (KPT isn't quite out for Windows, but will ship soon.) **Live Picture** is an image-editing and paint program that lets you scale up and down virtually an infinite number of levels. For example, you could use it to paint the entire *Mona Lisa* within a single pixel of the lady's eye. Then, you could take a pixel in that image and begin again. And this process could be endlessly repeated until you run out of storage. Amazing.

Equally impressive in its domain is an inexpensive virtual-reality tool from **Virtus**, **Virtus Walkthrough** (1-800-847-8871). It lets you easily create simple digital environments, and then move in and around them as you like. It's ideal for prototyping architectural spaces and many other applications. And some of Hollywood's top directors are already using it to effortlessly storyboard their films.

Years ago, when I was a columnist and later a bureau chief for *Newsbytes*, I had the opportunity to spend a lot of time online. The slowness and linearity of the interface all but totally dampened my enthusiasm for chatting with the other chiefs and scanning the online wire services. I've always hated working with online bulletin boards for the same reason. Nor were things helped some time later when I used another online service to send copy to an editor who didn't have MCI Mail.

Now, with the arrival of its Windows software, I've had a chance to try **America Online**. I was dumbfounded. It completely changed my attitude toward what I had previously considered only a necessary evil. AOL has devised an interface that powerfully facilitates chatting online. It's fun! And it's the most intelligent and insightful answer to human communication needs I could imagine within the limitations of interactive text. If it offered nothing else, you'd want to get on AOL to meet interesting people. Of course there's email, gateways to other networks, Compton's Online Encyclopedia (unfortunately, with a mediocre search engine), Dow Jones, news, and more. I highly recommend you join the other half million while there's still room.

By the way, I still use MCI Mail too. If you need to connect in a hurry call 1-800-777-4709 for MCI, or 1-800-247-6364 for an AOL software kit. ■

Los Angeles COMPUTER FAIR

**Put your
product
in front of 50,000
computer consumers**

The Los Angeles Computer Fair takes direct marketing to a new level by bringing manufacturers, resellers and more than 50,000 prospects together in one location.

Centered in one of the nation's largest computer retail markets, this unique, first-ever event combines the exhibits and educational programs of traditional trade shows with the high volume excitement of today's superstores. There hasn't been anything like it since the heyday of the West Coast Computer Faire.

Book your space today, before it's too late.

For complete Exhibitor Kit, call: (800) 800-5600

Presented by National Productions, California's leading producer of computer retail shows for over ten years.

CO-SPONSORS: MicroTimes & Pasadena IBM Users Group (Steve Bass)

National Productions, Inc.
16175 Monterey Road, Ste. 4, Morgan Hill, CA 95037

DYNAMITE DAT DRIVES

INTERNAL UNIT
\$495

STORE UP TO
4000MB
WITH DATA COMPRESSION

Store up to 2000 megabytes on a DAT tape the size of a matchbook! DAT drives offer unbeatable performance and reliability. DAT tapes are super inexpensive and extremely rugged. For serious backup and data interchange, DAT is the only solution. 'Til now, the only problem has been the price. SCSI DAT drives typically cost \$1500 or more.

CSC has purchased a quantity of Wangtek factory refurbished drives at unheard of prices. These drives are guaranteed to meet or beat new drive performance specifications and are available at the fraction of the cost of a new drive.

Use our 15-day money-back satisfaction guarantee and try this drive on your system. You'll be amazed at the performance and convenience DAT has to offer.

SCSI POWER TOWER

When we couldn't find a quality enclosure at a decent price, we got mad. We decided to build the darn thing ourselves!

CSC is now manufacturing the ultimate SCSI-II enclosure. Up to 8 half height SCSI-II hard, CD-ROM, optical, and tape drives can be configured to your specifications.

Whether you need a network storage subsystem, just an external SCSI-II drive case, or a full-blown disk array, CSC has it! We'll custom build it with the drives of your choice!

Our new enclosure features up to three powerful 300 watt power supplies for a total of up to 900 watts!! Fully fault tolerant redundant power is optional!

A professionally designed micro-filtered air cooling system protects sensitive optical and tape drives.

Call us today for more information on this new product!

800-SCAN

Name: **543 HOWARD ST**

Address: **SF CA 94105**

City, State, Zip: **1-800-800-7226**

Telephone:

NUMBER RECOGNITION

How many people in your company? **58**

How many people do you maintain on your data entry staff? **12**

How many forms do you data enter each day? **975**

OPTICAL CHARACTER RECOGNITION (OCR)

OCR technology can now **READ most fonts used in business, even when MIXED on a PAGE.**

CHECK BOXES (OMR)

Does your volume sometimes exceed what your staff can handle?

Is it preferable to verify rejects, rather than data enter every form?

Is the ability to read mixed data helpful?

Are your budgeting and staffing requirements in conflict?

SPECIAL HANDLING NEEDS

- Forms Recognition
- Automatic De-skewing
- Field Extraction

Data capture from paper documents or fax transmissions.

Call 1-800-800-SCAN

Telecommunications Software

Continued from page 278

EUDORA EMAIL SOFTWARE

Eudora email management software was originally developed for the Macintosh at the University of Illinois and is now available for both the Macintosh and PC by Qualcomm. It allows users to send, receive, sort, and otherwise manage electronic mail over TCP/IP networks, such as the Internet. New features integrated in the program include message filtering, support for AppleEvents (Macintosh version only), drag and drop attachment (Macintosh version only), double-click attachment lines (PC-compatible version), and Multipurpose Internet Mail Extensions (MIME) compatibility. Qualcomm's Eudora customer support specialists provide customer service and technical support through a toll-free telephone number and Internet mail addresses. (Per unit pricing is \$50 for 1-9 users, \$45 for 10-49 users, \$40 for 50-99 users, \$36.50 for 100-499 users, and \$32.50 for 500-999 users.) Qualcomm, Inc., 10555 Sorrento Valley Rd., San Diego, CA 92121. 1-800-2-EUDORA. Email: eudora-sales@qualcomm.com. Technical support email: eudora-hotline@qualcomm.com.

Below: Eudora email management software for the Mac and (bottom) for the PC.

Network Hardware

HP DISK ARRAY SYSTEM

Designed to house up to 10GB of fully integrated disk-drive storage, the HP Disk Array System provides workgroups and departmental networks with a cost-effective solution for primary storage. It works with HP NetServers and PC servers from other manufacturers. For fault-tolerant storage, the HP Disk System supports RAID protection among eight volumes. Available in both EISA and ISA versions, it can house up to five 3.5" half-height disks with disk capacities of 510MB, 1GB, or 2GB. Also featured is a hot-swap capability for Novell NetWare networks. This means if one disk drive fails, the failed disk can be removed, a new disk inserted, and the new disk will be configured automatically—while the network is running. HP Disk Systems supports the major network operating systems, such as Novell NetWare, Microsoft Windows NT and LAN Manager, IBM LAN Server, SCO UNIX, and Banyan Vines. (\$3299 for a configuration that incorporates a 1GB disk drive) Hewlett-Packard, Direct Marketing Organization, PO Box 58059, MS511L-SJ, Santa Clara, CA 95051. 1-800-826-4111.

ASP SNAP STARTER KIT

The SNAP Starter Kit gives you everything you need to start a printer sharing system that, with additional SNAP Transmitters and cabling, can be extended to allow twenty PCs to share the printer. The Kit includes two SNAP Transmitters, one SNAP Receiver, two 25' cables, and an optional 6 volt power supply. Users plug the Receiver into the standard Centronics parallel port of the printer, plus the Transmitter into the parallel ports of two PCs, and use the telephone-type, modular cables to link everything. (\$159) ASP Computer Products, Inc., 160 San Gabriel Dr., Sunnyvale, CA 94086. (408)746-2965.

SOLECTEK AIRLAN/PCMCIA

Designed for use with PCMCIA-equipped notebook computers, AIRLAN makes possible mobile LAN connections which allow users the freedom to move about their workplace unencumbered by power cords or network cables. In addition to extending cabled networks, AIRLAN is ideally suited for creating entire wireless LANs or temporary field networks. AIRLAN operates at 2Mbps and supports all major network operating systems including NetWare, LANtastic, and Windows for

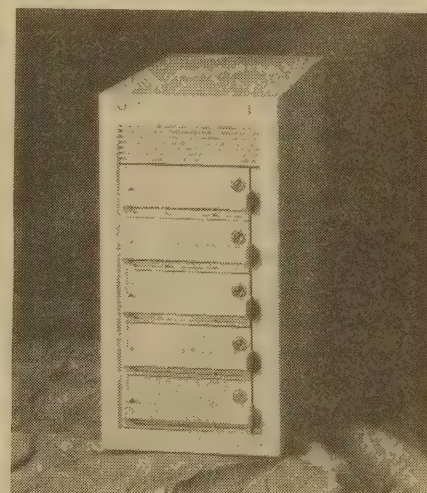

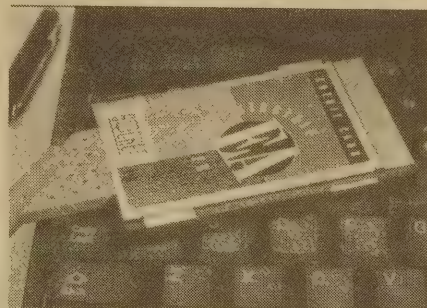

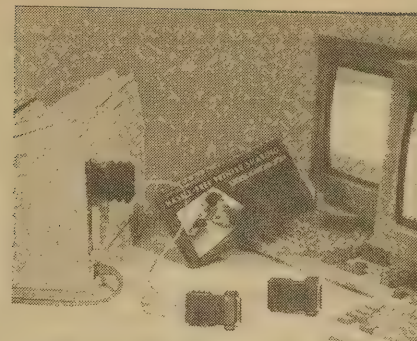

Workgroups. It uses proven spread spectrum 915MHz radio technology to pass data through walls, ceilings, and floors. Its tiny omnidirectional antenna provides complete coverage up to 800ft., and even further when used with the AIRLAN/Hub. (\$699) Solecetek Corp., 6070 Nancy Ridge Dr., San Diego, CA 92121. 1-800-437-1518.

DICE NET DX

The DICE Net DX provides Macintosh, PC, and UNIX users with an integrated network environment to print PostScript, TIFF, TARGA, and other file formats to the Xerox 5775 Color Copier. This turns the 5775 into a high-production network printer for short-run color jobs. It allows multiple users to share the capabilities for the 5755 through workstation connections to a single server system, thus providing a central interface to the copier. Its features include queuing and spooling of each file on a first in, first out basis. An optional densitometer may be connected to the server allowing for regular calibrations to be performed. CMYK color balance can be selected on the remote workstations of the DICE Net server. The server is an EISA 486/66MHz computer. The DX board is an EISA-bus configuration with full 32-bit data pathway, and comes with up to 128MB of RAM on board, a TI 34020 graphics processor, and 4MB of VRAM. Dice America Corp., 20 Washington Ave., Suffern, NY 10901. (914)369-3600.

SOCKETLINK ETHERNET ADAPTER

The SocketLink EA PCMCIA card, which includes a high-speed, 16-bit Ethernet adapter plus software, allows the HP OmniBook 300 to run Novell's NetWare and NetWare Lite, Microsoft's LAN Manager, IBM's PC LAN, Artisoft's LANtastic, Banyan's VINES, and other popular networks. It also handles 10BaseT Ethernet and the SocketLink EA+ handles both 10BaseT and 10Base2 Ethernet. SocketLink runs up to four times faster than LAN adapters which use the OmniBook's parallel port, and over ten times faster than communicating over the OmniBook's RS-232 or infrared serial ports. The SocketLink EASY installation software allows users to convert a PCMCIA-compatible notebook to a Novell NetWare client in three minutes. (10BaseT only is \$399; 10BaseT/10Base2 combination is \$420) Socket Communications, Inc., 2501 Technology Dr., Hayward, CA 94545. (510)670-0300.

Top to bottom: the SNAP Starter Kit from ASP Computer Products, Inc.; the SocketLink Ethernet adapter from Socket Communications, Inc.; the HP Disk Array System.

ETHER•WRITE/LPR

Ether•Write/LPR allows users to print from Ethernet-connected UNIX computers via the UNIX LPR command to as many as six AppleTalk compatible printers on a connected Ethernet or LocalTalk network. Combining bridging and gateway functions, Ether•Write/LPR provides conversion from IP to AppleTalk's PAP printing protocol. The device can also convert text-only input into PostScript output. It features one LocalTalk port and auto-switching connections for thick, thin, and 10BaseT Ethernet. Also included is full support for Compatible System's Advanced Network Security Protocol. (ANSP) Management software is included which runs on any Macintosh in any zone on an AppleTalk internet. Software and configuration information is stored in downloadable Flash ROM. (\$995) Compatible Systems Corp., PO Box 17220 Boulder, CA 80308. 1-800-356-0283.

Network Software

HIGHPAK-10

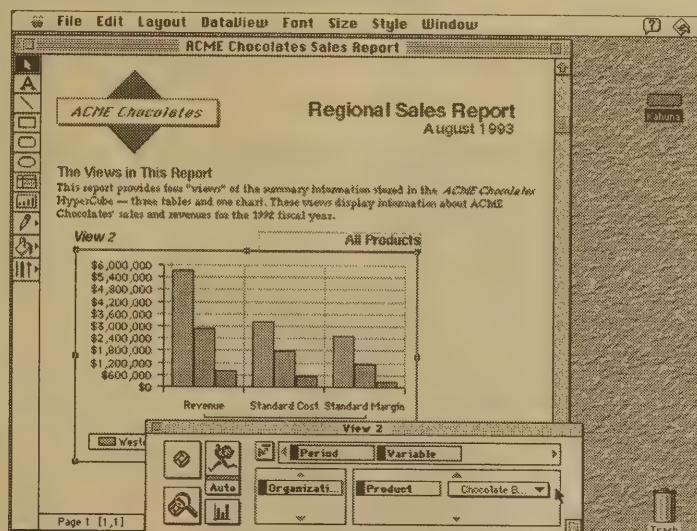

HighPak-10 video server software supports up to ten concurrent VHS-quality playbacks in a multiple segment Token Ring, Ethernet, or fiber optic configuration. It is designed for a single server network operating under NetWare 3.11 and is ideal for a variety of interactive multimedia applications such as training, education, video kiosks, video mail, and video presentations. HighPak software accesses video files from a standard Novell file system permitting their management with standard Novell utilities or any third-party utility. It supports any video software platform and any video compression technology. Because it is a NetWare NLM configuration, HighPak maximizes server resources by permitting more efficient utilization while allowing server and network resources to remain available for non-video applications such as word processing, spreadsheets, and database access. ProtoComm Corp., Two Neshaminy Interplex, Travose, PA 19053. (215)245-2049.

SQL MONITOR, RELEASE 10

SQL Monitor, Release 10 is the first software tool available for distributed client/server database performance monitoring and tuning. With SQL Monitor, companies will have mainframe-like control over the systems performance of their SQL Server-based distributed database environments. It consists of two components. SQL Monitor Server accesses the SQL Server shared memory as a background task to capture SQL Server performance statistics. SQL Monitor Client connects to SQL Monitor Server and displays performance data through a graphical user interface. With SQL Monitor Client, a systems administrator can easily specify the statistics to be monitored, the level of detail, frequency of updates, and hot data will be presented. By accessing

SQL Server shared memory the impact on database performance is greatly minimized. (SQL Monitor Client starts at \$595 for a single-user Windows 3.1 license and \$1880 for a single-user UNIX system license. SQL Monitor Server starts at \$2580 for an unlimited-user UNIX system license.) Sybase, Inc., 6475 Christie Ave., Emeryville, CA 94608. (510)596-3500.

Below: Andyne Pablo for Macintosh.

APPLESEARCH

AppleSearch is a new information search and retrieval software package that provides Macintosh users with personalized, easy access to unstructured text in client/server environments. It turns a collection of unstructured documents stored on a server into an online library that can be searched to find necessary information, quickly and easily. It combines features found on high-end bibliographic, full-text retrieval software with Apple's traditional ease-of-use and adminis-

tration. Users can create AppleSearch Reporters, which are electronic search agents, that can be saved, shared among users, and scheduled to deliver easy-to-read updates on a daily or weekly basis. In addition to internally generated documents, an AppleSearch user can tap into information sources such as server-mounted CD-ROMs, news wire services, or other online services that feed into the AppleSearch server. (\$1799 for the Server/Client five-pack and \$499 for the AppleSearch Client ten-pack) Apple Computer, Inc., 20525 Mariani Ave., Cupertino, CA 95014. 1-800-795-1000.

ANDYNE PABLO FOR MACINTOSH

Using HyperCube technology, Pablo simplifies the complexity of generating reports from relational databases. A HyperCube is a means of storing and combining multidimensional summary information from almost any data source. Additional features include dynamic linking to host databases, access to

local and remote data sources, information hierarchies, flexible tables and charts, and automatic refreshing of summary information. With support for connectivity options such as Apple's Data Access Language (DAL), Pablo provides dynamic access to HyperCubes stored in relational databases like Oracle, DB2, Ingres, Sybase, AS/400, Rdb, SQL/DS, Teradata, and Informix. (\$695 for single copies; \$5495 for ten-pack) Andyne Computing Ltd., 522 Princess St., Kingston, Ontario, Canada K7L 1C7. (613)548-4355, 1-800-267-0665.

Monitors & Displays

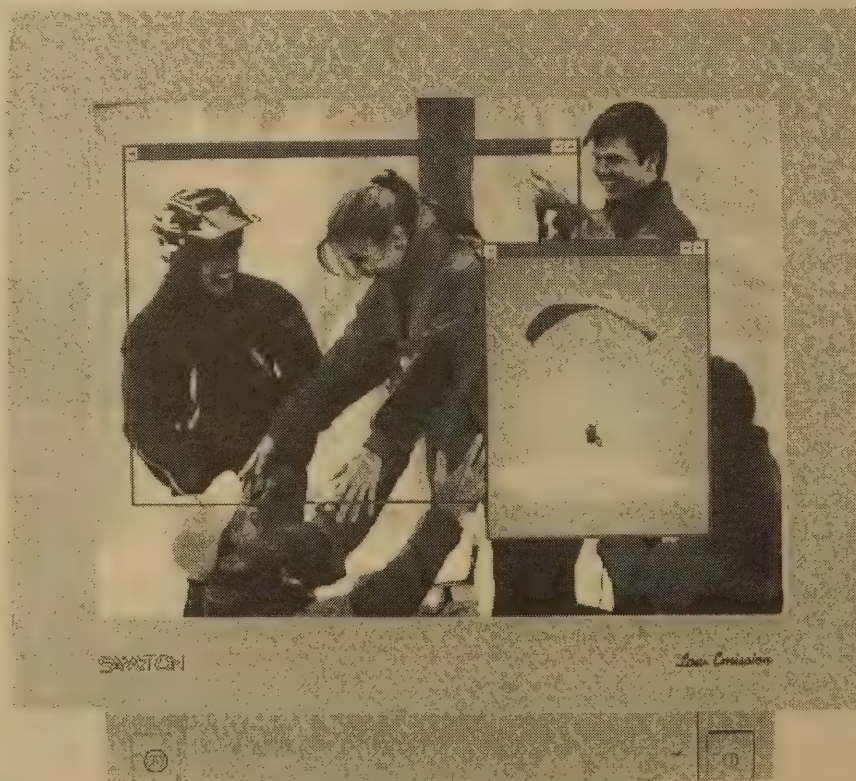

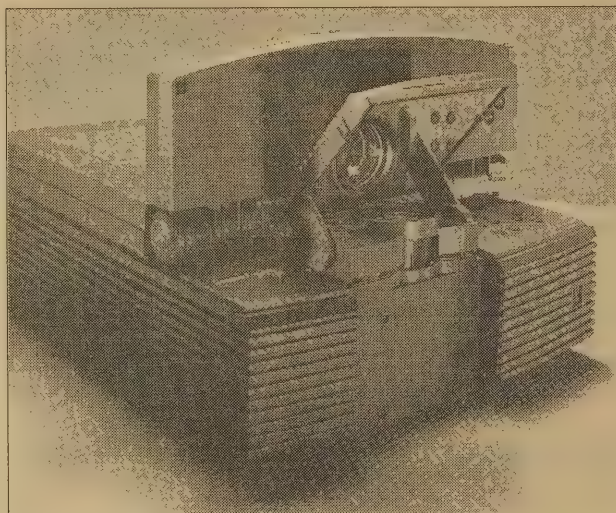

SAMTRON SC-528MXL

The Samtron SC-528MXL is a 15" non-interlaced enhanced super VGA color monitor that offers variable frequency, multiscan, and meets the Swedish MPR-II guidelines for VLF emissions. It is also Mac II compatible. The SC-528MXL features power down circuits which automatically cut energy consumption when not in use. This can provide a savings of up to 70% on the electricity costs of running the monitor. Ergonomic features include a tilt-and-swivel stand, as well as front access digital screen controls and an etched and polarized non-glare screen. Samtron monitors come with a two-year parts and labor war-

ranty. (\$659) Samtron Displays, Inc., 14251 E. Firestone Blvd., Suite 101 La Mirada, CA 90638. (310)802-8425.

DIAMOND PRO SVGA

Diamond Pro SVGA is a 14" color monitor offering 800 x 600 non-interlaced (1024 x 768 interlaced) resolution, and a 31.5 to 38.5kHz auto-scanning range, making it compatible with VGA, SVGA (56 and 60Hz), and Macintosh LC (VGA mode) family graphics standards. It also has 0.28mm dot pitch for high resolution, a 30MHz video amplifier, and an MPR-II compliant, low magnetic emission design. The Diamond Pro SVGA has a scan mode memory with six preset settings and one adjustable setting of horizontal width, centering, vertical size, and positioning. The

monitor cabinet has a tilt/swivel base and front-panel display controls. (\$439) Mitsubishi 5665 Plaza Dr., Cypress, CA 90630. (714)220-2500.

VIEWSONIC 17G

The ViewSonic 17G, an energy-efficient 17" color monitor, is equipped with an easy-to-operate on-screen programming system. Conforming to VESA display power management signaling standards (DPMS) and supporting the EPA's Energy Star Program, the ViewSonic 17G powers down in three stages, down to 5 watts of power. The time-to-activate each of the stages is programmed by the user. Also included is a free power management software driver that interfaces with most video cards, saving the expense of purchasing a special "green" board. The on-screen programming feature allows the user to see options on the screen, and by touching a button, adjust up to thirteen different controls. The monitor carries a Swedish MPR-II certification for low radiation emissions. (\$999) ViewSonic, Inc., 20480 Business Pkwy., Walnut, CA 91789. 1-800-888-8583.

PROTON FM-1561A

The FM-1561A multimedia monitor is at once a computer color monitor and complete audio and video playback system. It includes a 15" CRT panel, a 2-watt-per-channel stereo amplifier, and side-mounted 3" stereo loudspeakers. The FM-1561A offers up to 1280 x 1024 pixels resolution. It is equipped with manual tuning options such as variable overscan,

Top right: Diamond Pro SVGA 14" color monitor; Middle: Proxima Desktop Projector 2800; Bottom left: Samtron SC-528MXL 15" non-interlaced enhanced super VGA color monitor.

Monitors & Displays

Continued from page 324

pincushion adjustment, and audio volume control. The monitor has ten digital settings with which to adjust the image parameters. It is mounted on an adjustable tilt-and-swivel pedestal. A miniature stereo headphone jack is located on the front control panel. (\$799) Proton Inc., 16826 Edwards Rd., Cerritos, CA 90701. (310)404-2222.

SHARP LC-10V1

The LC-10V1 monitor features excellent image reproduction and multimedia flexibility. Its applications range from video conferencing to educational training to information processing. It can display not only text and graphics but video from TVs, VCRs, and laser disks. The monitor's 10.4" active matrix screen LCD panel supports 24-bit color for natural-looking pictures with clear definition and subtle tonal distinctions. The LCD panel greatly reduces reflected glare even in bright rooms. (\$798) Sharp Electronics Corp., Sharp Plaza, Mahwah, NJ 07430. 1-800-223-2121.

PROXIMA DESKTOP PROJECTOR 2800

The ergonomically designed Desktop Projector weighs 18lbs., measures less than 6" tall, resembles small laser printers, and makes data sharing and presentation as easy as connecting your computer to your monitor.

The 2800 model projects full-motion video from your computer as well as from a VCR, laserdisk, or camcorder. Tailored to business executives, multimedia producers, workgroup meetings, and training presentations, it displays up to two million colors. It also has a cordless mouse option, effective from up to twenty-five feet, and a built-in light source. Lenses and mirrors are hidden from view for transport and storage. The Desktop Projector has an active matrix LCD panel and a 410 watt quartz halogen lamp. The 640 x 480 resolution image is so bright the projector can be operated in well-lit meeting rooms so that people can take notes and read the display. (\$8995 for the 2800) Proxima Corp., 6610 Nancy Ridge Dr., San Diego, CA 92121-3297. (619)457-5500. ■

Clockwise from top: Viewsonic 176 color monitor; Proton FM-1561A multimedia monitor; Sharp LC-10V1.

QEMM 7 finds room nobody else can.

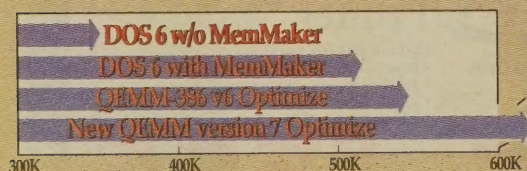

Sooner or later, you'll get an
"Out of Memory" message.
Whether you have
1 megabyte or 16.

TSRs and network utilities need memory right
where your programs need it, too. It's called
'lower' or 'conventional' memory.

Adding RAM to your PC just gives you
more expanded or extended memory —
accessible to some programs, but not to TSRs
like fax utilities, device drivers or network
utilities like Novell NetWare. Fortunately,
there's an easy software solution
to 'out of memory' problems.

Have Your Cake and Eat it, Too.

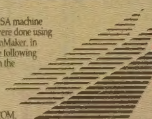

The more memory you have, the more flexi-
bility and reliability you can enjoy. Thanks to

We tested DOS with and without MemMaker and
with QEMM 6 and our new QEMM 7 runs away from
all of them. See details of test conditions below.

How we got the chart numbers: CPU—486/33 ALR Power/business VESA machine
equipped with 16 megs of RAM and running MS-DOS 6. Comparisons were done using
the following memory managers: QEMM 7, QEMM 6.02, MS-DOS 6.02 MemMaker. In
addition to the driver (or drivers) required by each memory manager, the following
drivers, DOS resources and programs were loaded for all comparisons in the
CONFIG.SYS file: SIVR.DRV, DOS=HIGH, FILES=20, BUFFERS=11,
STACKS=64, MMSOUND.SYS, SNDIR2.SYS, SLED.SYS,
DOS.SHELL, statement in the AUTOEXEC.BAT file: VSAT,
MSCTPS, INDRITE, ISL.COM, NEWIO.COM, IPVIO.COM,
NETX OR EMSNETX, MOUSE.COM, SMARTDRV.COM, FRISCCAP.COM.

our patent-pending 'stealth' tech-
nology, QEMM finds as much as 96K more
high memory than other memory managers.

No one has yet been able to match our
performance. No wonder QEMM outsells
all the others *put together!*

QEMM™ puts the maximum memory right
where your favorite programs need it so you

**"I needed another 32K for my favorite TSR.
I added 2 megabytes. I still need 32K! What gives?"**

can run them and TSRs without 'out of
memory' problems or conflicts. That keeps
your PC running smoothly and performance
at its best.

Protect Your Productivity; Keep Your Work Safe.

Any task, from programming to writing the
company business plan to composing a
personal letter, takes time and thought. Your
PC is supposed to make that process
easier; your output better. When you can't
run your favorite grammar-checking TSR or
have to get by without a vital network utility,
you're sacrificing productivity.

Whether you're running MS-DOS, IBM™
PC-DOS, DR DOS, Novell DOS or MS
Windows; one megabyte or eight, don't sacri-
fice; don't compromise; don't risk losing work.

QEMM comes with the
new version of Manifest,
the award-winning
memory analyzer that
helps you see how your
PC works.

Managing your
memory well is the
best way to assure
your work won't go to
waste.

QEMM version 7 is
the most powerful,
flexible memory
manager you can buy.

It's the utility that finds memory
when nothing else can.
